5. General description or background of proposed request. Attach executive summary if more space needed:

This project serves to support the transition from COVID-19 pandemic response to routine operation, incorporating COVID-19 surveillance and investigations into routine local public health agency (LPHA) activities. The project will support disease surveillance, community education, disease control, priority outbreak response, and testing activities for SARS-CoV-2. The project benefits Coloradans by providing transitional funding support to LPHAs who opt in to receiving the funding. The project comprises new contracts that cover activities starting on August 1, 2023, through April 30, 2024. The funding for this effort is provided by the Centers for Disease Control and Prevention (CDC) Epidemiology and Laboratory Capacity (ELC) cooperative agreement titled "Enhancing Detection Through Coronavirus Response and Relief Supplemental Funds"; activities outlined in this statement of work are in line with guidance CDC provided with the funding source, and are subject to federal allowability requirements. These funds may only be utilized for COVID-19 related activities.

Scope of work:

The scope of work includes COVID wastewater sampling work, epidemiology and disease intervention work, and ongoing vaccinations, outreach, and engagement work from our endemic COVID team. In a continued effort to reduce the level of COVID-19 transmission in our communities, the Denver Department of Public Health & Environment is working with partners in the community to conduct a pilot program that will test wastewater for COVID-19. The epidemiology and disease intervention staff will work with the wastewater sampling team to analyze the data and identify trends. They will also continue to address COVID outbreaks in priority settings (schools, jails, congregate settings, etc.). The Endemic COVID team will continue to transition our COVID only related services and resources to a foundational part of a suite of equitable services and resources we offer to the public. This team works closely with the Epidemiologist and Disease Intervention Specialist to follow-up on emergent COVID needs and residents in need of resource and service navigation.
