5. **General description or background of proposed request:** Five rental car companies operate on the Denver International Airport campus, primarily along rental car row (East 78th Avenue), operating 11 brands under the airport's Rental Car Master Program. The Program exists to serve the needs of travelers arriving at DEN, approximately 11% of which use rental cars to access the Rocky Mountain region. Each company has a Ground Lease with DEN. Most of these companies have operated at the airport since opening day in 1995. DEN's growth over time means the rental car companies need to grow to meet passenger demand.

DEN has created several projects to add additional space to the rental car program and thereby meet the growing traveler need for vehicle inventory. One of those projects is paving the corner of Jackson Gap and 78th to cover a drainage area taking up space in the Hertz leasehold, creating an operational area that was less than optimal. The former Hertz lease line was forced to work around the large drainage ditch, which created unusable areas where Hertz was required to pay ground rent for space the company could not use. On completion of the Jackson Gap project this fall, DEN will be able to straighten Hertz' lease line to allow for more efficient use of space.

This Third Amendment between DEN and Hertz is an administrative action to update the current boundary of Hertz' leased premises and document the lease line with a new space exhibit. The new Hertz lease line contains the same amount of space as before while smoothing out the former jagged angles, which will help Hertz and the operators on the East side of the new lease line operate more efficiently. All terms, provisions and conditions of the existing lease shall remain in effect.
