9.6.1.3 Requirement for PUD District Plan

A. Choice of PUD District Plan Type

1. General PUD District Plan

If development is to proceed in phases or over an extended period of time, or if more general zoning is desired prior to preparation of more detailed site development and pre-construction plans, the applicant may submit a “General PUD District Plan” covering the entire PUD District area. After the PUD District rezoning with a General PUD District Plan is approved, one or more site development plans shall be submitted for each phase of development and shall follow the general development concept established in the General PUD District Plan. See Section 12.4.3, Site Development Plan, for the procedure and review criteria applicable to site development plans.

2. Detailed PUD District Plan

If development is not to be completed in phases or over an extended period of time, or if an applicant is prepared to submit more detailed site development plan or pre-construction plans, the applicant may submit a “Detailed PUD District Plan” covering the entire PUD District area. After the PUD District rezoning with a Detailed PUD District plan is approved, the Detailed PUD District Plan shall constitute a site development plan, enabling the applicant to proceed directly to final zoning / building permit approval (no intervening site development plan review step under Section 12.4.3).

All PUD District Plans shall specify permitted primary, accessory and temporary uses, and may specify applicable use and development review procedures, in compliance with the following standards.

3. A PUD District Plan may subject the establishment of a permitted use or the development of an allowed building form to any procedure established in Article 12, Zoning Procedures and Enforcement, including Zoning Permit Review with Information Notice, Special Exception review, Site Development Plan review, or Administrative Adjustment. However, a PUD District Plan shall not establish or include any use or development review procedure different from a procedure established in Article 12, Zoning Procedures and Enforcement.
4. A PUD District Plan may provide for future amendment by subarea, platted lots, or metes and bounds parcels, as allowed in Section 9.6.1.4, Amendments to Approved PUD District Plans.
5. [A PUD District Plan that establishes single-unit dwellings as a permitted primary use must also include an Accessory Dwelling Unit use as a permitted accessory use.](#)

Any Telecommunications Tower Structure, Telecommunications Tower-Alternative Structure, Antennas Not Attached to a Tower, Telecommunications Facility, Telecommunications Facility-All Others or Base Station may be modified or reconstructed in a manner that does not substantially change the physical dimensions of such structure. A modification shall be determined to be a substantial change to the physical dimensions of the subject structure only if the modification or change meets any of the following criteria:
 - a. It increases the height of the tower by more than 10% or by the height of one additional antenna array with separation from the nearest existing antenna not to exceed twenty feet, whichever is greater; for other eligible support structures, it increases the height of the structure by more than 10% or more than ten feet, whichever is greater;
 - b. It involves adding an appurtenance to the body of the tower that would protrude from the edge of the tower more than twenty feet, or more than the width of the tower structure at the level of the appurtenance, whichever is greater; for other eligible support structures, it involves adding an appurtenance to the body of the structure that would protrude from the edge of the structure by more than six feet;
 - c. For any eligible support structure, it involves installation of more than the standard number of new equipment cabinets for the technology involved, but not to exceed four cabinets; or, for Base Stations, it involves installation of any new equipment cabinets on the ground if there are no pre-existing ground cabinets associated with the structure, or else involves installation of ground cabinets that are more than 10% larger in height or overall volume than any other ground cabinets associated with the structure;
 - d. It entails any excavation or placement outside the current site of the telecommunications facility;
 - e. It would defeat the concealment elements of the eligible support structure; or
 - f. It does not comply with conditions associated with the siting approval of the construction or modification of the eligible support structure or base station equipment, provided however that this limitation does not apply to any modification that is not in conformance only in a manner that would not exceed the thresholds identified in this Section 11.5.2.4.A.1.

2. ~~Upon submission of a complete application for collocation or modification that does not substantially change the physical dimensions of the subject structure under Section 11.5.2.4.A.1, the Zoning Administrator shall approve or approve with conditions the application within 60 days. Conditions of approval may include compliance with previously imposed conditions of approval, generally applicable building, structural, electrical, and safety codes or other laws, including this Code, codifying objective standards reasonably related to health and safety.~~

B. Conditions on Modifications and Collocations that are Physically Substantial

1. Modifications ~~not~~ defined in Section 11.5.2.4.A shall be considered physically substantial. A tower may be substantially modified or reconstructed to accommodate the collocation of additional antennas under the following conditions:
 - a. The tower shall be the same type as the existing tower, unless the tower is replaced by a monopole not more than 48 inches in diameter, provided, however that an existing alternative tower structure not over 50 feet in height may only be replaced by another alternative tower structure not over 50 feet in height;
 - b. An existing tower, to accommodate the collocation of an additional antenna, may be substantially modified or rebuilt only once to a taller height, not to exceed 30 feet more than the tower's existing height, provided, however that this Section 11.5.2.4.B shall not apply to Telecommunications Tower - Alternative Structures not over 50 feet in height;
 - c. The additional height referred to in this Section 11.5.2.4.B.1 shall not require an additional distance separation as set forth in Table 2 of Section 11.5.2.1.E.5, Separation Requirements. The tower's pre-modification height shall be used to calculate distance separations;
 - d. The existing tower shall comply with the separations from certain uses and zones in Table 1 of Section 11.5.2.1.E.5, Separation Requirements;
 - e. If a tower is replaced to accommodate a physically substantial collocation, only 1 tower may remain on the zone lot; and
 - f. If a tower is relocated on-site in compliance with all setback requirements, and within a 25 feet radius of its existing location, under the terms and conditions of this section, it shall not be deemed a violation of the separation requirements of Section 11.5.2.1.E.5, Separation Requirements.
2. Antennas may be attached to an existing tower that is accessory to a police station, fire station or hospital, and said tower may be substantially modified to a height not to exceed 135 feet above grade. No part of any collocated antenna shall be more than 90 feet above grade.
