6. General description of proposed ordinance including contract scope of work if applicable:

This project is to migrate from the current trunked Enhanced Digital Access Communications (EDACS) radio frequency (RF) repeater system to a Project 25 compliant system. The current trunked radio system is a specialized repeater system with one or more towers, and multiple frequencies, which allows channelized, semi-private conversations between many groups of users. The Project 25 radio system will allow Denver International Airport to communicate with the surrounding municipalities on common radio infrastructure.
