Subject: [EXTERNAL] Supervised Injection Site
Date: Monday, November 26, 2018 3:07:24 PM

Good afternoon,

My name is Helen Alvillar I am Leo's mom, I lost my son Leo on May 5, 2008 to an accidential overdose. He is my first born and only son. Long story short my son had been clean for a while, then somethings happened in his life out of his control, having to give up his apartment to same money, losing his job because of cut backs made by company. He tried to use again, using the same about as he did years earlier was to much for him. He died in the bathroom of a friends house, by the time they found him he had stopped breathing and it was to late. I believe with everything in me that if a Supervisied Injection Site was available to him he would be alive today. The Supervised Injection Sites will save lives!! I support this lifesaving initiative, please support it with me so together we can save another son, brother, father a loved one missed so much.

Thank you
Helen, Leo's Mom
