**5. General description or background of proposed request. Attach executive summary if more space needed:**

Final design is complete, adding funds for the construction of the drainage and flood control improvements for South Platte River.

Under the original agreement, the City paid \$350,000 to the District for design services for the project. The District committed to contributing \$770,000 for the services, with the maximum project cost authorized under the contract totaling \$1,120,000. Because the original agreement did not result in the payment or receipt by the City of more than \$500,000, it did not require council approval. Under the amendment, the City is committing to spend \$1,950,000 on construction for the project, but will be administering those funds itself. The District is committing an additional amount of \$2,200,000 to the construction. Of that amount, the City will invoice the District for \$1,650,000 for the portion of the construction the City will be administering. Because under the amendment the City will be receiving more than \$500,000 from the district, the amended agreement requires council approval.
