Consistency with Adopted Plans: Blueprint Denver

Urban Edge Context

- Contains elements of the suburban and urban contexts. Small multi-unit residential and commercial areas are typically embedded in 1-unit and 2-unit residential areas. Block patterns are generally regular with a mix of alley access. Buildings are lower scale and generally set back farther from the street.

Consistency with Adopted Plans: Blueprint Denver

Residential Low

- Predominately single- and two-unit uses on smaller lots. Accessory dwelling units and duplexes are appropriate and can be thoughtfully integrated where compatible. Some civic and institutional uses are compatibly integrated throughout and limited mixed-use can occur along arterial and collector streets, as well as where commercial uses have been already established. Vacant institutional uses on corners or select sites may be appropriate locations to introduce additional residential intensity. Medium building coverage. Buildings are generally up to 2.5 stories in height.

Growth Areas Strategy

- All other areas of the city The associated anticipated housing is 20% and employment growth percentage is 10% (p. 51)

Most growth is guided to regional centers, community centers and corridors, select districts and high and medium-high intensity residential areas. Other areas of the city are still expected to see some growth, however more limited.
