In the event that the Contractor fails to take action with respect to such material by seeking and obtaining a protective court order or other informal resolution with the party seeking the information, the City will disclose all such material in compliance with the said Act(s).

- U. **No Construction Against Drafting Party:** Each of the parties acknowledge that each of them and their respective counsel have had the opportunity to review this Agreement and that this Agreement shall not be construed against any party merely because this Agreement or any of its provisions, have been prepared by a particular party.

For the purposes of that procedure, the City official referring a final determination shall be the City's Director.

- X. **Americans With Disabilities Act; Rehabilitation Act:** The Contractor shall cause all Community Corrections facilities owned and/or leased by it pursuant to this Agreement to be inspected and analyzed by competent knowledgeable inspection personnel and legal representatives for compliance of such facilities with all applicable titles of the Americans With Disabilities Act (ADA) and, as applicable, the Rehabilitation Act. The Agreement, and any other documents requiring a signature hereunder, may be signed electronically by the City in the manner specified by the City. The Parties agree not to deny the legal effect or enforceability of the Agreement solely because it is in electronic form or because an electronic record was used in its formation. The Parties agree not to object to the admissibility of the Agreement in the form of an electronic record, or a paper copy of an electronic document, or a paper copy of a document bearing an electronic signature, on the ground that it is an electronic record or electronic signature or that it is not in its original form or is not an original.

If the Work fails to conform to the requirements of this Contract, the State may require Contractor promptly to bring the Work into conformity with Contract requirements, at Contractor's sole expense. If the Work cannot be brought into conformance by re-performance or other corrective measures, the State may require Contractor to take necessary action to ensure that future performance conforms to Contract requirements and exercise the remedies available under this Contract, at law or in equity, in lieu of or in conjunction with such corrective measures.

C. Monitoring

Contractor shall permit the State, the federal government, and governmental agencies having jurisdiction, in their sole discretion, to monitor all activities conducted by Contractor pursuant to the terms of this Contract using any reasonable procedure, including, but not limited to: internal evaluation procedures, examination of program data, special analyses, on-site checking, formal audit examinations, or any other procedures. All monitoring controlled by the State shall be performed in a manner that shall not unduly interfere with Contractor's performance hereunder.

State. Contractor shall provide and maintain a secure environment that ensures confidentiality of all State records and other confidential information wherever located. Confidential information shall not be retained in any files or otherwise by Contractor or its agents, except as permitted in this Contract or approved in writing by the State.

D. Disclosure-Liability

Disclosure of State records or other confidential information by Contractor for any reason may be cause for legal action by third parties against Contractor, the State or their respective agents. Contractor shall indemnify, save, and hold harmless the State, its employees and agents, against any and all claims, damages, liability and court awards including costs, expenses, and attorney fees and related costs, incurred as a result of any act or omission by Contractor, or its employees, agents, Subcontractors, or assignees pursuant to this §10.

11. CONFLICTS OF INTEREST

Contractor shall not engage in any business or personal activities or practices or maintain any relationships which conflict in any way with the full performance of Contractor's obligations hereunder. Contractor acknowledges that with respect to this Contract, even the appearance of a conflict of interest is harmful to the State's interests. Absent the State's prior written approval, Contractor shall refrain from any practices, activities or relationships that reasonably appear to be in conflict with the full performance of Contractor's obligations to the State hereunder. If a conflict or appearance thereof exists, or if Contractor is uncertain whether a conflict or the appearance of a conflict of interest exists, Contractor shall submit to the State a disclosure statement setting forth the relevant details for the State's consideration. Failure to promptly submit a disclosure statement or to follow the State's direction in regard to the apparent conflict constitutes a breach of this Contract.

Contractor warrants that it shall maintain all necessary licenses, certifications, approvals, insurance, permits, and other authorizations required to properly perform this Contract, without reimbursement by the State or other adjustment in Contract Funds. Additionally, all employees, agents, and Subcontractors of Contractor performing Services under this Contract shall hold all required licenses or certifications, if any, to perform their responsibilities. Contractor, if a foreign corporation or other foreign entity transacting business in the State of Colorado, further warrants that it currently has obtained and shall maintain any applicable certificate of authority to transact business in the State of Colorado and has designated a registered agent in Colorado to accept service of process. v. Primacy of Coverage

Coverage required of Contractor and Subcontractor shall be primary over any insurance or self-insurance program carried by Contractor or the State.

In addition, upon request by the State at any other time during the term of this Contract or any subcontract, Contractor and each Subcontractor shall, within 10 days of such request, supply to the State evidence satisfactory to the State of compliance with the provisions of this §13.

14. BREACH

A. Defined

In addition to any breaches specified in other sections of this Contract, the failure of either Party to perform any of its material obligations hereunder, in whole or in part or in a timely or satisfactory manner, constitutes a breach. The institution of proceedings under any bankruptcy, insolvency, reorganization or similar law, by or against Contractor, or the appointment of a receiver or similar officer for Contractor or any of its property, which is not vacated or fully stayed within 20 days after the institution or occurrence thereof, shall also constitute a breach.

B. Notice and Cure Period

In the event of a breach, notice of such shall be given in writing by the aggrieved Party to the other Party in the manner provided in §16. If such breach is not cured within 30 days of receipt of written notice, or if a cure cannot be completed within 30 days, or if cure of the breach has not begun within 30 days and pursued with due diligence, the State may exercise any of the remedies set forth in §15. Notwithstanding anything to the contrary herein, the State, in its sole discretion, need not provide advance notice or a cure period and may immediately terminate this Contract in whole or in part if reasonably necessary to preserve public safety or to prevent immediate public crisis.

15. REMEDIES

If Contractor is in breach under any provision of this Contract, the State shall have all of the remedies listed in this §15 in addition to all other remedies set forth in other sections of this Contract following the notice and cure period set forth in §14(B). The State may exercise any or all of the remedies available to it, in its sole discretion, concurrently or consecutively.

A. Termination for Cause and/or Breach

The State may terminate this entire Contract or any part of this Contract. Exercise by the State of this right shall not be a breach of its obligations hereunder. Contractor shall continue performance of this Contract to the extent not terminated, if any.

i. Obligations and Rights

To the extent specified in any termination notice, Contractor shall not incur further obligations or render further performance hereunder past the effective date of such notice, and shall terminate outstanding orders and subcontracts with third parties. However, Contractor shall complete and deliver to the State all Work, Services and Goods not cancelled by the termination notice and may incur obligations as are necessary to do so within this Contract's terms. At the sole discretion of the State, Contractor shall assign to the State all of Contractor's right, title, and interest under such terminated orders or subcontracts. Upon termination, Contractor shall take timely, reasonable and necessary action to protect and preserve property in the possession of Contractor in which the State has an interest. All materials owned by the State in the possession of Contractor shall be immediately returned to the State. All Work Product, at the option of the State, shall be delivered by Contractor to the State and shall become the State's property.

ii. Payments

The State shall reimburse Contractor only for accepted performance up to the date of termination. If, after termination by the State, it is determined that Contractor was not in breach or that Contractor's

action or inaction was excusable, such termination shall be treated as a termination in the public interest and the rights and obligations of the Parties shall be the same as if this Contract had been terminated in the public interest, as described herein.

iii. Damages and Withholding

Notwithstanding any other remedial action by the State, Contractor shall remain liable to the State for any damages sustained by the State by virtue of any breach under this Contract by Contractor and the State may withhold any payment to Contractor for the purpose of mitigating the State's damages, until such time as the exact amount of damages due to the State from Contractor is determined. The State may withhold any amount that may be due Contractor as the State deems necessary to protect the State against loss, including loss as a result of outstanding liens, claims of former lien holders, or for the excess costs incurred in procuring similar goods or services. Contractor shall be liable for excess costs incurred by the State in procuring from third parties replacement Work, Services or substitute Goods as cover.

B. Early Termination in the Public Interest

The State is entering into this Contract for the purpose of carrying out the public policy of the State of Colorado, as determined by its Governor, General Assembly, and/or Courts. If this Contract ceases to further the public policy of the State, the State, in its sole discretion, may terminate this Contract in whole or in part. Exercise by the State of this right shall not constitute a breach of the State's obligations hereunder. This subsection shall not apply to a termination of this Contract by the State for cause or breach by Contractor, which shall be governed by §15(A) or as otherwise specifically provided for herein.

i. Method and Content

The State shall notify Contractor of such termination in accordance with §16. The notice shall specify the effective date of the termination and whether it affects all or a portion of this Contract.

ii. Obligations and Rights

Upon receipt of a termination notice, Contractor shall be subject to and comply with the same obligations and rights set forth in §15(A)(i).

iii. Payments

If this Contract is terminated by the State pursuant to this §15(B), Contractor shall be paid an amount which bears the same ratio to the total reimbursement under this Contract as Contractor's obligations that were satisfactorily performed bear to the total obligations set forth in this Contract, less payments previously made. Additionally, if this Contract is less than 60% completed, the State may reimburse Contractor for a portion of actual out-of-pocket expenses (not otherwise reimbursed under this Contract) incurred by Contractor which are directly attributable to the uncompleted portion of Contractor's obligations hereunder; provided that the sum of any and all reimbursement shall not exceed the maximum amount payable to Contractor hereunder.

C. Remedies Not Involving Termination

The State, in its sole discretion, may exercise one or more of the following remedies in addition to other remedies available to it:

i. Suspend Performance

Suspend Contractor's performance with respect to all or any portion of this Contract pending necessary corrective action as specified by the State without entitling Contractor to an adjustment in price/cost or performance schedule. Contractor shall promptly cease performance and incurring costs in accordance with the State's directive and the State shall not be liable for costs incurred by Contractor after the suspension of performance under this provision.

ii. Withhold Payment

Withhold payment to Contractor until corrections in Contractor's performance are satisfactorily made and completed.

iii. Deny Payment

Deny payment for those obligations not performed, that due to Contractor's actions or inactions, cannot be performed or, if performed, would be of no value to the State; provided, that any denial of payment shall be reasonably related to the value to the State of the obligations not performed.

iv. Removal

Notwithstanding any other provision herein, the State may demand immediate removal of any of Contractor's employees, agents, or Subcontractors whom the State deems incompetent, careless, insubordinate, unsuitable, or otherwise unacceptable, or whose continued relation to this Contract is deemed to be contrary to the public interest or the State's best interest.

v. Intellectual Property

If Contractor infringes on a patent, copyright, trademark, trade secret or other intellectual property right while performing its obligations under this Contract, Contractor shall, at the State's option (a) obtain for the State or Contractor the right to use such products and services; (b) replace any Goods, Services, or other product involved with non-infringing products or modify them so that they become non-infringing; or, (c) if neither of the foregoing alternatives are reasonably available, remove any infringing Goods, Services, or products and refund the price paid therefore to the State.

Contractor may contest the final Evaluation, Review and Rating by: (a) filing rebuttal statements, which may result in either removal or correction of the evaluation (CRS §24-105-102(6)), or (b) under CRS §24-105-102(6), exercising the debarment protest and appeal rights provided in CRS §§24-109-106, 107, 201 or 202, which may result in the reversal of the debarment and reinstatement of Contractor, by the Executive Director, upon a showing of good cause.

- B. Subcontract.
- 1) The Contractor may subcontract for community corrections services with any private agency or unit of local government for the purpose of rendering Services to offenders, provided, however, that any Subcontractors shall agree to comply with the terms and provisions of this Contract and all applicable sections of CRS §17-27-101 *et seq.* and CRS §18-1.3-301, as amended. The Contractor shall include all requirements of this Contract in all subcontracts with Subcontractors.
 - 2) Contractor shall provide copies of all subcontracts to the State within ninety (90) days following the beginning of the State fiscal year or within ninety (90) days following the addition or replacement of a new Subcontractor. No payment shall be authorized unless the appropriate subcontract has been executed and the Services specified in the approved subcontract have actually been provided.
 - 3) Contractor shall be responsible for all Subcontractor performance obligations even if the State is contracting directly with a community corrections program that provides services and supervision for offenders.
 - 4) The Colorado Community Corrections Risk Factor Analysis published pursuant to C.R.S. §17-27-108(2)(b)(II)(B) is attached to this contract as Exhibit "H", and is incorporated by reference.
 - 5) In each Contract year, the State shall publish and transmit to Contractor the revised Risk Factor Analysis.
 - 6) Except as otherwise provided in subsections 7) and 8) below, the Contractor shall not disburse any funds allocated pursuant to this Contract for Services rendered by any community corrections program or provider at any location that has been designated as a "Level 1" program or provider pursuant to the two most recently revised Risk Factor Analysis publications.

- 7) The Contractor may still disburse funds pursuant to this Contract to a "Level 1" program or provider if:
 - (a) the program or provider has been operating at its current location for less than 24 months, or
 - (b) the program or provider has not had at least one full performance audit or at least one follow-up performance audit within the 12 months preceding the publication of the most recently revised Risk Factor Analysis, or
 - (c) the Contractor has the written consent of the State to continue to disburse funds to the "Level 1" program or provider. The Contractor shall be required to show cause that funding the program or provider is in the best interest of the State of Colorado and local community.

- 8) Notwithstanding any other provisions of this Contract, the Contractor shall withhold the disbursement of funds to any new program or provider situated at the same physical location as a "Level 1" program or provider unless and until:
 - (a) the State concurs in writing that the new program or provider is under new ownership or management, and
 - (b) an initial performance audit of the new program or provider by the State demonstrates that such new program or provider is likely to meet or exceed the performance levels necessary for subsequent Risk Factor Analysis designation as a "Level II," "Level III" or "Level IV" program or provider.

- 9) Notwithstanding any other provision of this Contract, the State may, on an emergency basis after appropriate inquiry, designate any program or provider receiving funds pursuant to this Contract ineligible to continue to receive such funds when the State in its sole discretion determines either:
 - (a) that the current operation of the program or provider constitutes an imminent and significant threat to public safety; OR
 - (b) that the program or provider has demonstrated neglect, reckless disregard, or inability to sustain compliance with the Colorado Community Corrections Standards.

- 10) Designation of ineligibility to continue to receive funds pursuant to section 9) above shall be made with the written concurrence of the Executive Director of the Department of Corrections, the Executive Director of the Department of Public Safety and the State Court Administrator, or their designees.

ARTS Haven and Peer I TC SCOPE OF WORK

The University of Colorado Denver retains all copyright for this Scope of Work. This document can only be used for the University of Colorado Denver's/ARTS submission for the DCJ scope of work requirement.

SECTION 1: BACKGROUND

The Therapeutic Community (TC) for the treatment of drug abuse and addiction has existed for nearly 50 years. The Modified Therapeutic Community (MTC) for individuals with co-occurring disorders is listed in the SAMHSA Registry of Evidence-based Programs and Practices. Substance abuse treatment and specifically TC programs, relapse prevention programs and cognitive-behavioral interventions have been cited as particularly important to improving the success of offenders following release from prison (Aos et al., 2006; Colorado Division of Criminal Justice, 2008; Taxman, 2004). Additionally, the TC offers many different evidence-based modalities including Cognitive Behavioral Therapy, trauma informed groups, and dialectic behavioral therapy.

For three decades, NIDA has conducted several large studies to advance scientific knowledge of the outcomes of drug abuse treatment as typically delivered in the United States. These studies collected baseline data from over 65,000 individuals admitted to publicly funded treatment agencies. They included a sample of TC programs and other types of programs (i.e., methadone maintenance, out-patient drug-free, short-term inpatient, and detoxification programs). Data were collected at admission, during treatment, and in a series of follow-ups that focused on outcomes that occurred 12 months and longer after treatment. These studies found that participation in a TC was associated with several positive outcomes. For example, the Drug Abuse Treatment Outcome Study (DATOS), the most recent long-term study of drug treatment outcomes, showed that those who successfully completed treatment in a TC had lower levels of cocaine, heroin, and alcohol use; criminal behavior; unemployment; and indicators of depression than they had before treatment. Even those who completed a portion of TC treatment showed significant improvement, if they were in treatment for at least 90 days.

The TC approach is often referred to as "community as method" as it is grounded in the Social Learning Theory. Social Learning Theory is described as the "growing up", or maturing of the clients. The social functioning, education/vocational skills, and positive community/family ties of many of these individuals have been eroded by their substance abuse and criminal behaviors. For them, recovery involves **rehabilitation**—relearning or re-establishing healthy functioning, skills, and values as well as regaining physical and emotional health. Other TC residents have never acquired functional life-styles. For these people, the TC is usually their first exposure to orderly living. Recovery for them involves **habilitation**—learning for the first time the behavioral skills, attitudes, and values associated with socialized living. Living within a TC environment for a significant period of time gives them the opportunity to practice, develop, and internalize these skills before they return to living in society using didactic learning techniques (discussions, seminars) and social learning techniques (positive peer culture, role modeling, and learning by experience).

TC's are long-term intensive residential programs for the treatment of severe substance use disorders, with a 9-12 month average length of stay. Those treated within a TC often also have other complicating issues including involvement with the criminal justice system, lack of positive social support, and co-occurring mental health diagnoses. The TC offers a drug-free residential setting that uses a hierarchical model of treatment stages that reflect increased levels of personal and social responsibility and uses peer influence to help individuals learn and assimilate social norms and develop prosocial skills. TC clients

interact in structured¹ and unstructured² ways to influence attitudes, perceptions, and behaviors associated with drug use. “Mutual self-help” means that all individuals within a TC assume responsibility for not only their own recovery, but that of their peers, as well, and they hold each other responsible for making meaningful life changes within the context of TC living. This peer support that is fostered in treatment continues even after the client’s transition to aftercare in an Outpatient Therapeutic Community (OTC) setting.

Each TC client is expected to take personal responsibility for their community. Newer clients are expected to assimilate with the community norms, with senior clients in the client government acting as positive role models for behavior. Senior clients are expected to demonstrate healthy decision-making, abstain from former negative behaviors and attitudes, and provide support to newer clients to prevent clients from making poor decisions and falling back into destructive behaviors or attitudes. As a participant in the community, the resident in treatment is expected to adhere to strict and explicit behavioral norms and rules. It is important that clients fully embrace TC norms, procedures and rules in order for the community to run smoothly and be most effective in changing behavior and addressing clients’ issues. Violation of cardinal rules (i.e., no sexual contact with other residents, no use of drugs or alcohol, and any physical violence or threats) may result in immediate discharge from the program.

In contrast, clients are expected to (1) practice and use common language and concepts of positive living throughout their stay; (2) participate in all household chores and duties, community give-back activities (e.g., going to nursing homes, food banks); (3) appear neat and clean at all times (i.e., showered, clean and pressed clothing); and (4) report their locations, schedule changes, out of house day appointments and emotional state of mind. The community status and location of client’s whereabouts is tracked by program staff.

Clients have a program schedule that they must follow on a daily basis. Clients shall be on time for all program activities and fully participate in them. All TC clients are also asked to accompany each other during times when they leave the house, provide on the spot support at any time of the day (even during the night if a client is having a particular difficult time with a life situation), discourage each other from negative talk, and spend time with each other during their unscheduled spare time to discuss program tools, behaviors and issues (these are called “**dyads**” in the TC community)³. These peer support activities are important for building investment in the program and learning prosocial attitudes and behaviors. All activities whether facilitated by certified or non-certified staff are considered important therapeutic opportunities to promote individual change and long-term recovery.

SECTION 2: RESIDENTIAL FUNDING

The Department of Criminal Justice (DCJ) base rate supports room and board as well as services outlined in the Community Corrections Standards.

The DCJ Differential/Enhanced rate supports the Therapeutic Community milieu treatment and assists in supporting the five clinical contact hours specified in the behavioral health treatment rules and outlined in the scope below. However, the TC Differential/Enhanced rate does not cover the full cost of the comprehensive clinical services provided within the TC. As one example, ARTS utilizes special funding

¹ Structured refers to structured program activities including learning activities and work assignments, encounters and peer group processes; scheduled personal time; various family and community meetings led by peers and/or staff.

² Unstructured refers to non-programmed time in the TC including free time for the clients to interact with their peers, out of house time, etc.

³ Dyads are designed to discuss specific issues. This conversation may be held between two clients, client and staff, or client and family therapist.

to support an on-site vocational and GED coordinator to provide career assessment and job readiness courses.

Mental health services which include mental health individual therapy, psychiatric evaluation, psychotropic medication monitoring, and the medications themselves for Community Corrections clients are billed to the Correctional Treatment fund (HB1352) when indicated. These funds also cover specialized mental health groups that may be provided throughout the course of a client's treatment. This fund will only be billed when these services are in addition to the five clinical contact hours.

Community Corrections clients are charged a subsistence fee of \$17 per day. Clients who successfully completed the prison TC's and transition from prison to either Peer I or the Haven pay \$4 per day and DOC pays \$13 per day. If this DOC funding is depleted before the end of the fiscal year, these clients will then be billed the full \$17 per day. Rates provided here may be subject to change. Parole clients who are eligible for Special Connections Medicaid funding do not pay the subsistence fee due to the requirements of Medicaid.

In addition to daily client fees, the clients are billed for unfunded medical services; medical prescriptions or psychotropic medications that are not covered by the correctional treatment fund; off campus transportation; and other client incidentals.

SECTION 3: PHASES OF THE TC TREATMENT PROGRAM

Principle: Treatment within a TC is divided into three major stages. In order to move through each stage, clients must meet certain requirements and criteria around behavior change as well as commitment to and compliance with the TC, values, philosophy, and concepts.

Phases:

1. **Stage 1 (Induction and early treatment):** Within the first thirty days, the client participates in an orientation phase to assimilate into the TC; learns new policies and procedures; establishes trust with staff and other residents; initiates a personal assessment of self, circumstances and needs to begin to understand the nature of their addiction; and commits to the recovery process. Staff and senior clients teach new clients about TC concepts⁴ and other topics such as: addiction, feelings, family dynamics, and Principles over Personalities (POP)⁵. Clients have an opportunity to start practicing the TC tools⁶ and demonstrating their knowledge of the tools. Clients also write papers unveiling their criminal mask⁷ and how the TC tools will help them achieve this. Topics of papers include but are not limited to: "What did support mean to me in the past and what does support mean to me now"; and "My criminal mask and how it has been destructive to me". Clients also meet weekly with their counselors and attend group therapy as outlined in this scope of work.
2. **Stage 2 (Intensive Treatment Stage):** The intensive treatment stage can last up to six to nine months and includes a structured model of progression⁸ through increasing levels of pro-social attitudes, behaviors and responsibilities. During this stage, the client participates in individual counseling and a

⁴ These are basic concepts and structured ideas about a TC that all clients have to learn and discuss, that form the foundation of a TC. Concepts are based on the idea that severe addicts have similar personality trait such as: anxiousness/self-doubting, impulsive, deceiving, etc.

⁵ POP is a concept that reflects program goals and values that are associated with the notion of "Right Living"

⁶ Tools that confront issues and negative behaviors such as learning assignments pull ups, haircuts, trims, dyads, peer feedback groups, etc. All of these TC tools are described in this scope of work.

⁷ A false front or expression of behavior; it's what the client wants you to see, the wall they hide behind, can be opposite to who they are.

⁸ Structured model of progression means that for the client to move through phase, he/she must meet a set of documented criteria and commitments. These are available in the TC Program Manuals.

variety of evidence-based group therapies and other TC specific group activities (e.g., process and sensitivity groups) to address their issues, including trauma in their past. TC tools (pull-ups, trims, monad, etc.) that confront, challenge, and/or provide feedback about negative behaviors are employed by staff and fellow clients on a daily basis. Using these tools, clients learn how to correct and improve upon behaviors, and demonstrate readiness for home and community re-entry. The concepts of "right living" (i.e., learning personal and social responsibility and ethics) and "acting as if" (i.e., behaving as the person should be rather than has been) are integrated into the TC groups, meetings, and seminars. These activities are intended to heighten awareness of specific attitudes or behaviors and their impact on oneself and the social environment

3. **Stage 3 (Re-Entry):** The re-entry stage, which lasts about 3-9 months, is intended to facilitate the individual's separation from the residential TC and successful transition to the larger society. Clients typically transition to this phase 9-12 months into treatment. Clients work on job readiness skills, continue to meet with their individual counselor at least once every seven days and participate in five clinical hours per week. Clients also become employed in this stage of treatment and pay toward treatment fees and restitution. Passes to leave the house for leisure and other activities are given to prepare clients to re-enter the community while they are still in a protective environment. Alcoholics Anonymous and Narcotics Anonymous often meet on site during TC treatment so that clients can start building networks outside in the community while they are still in treatment. TC clients are required to participate in outside support groups and to find mentors or sponsors. A TC graduate has to leave the program drug-free, employed, and financially stable. Upon completion of the residential phase, all clients are transferred to ARTS' Outpatient Therapeutic Community (discussed in detail below in "Continuing Care") located on the same campus as TC programs for continuing care services for the remainder of their legal sentence. Clients in the first phase of the outpatient program live in transitional living homes with their peers. Clients who fulfill their legal obligations during the course of the residential or outpatient treatment phase can voluntarily decide to continue involvement in either treatment component.

SECTION 4: STANDARD COMPLIANCE

Standards for the operation of a community corrections program can be found in the Colorado Community Corrections Standards (CCCS), Colorado Department of Public Safety, Division of Criminal Justice (effective August 1, 2010). The TC provider must, at minimum, conform to all applicable Standards in that publication, or any revised version.

Regulations for residential substance abuse treatment programs can be found in Behavioral Health Rules, Colorado Department of Human Services, Office of Behavioral Health. The provider must, at a minimum, conform to all licensing requirements and policies and procedures included in that publication, or any revised version. Only paid staff (or interns or volunteers who have been approved to provide services within our milieu setting; completed a background check and an orientation to the program and its operations; and are supervised on shift) will provide services to clients under these standards.

This Scope of Work is structured as though the provider is the sole or primary source for all clinical services. If any services are provided by an agency that is external to the contracted provider, it is the responsibility of the provider to assure that all requirements set forth herein are met.

SECTION 5: ASSESSMENTS, ADMISSION AND ACCEPTANCE CRITERIA

1. **Admission Criteria:** The TC considers the following populations for enrollment:

- A. Diversion Clients
 - B. Transition Clients
 - C. Parolees
 - D. Probation
 - E. Self-referred
 - F. Involuntary Commitments referred by the Office of Behavioral Health and is not identified as a Community Correction client.
2. Prior to being admitted to the TC, each client shall participate in a comprehensive intake process administered by a TC designated intake staff person who is a Certified Addictions Counselor (CAC II) or higher, or Master's level clinician.
- Intake Application: Assessments are documented in the individual electronic record and at a minimum include all information as required by OBH standard 21.190.3 and include information regarding criminogenic needs and substance use disorder diagnoses. Intake staff use the American Society of Addiction Medicine Assessment Placement (ASAM) to assess clients across six dimensions and determines appropriate level of care. The ASAM also assists with the development of the initial treatment plan. The six dimensions assessed include: Acute intoxication and/or withdrawal potential; biomedical conditions and complications; emotional, behavioral, or cognitive conditions and complications; readiness to change; relapse continued use or continued problem potential; and recovery/living environment. The client must score at an ASAM III.5 level of care or have a clinically justifiable and documented override to the ASAM criteria in order to be accepted to a TC level of care.
 - Substance Abuse Assessment: The TC shall use the Standardized Offender Assessment Revised (SOA-R) drug and alcohol assessments that are compliant with Community Correction Standard 6-090. In cases where a current or complete SOA-R battery of instruments is not made available by a referral agency, the TC shall administer these instruments within 7 business days of admission. SOA-R instruments include: Level of Supervision Inventory (LSI), Simple Screening Instrument-Revised (SSI-R), Adult Substance Use Survey-Revised (ASUS-R) and the Service/Treatment Recommendation Worksheet (TxRW). Clients that are scored on these assessments at a Level 4d meet the criteria for TC admission.
 - The TC intake staff person shall assess level of motivation during intake/referral by assessing the client's readiness for change. This is often assessed through building a rapport with the client, completing the above assessments and scoring, meeting with clients in the county jails and the prison based TC's and observing their behavior, and providing direction to the client about following up with intake staff and assessing the clients follow-through. The TC has a right to refuse acceptance of an individual who does not demonstrate sufficient motivation to participate in a long-term program.
 - Mental Health Screening: The TC screens all referrals for risk of mental health issues using the Colorado Criminal Justice Mental Health Screen – Adult (CCJMHS-A). The TC refers clients internally for mental health evaluations accordingly.
 - The TC shall make individualized determinations regarding the extent to which the TC program can effectively address the client's present needs for mental health services using available programming and appropriate staff.

- Medical/psychiatric staff shall complete a psychiatric evaluation, when clinically indicated. Ongoing psychiatric evaluations and medication management is completed at the professional discretion of the psychiatric service provider and is documented in the client's electronic record. These services are covered through community treatment funds. These services may also be referred out.
 - The TC shall directly provide or refer clients to outside mental health counseling and therapy for co-occurring disorders and trauma (that cannot be maintained through milieu treatment alone), through the use of community treatment funds. Without this funding there is no reimbursement for mental health services within a TC. Program clients are responsible for paying for medications and mental health services that is not covered by the correctional treatment fund.
 - Pregnancy Risk Assessment: The female gender-specific TC shall conduct a Pregnancy Risk Assessment as part of the intake process. If a woman is currently using substances or alcohol, is pregnant and meets the ASAM III.5 Level of Care, she is also considered eligible for the Haven Mother's House and will be a priority for placement.
3. Acceptance: TCs treat people/offenders with a range of substance use disorders who meet the ASAM III.5 Level of Care and who have completed the Standardized Offender Assessment – Revised.
- Based on assessments conducted pre-intake, an individual must demonstrate motivation to participate in all aspects of the TC milieu and a willingness to stay in residential treatment for at least one year followed by at least one year of outpatient TC treatment, as it is an intensive treatment that requires a major lifestyle change.
 - The client must have been fully detoxed (substance free) before being admitted to the TC. No Detox services are offered at the TC.
 - The TC shall reject cases that do not meet their criteria and work with the referral agencies to recommend alternative placement for inappropriately referred clients.
4. Referral Documentation: As part of their admission and acceptance criteria, the TC shall require referring agencies to submit updated copies of the SOA-R instruments. The TC will request other referral documentation such as the Admission Data Summary, Institutional Histories, Medical and Mental Health Records, Computerized Felon Assessments, and Pre-sentencing Investigations (PSI) for DOC clients.

SECTION 6: GENERAL PROGRAM DOSE AND DURATION

1. Individualized Treatment Planning. The TC uses clinical assessments approved by OBH and DCJ as well as referral documentation gathered during intake to inform the client's Individual Treatment Plan.
- a. The assessments and referral documentation described above inform intake staff on how to develop an initial individualized treatment plan for the client. The initial treatment plan is completed within ten days after assessment per OBH standard 21.190.41.D. and addresses the client's immediate needs. A CAC II or higher, or Master's level clinician is responsible for writing the treatment plan for each client with their input based on the initial assessments described above.

- b. Within the first 30 days of admission, a CAC II or higher, or Master's level clinician shall meet with each client to complete the Addiction Severity Index (ASI) or another OBH approved instrument, and participate in re-assessments, as appropriate. More comprehensive treatment plans will be developed based on this evidence-based assessment that addresses identified needs. Plans will include TC interventions and plans that will be reviewed monthly to assess progress toward goals and update as needed.
 - c. A CAC II or higher, or Master's level clinician meets weekly (at least once every seven days, in accordance with OBH treatment rules) to monitor client's progress, problems, concerns, and assist the client in progressing through the client's treatment plan. These interactions are documented in the client's electronic record and should reflect areas of the treatment plan that the client is currently working on.
 - d. Clinical staff also provides documented and regular structured feedback to the clients regarding their levels of motivation and their progress towards treatment goals. Structured feedback most often occurs in individual weekly sessions or at the time of the monthly treatment plan review and progress report. Counselors meet with clients to review progress of treatment plans goals as well as changes in criminogenic needs and risks. New goals may be developed based on the client's progress or lack thereof. These meetings in which feedback has occurred shall be documented in treatment plan updates/reviews or by individual session notes in the electronic record.
2. Supervision Services: Unless otherwise specified in this section, supervision of offenders in TC programs shall be in accordance with applicable *Standards* within Sections 4-000 and 6-000 of the *Colorado Community Corrections Standards*.
 3. Substance Abuse Testing: The TC is capable of testing for drug use with a system that complies with appropriate standards for accuracy and proper evidence handling. One urine drug screen will be required upon admission as specified in CCCS 4-100. At least one random documented full urine screen shall be performed each calendar week on each client. Unless specified differently herein, substance abuse testing procedures shall comply with sections 4-080, 4-090, 4-110, 4-120, and 4-140 of the CCCS.
 4. Alcohol Abuse Monitoring: The provider will test for alcohol use with breathalyzer testing or another system that complies with appropriate standards for accuracy and proper evidence handling. At least one random documented screen for alcohol will be performed at a rate of no less than one (1) screen per every seven day period. Alcohol abuse monitoring shall comply with CCCS 4-130.
 5. Direct Therapeutic Contact: No less than five hours per week shall be comprised of direct individual and/or group therapeutic contact. Groups must be process groups or evidence-based manualized curriculum groups. Per OBH, process groups (which also include peer feedback groups) may be counted towards clinical contact hours only when content is focused on individual treatment and recovery issues, is facilitated by a CAC II or higher or Master's level clinician, and has 12 or less clients in attendance. Individual therapy contact shall be completed within the first week of admission and with no more than seven days in between individual sessions. Individual sessions must be conducted by a CAC II or higher, or Master's level clinician and have a focus on treatment plans goals, criminogenic needs and progress.

6. Curricula: The TC uses several curricula described in detail below that are approved by the Office of Behavioral Health. Curricula shall include that which is cognitive-behavioral, evidence-based, gender sensitive or specific. In some cases, the curriculum addresses both substance use and criminal conduct in an integrated manner.
7. Gender-Responsive Services: In cases of treating female offenders, the provider shall maintain licensure endorsement for *Gender-Responsive Treatment in Substance Use Disorder Programs* from the Office of Behavioral Health. Accordingly, the provider shall comply with section 21.220 of the *Behavioral Health Standards*.

SECTION 7: CLINICAL STAFFING

TCs differ from other treatment approaches principally in their use of staff who are also in recovery and/or often graduates of a TC as key agents of change. **It is essential for TCs to have staff who are in recovery so they can serve as role models and mentors to the clients.** Treatment staff provides 24 hours of monitoring/supervision within a TC to ensure clients are safe and complying with program rules and regulations. We provide descriptions of our staff below; however staffing is subject to change.

1. Operations/Line Staff: Staffing of the TC program shall be in accordance with applicable *Standards* within the *Colorado Community Corrections Standards*. Additionally, overnight client/staff ratios shall not exceed 20:1 pursuant to section 21.210.57 of the *Behavioral Health Standards*. Operations/line staff maintain a secure and drug-free environment using pat downs; room and contraband searches; urinalysis (UAs) and breathalyzer screens (BAs); off-site verifications and visuals/head counts. Line staff monitor and adhere to Community Correction Standards and also assist counselors with transporting clients; contacting family clients and providing updates; assisting clients in obtaining necessary medical, dental, and mental health appointments; co-facilitating groups; and assisting clients with TC seminars, assignment of behavioral and learning assignments; monitoring of the government, and other duties as assigned. Operational/line staff is not typically credentialed. Thus, their work is not counted toward the five clinical contact hours without a CAC II or higher present during interactions.
2. Clinical Staffing: Clinical staffing of the TC shall be in accordance with section 21.20.1 and 21.210.57 of the *Behavioral Health Standards* such that clinical staff to client ratios for group therapy facilitated by a CAC II or higher or a Master's level clinician shall not exceed 12:1. The provider shall maintain staffing levels in accordance with the requirements of this contract. Clinical staff includes primary counselors who provide treatment planning, discharge planning and structured feedback, case management services as needed, facilitate groups, and provide TC interventions including learning and behavioral assignments. Clinical staff are also responsible for completing security and case management duties when applicable and adhering to and monitoring all Community Correction Standards. Clinical staff shall address criminal thinking and anti-social attitudes through behavior modification techniques. Clinical staff must meet with their clients at a minimum of every seven days per *Behavioral Health Standards*. All clinical interactions are documented in the individual's electronic record.
3. Mental Health Staff: The Haven has on-site mental health services. Mental Health counseling staff at the Haven shall be at minimum a Master's Level clinician who is supervised by a licensed clinician. Mental Health staff provide individual therapy and groups as needed for clients with current mental health needs. All interactions are documented in the client's electronic record. Mental Health staff are considered an integral part of the TC team. In addition to providing counseling services, the

mental health team may also address behaviors and criminogenic needs through direct feedback (such as trims and strokes) and/or learning experiences.

4. Psychiatric Staff: A Psychiatric provider (e.g., Psychiatric Nurse Practitioner, Psychiatrist or Addiction Fellow) provides all psychiatric evaluations and medication management for TC clients. It is possible that these services could be referred out if necessary. Psychiatric evaluations and medications for community correctional/diversion clients are paid for with the correctional health fund. Transition clients may be eligible for a voucher for psychiatric evaluations and medications if available.

All TC staff act as important role models in supporting the recovery of each client and are responsible for clinical documentation. Staff teach senior clients how to identify and problem-solve issues that are happening in the community and to report to staff all problems and difficulties. Staff is responsible for teaching clients how to engage in acceptable behaviors, learn and internalize TC goals, avoid negative behaviors and attitudes, and invest in the program through active participation in the activities. All clinical staff shall keep accurate notes and documentation. The TCs adhere to all OBH and DCJ documentation standards.

SECTION 8: STAFF SKILL TRAINING

Principle: Provide skill training for staff and monitor their delivery of services

- A) Program-Specific Training: Staff shall be trained in the TC method and any structured interventions used. Documentation of training records shall be subject to audit/review and shall be maintained in personnel files.
- B) Ongoing Training: Staff training shall be consistent with the requirements of relevant provisions of section 2-000 of the CCCS. Clinical staff training shall be consistent with the *Behavioral Health Standards*.
- C) Staff Qualification and Competencies: The program shall recruit and maintain clinical staff clients who meet OBH regulations.
- D) Clinical Supervision: The provider shall be responsible for documenting compliance with clinical supervision and/or consultation of all substance abuse clinical staff as required and defined by the Division of Regulatory Agencies - DORA (6CCR 1008-3). The frequency of clinical supervision shall be based on the education, experience, and skill level of the clinician in accordance with DORA requirements.

SECTION 9: WEEKLY INDIVIDUAL THERAPY AND CASE MANAGEMENT

1. Duration and Frequency: A counselor (a CAC II or higher, or Master's level clinician) provides individual counseling to an assigned client at least every seven days per Behavioral Health Standards for a minimum of 30 minutes.
2. Weekly Therapy and Case Management:
 - a. Weekly therapy by a counselor consists of a review of the client's daily and weekly program participation, client's weekly reports of their recovery, problem areas, successful areas,

progress towards service plan goals, counselor notes and assessment results. Counselors use TC assignments to address behaviors, substance use disorders and criminogenic needs.

- b. For the offender clients, the counselor discusses the client's progress toward their objectives and addresses problems that may be impinging on the offender's re-integration into the community.
- c. Additionally, clients receive vocational case management and support as part of treatment. Vocational services are provided on-site by a Vocational Coordinator or are contracted out to a community provider based on the CCC standard 6-130. Each client receives a job readiness assessment per the CCC standards. Based on the scored assessment and determined level of job readiness needs, the client will complete a series of classes prior to being placed on "job search" status. Assessments, classes attended, and an individualized employment plan are documented and placed in the client's electronic record. Counselors also assist clients who want a GED in accessing GED basic adult education, preparation classes and testing.
- d. Within the female gender-specific TC, a program staff person shall work closely with human services and child welfare agencies to unify families. Staff coordinates with county human services departments regarding transition plans, attends team decision-making meetings regarding placement and care of the children, transports clients to court appointments, provides updates to social workers, and monitors child visitations when appropriate. All family case management activities are recorded in the electronic record for each client.
- e. Clinical notes shall contain information regarding progress towards treatment goals. In addition, they will note the duration, time of session, and date; assessment of the client's progress; and plan. Weekly summary notes are recorded in the electronic record and are completed by the counselor (CAC II or higher or Master's level clinician).

3. Progress Reports:

- a. TC clinical staff shall provide the referring agency with immediate notification, followed by written reports within three working days, of significant problems that would jeopardize public safety or the offender's continuation in the TC program. Such major problems include, but are not limited to, new arrests, alcohol or drug use, PREA incidents or other behaviors that pose a risk to public safety. Such reports are in addition to any notifications required by the *Colorado Community Corrections Standards* or by contract.
- b. The provider shall create a written progress report for all clients each month for the referral source regarding the client's behavior and progress toward therapeutic goals and objectives. The progress report shall be based on the ongoing clinical assessment, participation in treatment, and progress toward goals. These reports shall be shared with referral agencies by fax, mail or electronically upon request by the referring agency.

SECTION 10: PROGRAM QUALITY ASSURANCE

Principle: Measure relevant processes and practices

Practices:

1. Statistical Summaries: The provider shall use the DCJ Community Corrections Information Billing System to report data regarding offenders served by the TC. Statistical summaries maintained by the provider should include sources of referrals, services delivered, length of placement, reason for terminations and similar descriptive information.
2. Quality Assurance: The program shall use structured methods to assure quality in treatment and supervision services. This shall include annual reviews and coaching sessions with all employees; quality checks (per OBH standard 21.330.71 for fidelity to the model of manualized curricula to occur at a minimum of every six months, and monitoring of individual sessions at a minimum of every six months for all counselors/clinical staff); and internal auditing of program operations consistent with sections 3-180 and 3-190 of the CCCS.

SECTION 11: POSITIVE/NEGATIVE REINFORCEMENT

(a) Principle: Increase positive reinforcement

The therapeutic process within a TC is meant to encourage the individual client to challenge their own negative thinking, and the community clients, towards identifying and supporting more prosocial beliefs, attitudes and behaviors in support of a recovery oriented lifestyle. Behavioral norms within a TC are reinforced with specific contingencies directed toward developing self-control and responsibility. Clients understand that they are capable of earning privileges/rewards which are rewards for good behavior, attitude, and maturity. Rewards may include: passes to leave the house, job advancements, and participation in a variety of community give back opportunities, recreational events and special outings, ability to sleep in a little later, etc. Negative consequences, which can also be described as natural consequences for program violations or non-responsiveness to treatment interventions, may include but are not limited to loss of privileges, sanctions, loss of free time, and demotion in status (e.g., regression back to a previous phase or demotion in a job).

SECTION 12: CLINICAL GROUPS

In addition to the weekly individual therapy sessions described above, below we list all the clinical groups that may be combined to count towards the weekly five clinical contact hours.

Strategies for Self-Improvement and Change (SSIC) specifically designed for offender populations and is used at Haven and Peer I. SSIC addresses past involvement in criminal conduct and in alcohol or other drugs that have led to harmful outcomes. It provides cognitive-behavioral skills for change leading to personal fulfillment and responsible living. Phase I only is taught in residential treatment. Phase II and III are taught in our outpatient therapeutic community (non-residential). Phase I builds skills and knowledge for:

- 1) building trust in the provider, the program and peers in the program;
 - 2) learning how thoughts, feelings and actions are related;
 - 3) learning about alcohol and other drugs and participants' own histories and patterns of alcohol or drug use;
 - 4) learning about antisocial and criminal behavior;
 - 5) being aware of self, alcohol or drug use and criminal conduct with respect to thinking, feelings, and actions, and to make a commitment to long-term change in these areas;
 - 6) understanding pathways to relapse and recidivism and to relapse and recidivism prevention;
- and

- 7) building a plan for building on participants' strengths and changing specific areas of their lives.

SSIC is provided over the course of at least 20 sessions. Clients are grouped with their peers who reside in their respective houses during training in SSIC, enabling them to build supportive relationships in classes and be more readily available to support each other for managing trauma symptoms outside of class. Using a manual, a CAC II or higher or Master's level trained clinician facilitates SSIC and no more than 12 clients participate in each group in accordance with *Behavioral Health Rules*. Each client shall participate in SSIC during their residential treatment at some point during their stay. Each client in group will have a group note placed into their electronic record which describes session content as well as individual participation and progress toward goals.

Anger Management: Peer I runs an Anger Management Course for all its clients based on SAMHSA's workbook, *Anger Management for Substance Abuse and Mental Health Clients' (2010)*. It is a ten-week course. Topics are: a) Overview of anger management, b) events and cues, c) anger control plans, d) the aggression cycle, e) cognitive restructuring, f) assertiveness and the conflict resolution model, g) anger and the family, h) closing and graduation. Participant worksheets, group discussion, role play and dry erase board are teaching tools used by the CAC II or higher or Master's level facilitator for this course. Each class is one-hour long and meets one time per week providing ten hours total cognitive behavioral therapy for anger management.

Relapse Prevention: Haven and Peer I utilizes the following relapse prevention/Matrix model curriculum: *Ling, W., McCann, J.J., Obert, J.L., & Rawson, R.A. (2005). Relapse Prevention Group Handouts. Center City, MN: Hazelden.* Relapse Prevention at the Haven and Peer I is provided to assist clients in preparing to enter the community and gain relapse prevention skills. Goals of the group include identifying triggers for use and creating individualized plans. Session content includes, but is not limited to, the following topics: making new friends, repairing relationships, and recognizing stress and acceptance. The group is facilitated by a CAC II or higher or Master's level clinician per week for 16 weeks.

Family Groups: Within a TC, family group sessions are psychoeducational in nature and help family clients of the clients better understand the program and etiology of addiction; see the positive progress of their loved ones; and learn triggers for their family clients and how to support their loved ones in a healthy way.

- a. At Peer I, a CAC II or higher or Master's level clinician within the TC facilitates sessions weekly with 8-12 families within a group setting, and each session lasts approximately two hours. There are typically 5-7 total sessions. One of the facilitators who participates in this group writes the notes (DAPS) regarding the group and group process. For a family member to be able to participate in family group at Peer I, the client must be in the program for at least three months.
- b. At the Haven, a CAC II or higher or Master's level clinician provides family group over the course of 14 sessions. Haven's Family Group utilizes an adaptation from the Matrix Model/Circles of Support Group. Additional support materials have been added to include interactive process and discussion of videos regarding drug and alcohol use. Group notes are documented in group format and entered into each individual's electronic record. For a family member to participate in family group at the Haven, the client must be in Phase II in treatment.

Process Groups: Process groups are facilitated by a CAC II or higher or Master's level clinician and no more than 12 clients participate to count toward clinical contact hours. These groups assist clients in

identifying skills needed to sustain recovery and assist them with coping mechanisms. Groups also help clients' process individual issues and identify steps to take to reach their individual treatment goals. Process groups include, but are not limited to, feelings encounters which are conducted at the Haven and provide more sensitive support for clients dealing with significant issues such as grief and loss or trauma-specific issues. Additionally, clients participate in 1-2 hour long seminars, which are didactic in nature by helping clients learn a particular concept that relates to their recovery like: Principles Over Personalities, Behaviors versus Issues, Acting as If⁹, Criminal Mask, Here and Now, The Baby¹⁰. If the seminars are conducted by a CAC II or higher, or Master's level clinician and have no more than 12 participants they may be counted as a clinical process group as they directly relate to maintaining sobriety and reducing criminal behaviors. In addition, a peer feedback group is a process group. This group is held at both Peer I and the Haven and addresses negative attitudes and behaviors that keep clients from sustained recovery. It also provides an opportunity for clients to deal with salient therapeutic issues. These groups are a highly structured form of group therapy, lasting 1-2 hours, where clients are expected to actively participate in providing feedback to one another. Within TCs, there is an average of three peer feedback groups per week with no more than 12 clients participating in each group. Process groups are documented by the clinician in the client's electronic record.

Parenting Groups: The Haven utilizes the well-researched weekly parenting education curriculum called Incredible Years®. During Parent Lab, facilitators help parents learn how to help their babies and toddlers feel loved, safe, and secure. The curriculum focuses on assisting parents in encouraging their child's physical and language development, social and emotional development, establishing clear and predictable routines, handling separations and positive discipline to manage difficult toddler behaviors. Facilitators use supervised parent-child activities during infant and parent interaction to focus the parent on the child's needs and emotional communications with the infant. Parenting groups may re-occur for clients based on the age of their infant. As much as possible, each group focuses on specific development of the growing child. Courses are often followed by process groups to discuss practicing of skills learned and to facilitate shared learning.

Dialectical Behavioral Therapy (DBT): DBT is an evidence-based practice with research supporting a reduction in clinical symptoms and concerns for a variety of disorders and has shown efficacy in the treatment of mood disorders, anxiety disorders, substance use disorders, and eating disorders. DBT is a therapy designed to help people change patterns of behavior that are not helpful, such as self-harm, suicidal thinking, and substance abuse. This approach works towards helping people increase their emotional and cognitive regulation by learning about the triggers that lead to reactive states and helping to assess which coping skills to apply in the sequence of events, thoughts, feelings, and behaviors to help avoid undesired reactions. At The Haven and Peer I, DBT is provided in a group setting and is conducted weekly with each group session being 90 minutes in duration. DBT shall be facilitated by a trained clinician. If DBT is held in addition to the five clinical contact hours and facilitated by a Master level clinician or above it may be billed to the CTF fund.

Trauma-Informed Curricula: The Haven utilizes various trauma-informed curricula interchangeably and depending on client needs, phase, and staff availability. Peer I uses one trauma-informed curriculum – Seeking Safety. All sessions are conducted by a CAC II or higher or Master's level clinician. No more than 12 clients will participate in each group in accordance with OBH standards. Examples of trauma-informed curricula used include:

⁹ Refers to the idea that you are act like the person you are trying to become.

¹⁰ The baby is the emotional child in all of us; the baby avoids taking responsibility, is immature, sneaky and can be devious, passive aggressive, hostile and irrational.

- a. Healing Trauma: *Stephanie S. Covington, Ph.D., and Eileen M. Russo, MA (2011). Healing Trauma: Strategies for Abused Women. Hazelden.* This curriculum offers short term intervention to help women at the Haven with trauma. Sessions do not focus on the event of trauma but provide basic coping and grounding skills to women and sessions have been adapted to discuss how the TC tools can assist women with their coping skills. These groups are typically held for clients in the Orientation Phase at the Haven programs, but may occur in other phases due to client census or need.
- b. Seeking Safety: Seeking Safety is, as per the description in NREPP, a highly flexible intervention implemented at the Haven and Peer I that addresses the needs of clients with SUDs and trauma; it has been implemented in both residential and outpatient settings with women and can be integrated into both group and individual counseling (Najavits et al., 1998). Seeking Safety focuses on coping skills and psycho education and is grounded in five key principles: (1) safety as the overarching goal (helping clients attain safety in their relationships, thinking, behavior, and emotions); (2) integrated treatment working on both posttraumatic stress disorder (PTSD) and substance abuse concurrently; (3) a focus on ideals to counteract the loss of ideals in both PTSD and substance abuse; (4) four content areas: cognitive, behavioral, interpersonal, and case management; and (5) attention to clinician processes (helping clinicians work on counter transference, self-care, and other issues). Seeking Safety is held at a minimum of one time per week for 12 sessions for 90 minutes per session all scheduled in advance. Clients are grouped with their peers who reside in their respective houses during training in Seeking Safety, enabling them to build supportive relationships in classes and be more readily available to support each other for managing trauma symptoms outside of class. Each client participates in Seeking Safety during their treatment at some point during their stay. Each session has a sign in sheet, signed by each client and then each client has a clinical note in their electronic record including key topics discussed in the group.
- c. Journey beyond Abuse: The Haven uses the following curriculum: *Fischer, K. L, and McGrane, M.F. (1997). Journey Beyond Abuse. Saint Paul, MN: Amherst H. Wilder Foundation.* This curriculum was designed for women who are survivors of “violence by their male partners”; however, based on history and need clients may be provided this curriculum (typically in phase II of treatment) as a way to assist them in identifying unhealthy relationship patterns and to notice red-flags in relationships. Clients are able to process previous relationships and what is important to them in new, positive relationships that will also help support their recovery. The curriculum is based on teamwork, relationship building, and a philosophy that emphasizes empowerment and support. When offered, these groups take place over 21 sessions.

SECTION 13: STRUCTURE/MANAGEMENT OF THE TC

Staff oversee all clinical aspects of the program as well as the completion and monitoring of all oversight agency standards. Peer I and Haven utilize at minimum a CAC III level management staff: House Manager (Peer I) and Program Coordinator (Haven) to oversee daily operations. These positions supervise all clinical staff within each facility and monitors all aspects of the client government team.

1. Senior Client Government Team:

- a. The client government is comprised of senior clients of the TC who are in the later stages of their recovery and act as role models to their peers. The client government assists staff in making sure the houses run effectively in a healthy way and that the program rules are followed. The client government is closely monitored by staff and provides an essential function by providing feedback and support to their peers. Descriptions of these government positions are located in the house Program Manuals.
- b. At Peer I, client government positions include:
- Senior Peer Captain: This is the highest level of the client government team with no independent authority. The Senior Peer Captain acts as a liaison between staff and government positions and helps to assure clients are on time to scheduled groups and house needs are met. The Senior Peer Captain also assists staff with supporting peers during their behavioral assignments.
 - Peer Captain: Peer Captains assist the Senior Peer Captain in supporting clients to follow their schedule and complete their learning assignments. The Peer Captain also helps with out-of-house support for clients.
 - Peer Master: The Peer Master works with the Peer Commander (see bullet below), and with staff direction, delegates to senior Peer Captains, assists with orientation clients, maintains the daily schedule, and works with the other senior staff to write learning assignments.
 - Peer Commander: The Peer Commander informs staff of any basic needs and issues within the TC. Occasionally, the Peer Commander may provide feedback to clients regarding behaviors and attitudes.
- c. At the Haven, senior client government positions include:
- Family Manager: The Family Manager acts as a liaison between staff and government positions and helps to assure clients are on time to scheduled groups and house needs are met. The Family Manager also supports peers during their behavioral assignment and assures that her peers are completing their respective job areas. The Family Manager has no independent authority and must report to staff any issues or concerns.
 - Family Coordinator: The Family Coordinator serves as the assistant to the family manager. The Family Coordinator manages the senior sisters (see bullet below) and acts on the family manager's behalf when she is out of the house. The Family Coordinator recommends schedules for in house jobs/chores before taking them to staff for final approval.
 - Senior Sister: The Senior Sister assists other clients in identifying their behaviors and is charged with providing peer feedback when appropriate. The Senior Sister immediately notifies staff and family manager of concerns about client behaviors.
 - Government Secretary: The Government Secretary keeps copies stocked of all client forms and blank documents (blank forms, packets for phases, etc.). The Government

Secretary also assists staff in tracking the completion of client tasks (e.g., behavioral assignments) in a timely fashion.

- Orientation Head: The Orientation Head assures there is peer support to assist clients who are in the orientation phase of the program. The Orientation Head also provides peer support to orientation clients to help mentor clients on the rules and tools of the program.
- Kitchen Head: The Kitchen Head assists in inventorying food and putting away kitchen supplies. The Kitchen Head also receives training in ordering and how to develop kitchen shift schedules so that kitchen duties are covered by all clients.
- Industrial Therapy (IT) Head: The IT Head is responsible for monitoring the cleanliness of the house, assisting in tracking chores, and assisting with inventorying cleaning supplies.
- Communications Quarters Head: The Communications Quarter Head is responsible for assisting staff in ensuring there is appropriate coverage for the front desk to answer incoming calls and direct them appropriately to staff. This position helps to train clients in soft job skills related to phone skills, communication, and message taking. This client position also assists in providing peer support to clients in making appropriate phase phone calls home to their family clients or children.

SECTION 14: SOCIAL LEARNING AND BEHAVIORAL MODIFICATION TOOLS

Therapeutic Jobs: Within the TCs, clients are assigned therapeutic jobs to facilitate behavioral change, responsibility and personal growth. Per *Community Correction standard 5-160*, the assignment of work duties cannot improve the value of the facility or provide personal benefit to any staff or agent, and may not include chores such as plumbing, electrical and general construction.

Jobs/Work assignments are viewed as an opportunity for clients to build life skills, a positive work ethic, and accountability. In addition these assignments assists clients in soft skills needed for employment. Job assignments also serve to help change personal behavior, promote positive interpersonal relationships, create a sense of community, and promote right living. These opportunities allow clients to practice skills as well as handle responsibility and pressure prior to entering the workforce. Examples of jobs can include but are not limited to the following:

- Kitchen Duties
- Yard Duties
- Administrative Services (i.e.: phone, mail)
- Client Government (See above)

All clients are expected to participate in “industrial therapy” or chores on a regular basis to keep the houses neat and clean and as a way to maintain a clean, family-like atmosphere. Jobs assigned are a reflection of performance and investment. Newer clients are assigned to job functions which consist

of less complicated tasks. Whereas, more senior clients hold government positions in which they mentor peers and assure the work of the house gets done. Staff shall choose the right job functions for clients based on their clinical needs, strengths and deficiencies, and based on what may benefit their recovery the most. For example, if a certain client is shy and unassertive he/she may be assigned a job where they must learn to speak up to other community clients in a supportive environment. There are also ongoing educational sessions throughout the client's stay in which he/she learns from another client on how to perform a specific job, the relevance of the job to his/her recovery, and has an opportunity to practice performing the job.

2. **Immediate Feedback:** The TC offers a variety of tools to modify and facilitate changes in clients' behaviors over a period of months. A principal behavior modification technique is applying constant feedback to clients. Feedback helps the person become aware of certain aspects of his/her behavior and how that behavior affects others. By applying feedback on a daily basis, internalization of alternative behaviors appears to be enhanced. The following are a group of commonly used therapeutic tools to provide immediate feedback to clients. Each tool has a clinical purpose and every client receives or uses a tool at some point during their stay.

- A **“pull up”** is an immediate, behavior related, one sentence long verbal reprimand delivered in a neutral non-judgmental way by a fellow client or staff client used to make a person or a group aware of an inappropriate behavior, attitude or decision. The client must respond with a simple acknowledgement of the mistake/issue (“Okay”) to promote self-discipline and self-control. Clients document the pull ups they receive in their notebooks. Not only does the “pull up” make clients verbally aware, the more they visually see the incorrect behaviors in the notebook, the more likely they will become aware of, and change them.
- A **“trim”**, as compared to a “pull up” has a higher intensity. It is a spontaneous, on the spot form of feedback, delivered in a strong and clear voice by a fellow client or staff client. “Trims” are concise, and intended to impress the client immediately of the importance of the information or behavior. Trims take place in the milieu in the presence of other TC clients.
- In contrast to a trim or pull up, clients and staff may also acknowledge a client of a job well done, which is called a **“stroke”**. Given by a fellow client or a staff person, a stroke is earned by showing positive growth, initiative, role modeling, and positive attitude, improved parenting skills and/or investment in the program. Positive reinforcement is a critical part to the TC, as it rewards clients for good behaviors and is important for clients to gain increased self-esteem and self-efficacy.

Individuals with severe substance use disorders have rarely been forced to deal with the consequences of their mistakes, other than incarceration. In a TC, clients are expected to be honest with themselves and with other clients, taking responsibility for their behaviors, rather than blaming others. The TC uses the tools described below to facilitate behavioral change and self-reflection.

- **Weekly “haircut”¹¹** is a verbal reprimand delivered by staff (along with client government clients) in which the client remains silent while others describe the inappropriate behaviors that have occurred over the past week (such as using treatment tools inappropriately, gossiping, breaking rules, being negative, etc.) or issues that have surfaced. As part of the “haircut”, a client is assigned a learning assignment that provides specific feedback on what

¹¹ The term “haircut” is an historical reference to the 1960’s when “hippies” wore long hair, which when they entered TC treatment, was cut short, and used a form of verbal feedback.

changes need to occur to support healthy changes and eliminate negative behaviors. This verbal technique gives an individual an opportunity to examine their negative behavior and develop pro-social skills.

- In a “**mass haircut**”, several staff and multiple TC clients provide feedback to the client in question to address major program infractions (i.e., threatening behavior, stealing, and relapse). A mass haircut is a higher level of structured feedback within the TC and often results in a loss of status or position in the program.
- “**Work outs**” are a TC tool for clients to resolve a personal issue they are having with another client or staff client, thus improving communication and problem-solving skills. “Work outs” involve *two* people who need to resolve conflict and is mediated by a third person. The mediator assists by providing a summary of each person’s position on the issue at hand so that each client can see how their points are being expressed.

Many clients of the TC are former offenders, coming from a prison system. Within prison anyone telling on another convict is referred to as a “snitch”, and depending on what is shared, can result in physical assaults or even murder. In a TC, however, it is extremely important that clients talk about their peer’s behaviors.

- The TC approaches this by teaching clients that “I am your brother’s/sister’s keeper”, meaning that all clients are responsible for helping each other and themselves get better. Thus, a client may “**pull covers**” by going directly to a staff client to share another client’s behavioral issue or secret (such as a desire to leave the facility) because they have care and concern for their “brother/sister”. Clients will be asked by staff to document the secret or major behavioral issue in a written format. The “pulling covers” concept is very difficult to teach an offender population; however, it is essential that clients learn this concept so that they can learn to hold each other accountable and ultimately achieve and maintain their recovery.
- Clients with substance use disorders may be impulsive, therefore; in recovery it is essential that they have space to think before they react. Should a client need help with controlling their emotions or temper, a client may be asked to go on “**monad**”, which is a way for a client to stay silent, think about his/her actions, and reflect and process emotions in a healthy way. A monad helps de-escalate potentially volatile situations common among an offender population. Clients may also place themselves on monad as a tool to process their emotions or to reflect upon events of the day. Each house maintains a monad Log, and monad will not occur for longer than 15 minute increments

Within a TC, staff assigns therapeutic learning experiences/therapeutic benefits to address negative behaviors that are associated with a client’s substance use disorder, criminogenic needs, and individual issues. These assignments allow clients to learn from their mistakes and build personal strength and support self-discipline. The learning experiences/therapeutic benefits also communicate to clients in the TC milieu about behaviors and attitudes each client is working on, serving as a community mirror through which each individual's self-awareness is raised as the community gives continuous feedback.

- A staff or TC client of the government team (with staff approval) can assign a “**written paper**” on a relevant topic to a client who has been having issues surfaced by their fellow peers. The client is responsible for turning the completed paper into the government within a seven-day time period, who evaluate it and submit to staff. Papers are assigned based on

specific issues and vary in length from one to eight pages. Longer papers are associated with more severe issues. Clients are given a copy of their assignment, and a copy of the assignment is placed in their record.

- In addition, clients may be assigned to wear an **“issue card” (IC)**. An IC is a handwritten sign a client carries with them stating the specific issue or behavior they are working to address after they receive feedback for a rule infraction. This activity reminds the client of their behavior and teaches them responsibility and self-discipline.
 - Other learning experiences/therapeutic benefits include a **“verbal door”** or **“verbal room”**. Verbal door is a verbal statement describing an issue or behavior a client is working on that is made every time he/she enters a doorway. Whereas, a “verbal room” is a similar statement made every time a client enters a room. These experiences allow the client to (1) acknowledge a problem or issue and (2) communicate to the TC community what goals he/she is working on so they can support the client in changing the behavior and holding him/her accountable for meeting their goals.
 - Lastly, learning experiences/therapeutic benefits can include: (1) **“monad”** described above, (2) talking with other peers (**“dyads”** and **“triads”**) or (3) performing a certain **“job”** or **“task”** in the community to address an issue. For example, if a client is isolating themselves, they may be assigned a task to increase their visibility and interaction with others.
3. **TC Group Activities:** In the TC, there are many forms of therapeutic group activities. Groups are facilitated by staff to assist clients to effectively resolve problems, see themselves as others see them, stop blaming others for their negative behaviors, and address sensitive issues without the need for drugs, violence or other criminogenic behaviors. Some of these group activities involve directly addressing/confronting behaviors. Staff ensures that all group activities, including those confrontational in nature, are healthy and productive and promote open and honest communication among TC clients. Process groups that can be counted toward the five clinical contact hours are described in detail above in the Section: *Clinical Groups*.
- In addition to “work outs” described above, clients can **“drop a slip”** throughout the day in which one client specifically requests that another client attend a group session where he/she can interact with this client to deal with a particular concern. Any staff can facilitate this group session and support both clients in expressing their feelings appropriately, and guiding the discussion toward an amicable resolution. Clients can also “drop a slip” asking to speak to a counselor individually or to speak to the mental health team, outside of their regularly scheduled appointments.
 - As part of a treatment commitment¹², clients are required to develop an **“original encounter”** to be presented to a group of their peers. This encounter group must be unique to the individual’s life, and assist other peers in becoming attuned to specific needs/issues of the client, or must contain information that will be helpful to a client’s recovery. Examples include encounter groups on cultural and ethnic traditions, family traditions, and recreational or fun encounters which can assist clients in pro-social drug free activities. These encounters must be approved by staff and are often related to a specific treatment plan goal that a client is working on.

¹² When a client completes the orientation phase, they are welcomed into the program and are given “treatment commitments” that must be completed.

- **“Marathons”** are an intense form of group therapy that last an extended period, 24 to 48 hours, and use multiple types of therapy groups (process groups, encounter groups, treatment concepts and lectures, etc.). Clients are addressed on attitudes and behaviors they are *very* resistant to changing. The long period of time serves to erode the client’s defensive behaviors and attitudes that are common among the offender, anti-social population. These groups also incorporate fun encounters to help to bond the clients and create a supportive environment.
- **“Triads”**, consisting of three clients, provide a smaller group feedback process in which an individual client receives feedback from their peers. The client who is receiving this feedback then responds using his/her thoughts and feelings. “Triads” encourage interpersonal skill building, self-control and self-awareness.

SECTION 15: COMMUNITY GIVE BACK AND RECREATIONAL ACTIVITIES

1. **Community Give Back:** Throughout the course of the year, clients have the opportunity to participate in a variety of community give back activities which allow clients to share what they have learned with the community. The number of community events vary each year, and the type of give back activity that a client participates in is dependent on his clinical needs. Examples of community-give back events include: presentations on addiction and recovery to local schools, assisting with community projects (nursing homes, holiday feed the homeless events), and participation in AIDS Walks. Typically, more senior clients farther along in their treatment with privileges to get out of the house participate in the community give back events. Staff shall accompany clients to these events. Some activities are seasonal, and others are based on opportunities and donations.
2. **Recreational Activities:** The TC has a partnership with National Association for the Sports and Disabled which provide opportunities for clients to participate in hiking, mountain biking, skiing, and snowboarding activities over the summer and winter seasons. Clients can also attend the Colorado Rockies or Denver Nuggets games and other cultural events. All of these external activities must be earned as rewards for clients. Staff accompany clients to these events.

SECTION 16: GROUP MEETINGS

Group meetings within the TC are designed to encourage each client’s involvement by giving speeches, asking questions, making comments and announcements and to support clients in building relationships with their peers and to demonstrate investment in the program. Group meetings can be facilitated by non-certified (i.e., people in recovery) or credentialed staff. Below we describe the types of group meetings that occur within the TC:

- **Government meals:** Client government meet with staff to discuss the current issues they see with clients, staff or the facility overall. These meetings can occur during mealtime and help to create plans for client participation and support. These meetings last at least 30 minutes.
- **Morning meetings:** At morning meetings, clients within the TC meet together to review overall progress, sharing what they are working on to make the community aware of what support they may need. Clients also participate in “slip games”, or short skits as a way to learn how to reduce social inhibitions, laugh and have fun. Morning meetings occur daily Monday through Friday, are facilitated by a program staff person and last an hour.

- Phase meetings: Phase meetings are scheduled in advance and are held weekly to discuss a client's progress or issues they may be having in their program phase. All phase meetings are facilitated by a program staff person and include clients/clients who are involved in that particular phase. For example, the later phase meetings include senior TC clients who are in the re-entry phase and are looking for work or outside vocational opportunities and need help dealing with relapse triggers and temptations.
- Family or house meetings: Family or house meetings are held periodically on an as needed basis involving all the clients, with program staff facilitating and participating in order to address any problems specific individuals are having or to explore issues within the house as a whole. It can also be a venue to provide updates to clients. These meetings can last between 1 and 2 hours.

SECTION 17: DISCHARGE

Principle: Engage ongoing support in natural communities

- A) Discharge Criteria: Criteria for discharge occurs when clients complete all phase commitments, complete their individualized service plan goals, are employed, maintain negative drug and alcohol screens, obtain housing, and are self-sufficient. Clients must also be compliant with all of their legal obligations and paying toward restitution and fines.
- B) Discharge Planning: All clients who successfully complete the program are transferred to the Outpatient Therapeutic Community followed by the residential phase for continuing care services in an outpatient setting. Client education regarding the need for aftercare services shall be addressed in the residential treatment component as the client progresses towards treatment goals. Discharge planning shall be conducted consistently with section 20.219.54 of the *Behavioral Health Rules*.
- C) Support Services: Support services for continuing care should be developed consistently with section 20.219.6 of the *Behavioral Health Rules*.
- D) Discharge Summary: The provider shall create a discharge summary (for both successful and unsuccessful terminations) that includes a review of the supervision plan, individual treatment plan, objectives, progress, and problems demonstrated by the client. The summary shall also describe the reason for termination and recommendations for continued supervision and treatment. This discharge summary is passed on to the Outpatient Therapeutic Community staff to use to inform the outpatient Individualized Treatment Plan. The TC shall provide housing assistance as part of the discharge process.

SECTION 18: OUTPATIENT THERAPUETIC COMMUNITY

The Outpatient Therapeutic Community (OTC) is a continuing care model for men from Peer I and women from the Haven who progress from the residential treatment program to a non-residential status. The program has four levels which coincide with the DCJ levels of care. These levels are Phase A (Intensive), Phase B (Regular), Graduate (Minimum) and Post Graduate (Maintenance). Transitional housing is provided for the majority of men at Gratitude House, which is a sober living

environment on the Fort Logan campus. The transitioning Haven clients have access to transitional housing in an apartment community a few miles away from Fort Logan or through a transitional living house also located on the Ft. Logan campus for women only and their infant or toddler children; both of these facilities provide a “community living environment” and lower the cost of housing to help with their transition into the community and continuing the philosophy of the TC. There is no treatment provided in the transitional housing units.

Clients remain in Phase A and Transitional housing for approximately 3-5 months and attend group three times weekly at the OTC facility. Phase B is typically another 3-5 months, requires moving into their own residence, either alone or with a roommate(s), attending group twice per week and meeting the other conditions of the program. Each client is given a set of behavioral and written assignments, two community “give back” assignments and must complete elements of their treatment plan in each of these 2 phases, prior to earning Graduation which occurs twice a year. Once they have graduated the program they progress into Graduate phase, which is typically a six month stay, requires weekly group attendance and some additional assignments. OTC requires clients complete an application, and staff evaluates their progress prior to moving into the final phase of the program, Post Graduate, as we have found that as in all other levels of the TC, “status is more appreciated when it is earned” and not based primarily on time. The Post Graduate phase lasts until the client completes their legal sentence and typically requires no group attendance except those as deemed necessary to fulfill their treatment needs which is assessed with their counselor monthly. Clients who fulfill their legal obligations during the course of the residential or outpatient treatment phase can voluntarily decide to continue involvement in treatment to earn graduation.

The specific client services are determined by the results of their ASI, SOA-R, and any other assessments conducted at intake, recommendations provided from the residential staff, observations and assessment of the OTC staff, as well as, interactions with the specific client and their identified goals. As stated earlier, the amount and frequency of urine, breathalyzer, case management/counseling sessions, home visits, and phone calls are determined by the standards required by DCJ, Department of Corrections and OBH and our evaluation of a client’s needs. The need for other specific services, such as mental health, family/marriage, physical health, education, employment, etc. are evaluated by the previous assessment tools and ongoing dialogue with the specific client. During the individual meetings with clients, the counselor reviews the urinalysis and breathalyzer results; progress toward or changes in treatment goals; compliance with legal requirements, such as restitution payments; and compliance with program stipulations. The staff complete monthly “progress reviews” as required by DCJ and six month reviews of service plans as required by the Office of Behavioral Health and all services including unscheduled services (such as medical, police contact, missing a drug test/group, etc.) are documented in their electronic record.

Group Therapy/Clinical Services

Groups at the OTC are offered in both the morning and the evening to accommodate clients’ work schedules. In most cases, groups are “gender specific” unless modified to meet a specific need and are facilitated by a CAC II or higher or Master’s level clinician. The types of groups are described below:

- **Orientation:** This is a one-time 90-minute group facilitated two times monthly by Phase B and Post Graduate clients to “orient” new clients to the program. The new clients receive a written packet with definitions of program terms, commitments which they will be working on in the orientation phase of the program, and copies of the program rules. They are provided with a copy of the typical Phase A commitments with guidelines on how and when these need to be completed. It is primarily a didactic format that allows time throughout for questions and comments. There is typically a portion of time

at the end of this group that a staff client will be present to answer any questions that the peers cannot answer.

- Strategies for Self Improvement and Change (SSIC)-Phase II and Phase III: This is the same curriculum identified in the Residential Scope of Work above and the last two phases of the curriculum are done in the outpatient setting. The group utilizes a gender specific format. Each group is facilitated by a CAC II or above who has completed a three day course or longer on the curriculum. Phase II is 22 Sessions, 90 minutes each session, taught two times per week. Three modules in this phase focus on the following: (1) Mental Self-Control: Managing Thoughts and Emotions, (2) Social and Relationship Skills Building, and (3) Skills for Social and Community Responsibility. Phase III is eight Sessions, 90 minutes each, taught once per week. The two modules in the phase focus on the following: (1) Relapse and Recidivism Prevention: Strategies for a Balanced Lifestyle, and (2) Strengthening Ownership of Change: Skills for a Healthy Lifestyle.
- Dialectical Behavior Therapy (DBT): This is the same curriculum described in the Residential Scope. DBT is supported by an OTC staff client credentialed to facilitate treatment and clinical interns who complete approximately 15 hours of training and supervised by licensed clinical staff in the provision of DBT for a ten week period in the DBT model prior to providing the groups at OTC. This has been provided in two different formats: one is a “skills building format”, educating the clients on the DBT skills and potential applications and the other is a “Graduate” group for those who have completed the skills building class at OTC or in residential. The groups are all facilitated weekly by a CAC II or higher or Master’s level clinician for 8-10 weeks, 90 minutes each session. This group can be done as a gender specific or mixed gendered format.
- Women’s Group: This group is offered three different days weekly to accommodate the schedules of the clients and to ensure that the group size does not exceed 12 people. One of OTC’s female counselors with a CAC II or above facilitates this process group which covers a variety of topics based on facilitator choice and client need. It is done weekly for 90 minutes, and female clients attend this group while in Phase A and Phase B, or approximately 6-8 months. The group addresses relationship concerns, birth control, stress, financial challenges, outside support, parenting issues, employment, interpersonal skills, behavioral concerns, and any other life issue that may surface in the daily experiences of our clients.
- Men’s Group: This group is offered two different days weekly to accommodate the schedules of the clients and to ensure that the group size does not exceed 12 people. The group is facilitated by a CAC II or above or a Master’s level clinician. Similar to the Women’s Group, the Men’s Group is both process and educational and covers a variety of topics based on facilitator choice and client need. It is done weekly for 90 minutes, and male clients attend this group while in Phase A and Phase B, or approximately 6-8 months. The group addresses relationship concerns, stress, financial challenges, outside support, parenting issues, employment, interpersonal skills, behavioral concerns, and any other life issue that may surface in the daily experiences of our clients.
- Relapse Prevention: OTC uses the following two curriculums for its relapse prevention program: *Counselor’s Manual for Relapse Prevention with Chemically Dependent Criminal Offenders-TAP19 Substance Abuse and Mental Health Services Administration* and *Williams R. Relapse Prevention Workbook for African Americans: Hope and Healing for the Black Substance Abuser*. Relapse Prevention is a 90 minute group held twice weekly for men and women in the mornings to accommodate those that work in the evenings. It is facilitated by a CAC II or higher or Master’s level clinician and typically lasts 8-12 weeks depending on the client.

- Peer Feedback Group: These groups are offered four times weekly for men and twice weekly for women. They are typically 90 minutes in duration and are mostly facilitated by a CAC II or higher or Master's level clinician with no more than 12 in each group. However, at times, these groups are facilitated by a client or a staff client that has not reached this level of certification and therefore do not count towards the five clinical contact hours at OTC.
 - Therapeutic Community Group: Facilitated by a CAC II or higher or Master's level clinician, the TC Support group is for graduates of the Department of Corrections TC that transition from Peer I. This is a 90-minute weekly group that all TC graduates are required to attend until they graduate from the program. This group's intent is to maintain the relationships and support that the group clients have developed through their TC experience both "inside and outside" of prison. The group focuses on adjustment issues from prison including life skills, relationships, overcoming institutionalization, socialization, boundary setting, and a variety of other issues that occur with people that have experienced long term or lengthy incarceration.
 - Graduate Group: This is a weekly group held for all new graduates of the program, held for the 6 months immediately after their graduation, lasts for 90 minutes, and is facilitated by a CAC II or higher or Master's level clinician. The purpose of this group is to help clients understand that graduation is not the end of recovery, serving as a source of support for the graduates and helping to further develop their plan for long term recovery.
 - Family Orientation: This is a group that is required for clients prior to graduation and requires their attendance as well as attendance of "family clients/friends" to educate them on the rules, policies, purpose and intent of OTC. The group is 90 minutes and can be facilitated by any program staff client, and often involves a senior client that offers testimony of his experience in the program.
 - Panel Interview: This panel interview process is done twice monthly and is co-facilitated by Phase B and Post Graduate clients. The intent of this process is to screen potential OTC clients for any concerning behaviors or thinking, do an initial education of the program, and continue with the "philosophy of the TC" by utilizing peers in this process. The clients complete a questionnaire and subsequently are interviewed by 2-3 panel clients about their plans for ongoing treatment/recovery.
 - Clean Day Celebration-Progressions-Monthly Acknowledgements: This is a group held monthly, typically lasting 90 minutes but can be longer. During this group, OTC provides a meal and acknowledges those clients who have fulfilled annual clean day anniversaries, progressed to Phase B, or have provided exceptional service to Peer I, The Haven or another organization in the general community with a certificate for their service.
- Life Skills: OTC conducts a weekly 90-minute group on Stress Management and Time Management on a quarterly basis. Participants include clients referred by their primary counselor as a result of the counselor's assessment or the client's request for assistance in these areas. These groups are facilitated by an OTC staff client. The curriculum utilized for the Stress and Time Management is taken from *Life Management*, a curriculum offered through the Change Company. OTC staff also facilitate a six-week Tobacco Cessation Program.
- Healthy Relationship Curriculum: This is a three-week gender-specific two-hour group (*Within my Reach- WMR, 2005*) facilitated by the Center for Relationship Education. Targeting individuals who may be vulnerable to poverty, this curriculum is designed to improve clients' relationship success and communication with and parenting their children.
