SCOPE OF WORK

I. Purpose of Agreement

The purpose of this contract is to establish an agreement and Scope of Services between the Department of Public Health and Environment and Center for African American Health (the “Provider”).

The Provider shall provide the identified services for the City under the support and guidance of the Denver Department of Public Health and Environment using best practices and other methods for fostering a sense of collaboration and communication.

Center for African American Health has been awarded the following amounts in Healthy Food for Denver’s Kids funds:

- **\$ 823,850.00** for Term 1 (August 1, 2023 – December 31, 2025)
- **\$411,924.98** for Term 2 (January 1, 2026-December 31, 2027)
- Cumulative Maximum Contract Amount: **\$ 1,235,774.98**

II. Program Services and Descriptions

The Provider will be granted funds to provide the following services:

In alignment with HFDK’s Priority Area 3: Food and Nutrition Education, CAA Health proposes to strengthen and expand our healthy food educational offerings for children, youth and families garden at our community hub on Hudson Street in Northeast Park Hill and continue incorporating educational sessions at this location into our existing programs.

Within our Healthy Families program area, CAA Health runs several culturally relevant programs designed for families with young children to deepen their understanding of child development, parenting skills, resilience, and social connections: the Strengthening Families Program (SFP) and the 24/7 Dad Program. CAA Health has been running SFP since 2018, and typically hosts five cohorts per year, spanning seven weeks each and meeting once per week. The nationally recognized SFP curriculum focuses on building five protective factors, which have been shown to improve health outcomes for young children and their families: 1) parental resilience, 2) social connections, 3) knowledge of parenting and child development, 4) concrete support in times of need, and 5) social and emotional competence of children. CAA Health provides SFP cohorts not only at our Hudson Street building but also at transitional housing programs in partnerships with Catholic Charities and Marisol Homes.

After responding to community requests for programming to support fathers, the 24/7 Dad Program launched in September 2021. 24/7 Dad is an evidence-based Logic Model intervention that draws from multiple behavior-change theories, including Social Learning theory, Theory of Planned Behavior, Transtheoretical Model (aka Stages of Change), and Attachment Theory, and seeks to create “24/7 Dads” who enhance the well-being of their children by being an integral part of their lives physically, emotionally, spiritually, and intellectually 24 hours a day, seven days a week. The program spans 12 weeks and meets

EXHIBIT A AMENDMENT 03

SCOPE OF WORK

twice per week, for a total of four cohorts/year. Both programs are facilitated by a CAA Health CRN specializing in early childhood development and family support. 24/7 Dad cohorts are also offered at Stout Street Foundation, providing support to fathers working towards recovery. By providing additional locations for these classes, we can reach specific communities that are often disconnected from healthy parenting supports and need tools to strengthen their ability to empower themselves and their children to disrupt cycles of poverty and poor health.

CAA Health has also expanded its support for birthing people over the last few years, in recognition of the particularly stark maternal mortality rates among Black women in Colorado and nationwide. Currently, we offer a Birth Squad our Melanated Motherhood Movement programming and also have a CRN focused on supporting mothers and birthing people in accessing culturally relevant resources and support during the perinatal period.

During the first term of this grant CAA Health completed renovations that transformed the organization's ability to provide programming around healthy food education as a SDOH. We created a "teaching kitchen" in our Hudson Street facility, where community members can gather to attend culturally relevant cooking demonstrations and classes with local chefs. This type of interactive, hands-on learning is particularly impactful for children and youth aged birth-5, as it will sparks their curiosity and desire to explore healthy food options. During the summer of 2025 we launch our Flavors of Us – Kids in the Kitchen summer cooking classes, held classes for parents and children as well a baby food classes for parents of infants. Continued funding will allow us to expand this programming. we plan to integrate healthy foods classes into the SFP, 24/7 Dad, and perinatal navigation programs, offer nutrition education experiences to youth as well as host semi-monthly demonstrations open to the broader community. CAA Health currently has a strong partnership with several local African and African American chefs, who we plan to continue working with to lead healthy cooking demonstrations.

We hired a nutritionist to develop specific educational curriculum for our cohort programs, and help CAA Health determine how to follow USDA Dietary Guidelines and/or other culturally relevant guidelines to ensure high quality education specific to the needs of our community.

CAA Health has worked with a design firm to develop a garden layout combining elements of tranquility and relaxation along with raised beds for growing fresh produce and herbs. Next Spring the Nutrition and Garden Coordinator will oversee the wellbeing of the garden and develop specific educational offerings for families and our broader community, such as a hands-on presentation about growing vegetables, or an overview of what to grow during different seasons. During peak growing season, we will plan on delivering trainings in our garden space at least semi-monthly, with an emphasis on engaging families through a multigenerational, interactive approach.

A community garden will be particularly impactful for children and youth, as it will create a tangible connection to the foods, they are accustomed to seeing in the grocery store or on their plates. Hands-on learning will nurture deeper appreciation and respect for plant life as

EXHIBIT A AMENDMENT 03

SCOPE OF WORK

a form of healthy food, beauty, and relaxation. Importantly, the garden will also foster connection and healing to the land and to food.

CAA Health's proposed program will teach families with children and youth not only how to grow and access healthy foods, but also how to cook them in ways that are enjoyable and culturally relevant. If funded, this project will provide families with no-cost, safe environments to learn, grow, and explore healthy eating options and integrate these practices into their lifestyles in a sustainable way for the long-term.

CAA Health currently provides intake forms for all participants of SFP, 24/7 Dad, and Birth Squad, and perinatal navigation to assess baseline measures around the SDOH. For this project expansion, we will also provide intake forms to attendees of the cooking demonstrations and educational gardening events. If funded, we will continue using our evaluation form tailored to assess the impact of this project's offerings on youth's and families with young children's access to and knowledge of healthy eating. This is in the form of an electronic form, an in-person conversation, or a phone call, and will occur at the end of the SFP, 24/7 Dad, or Birth Squad session or at the end of the cooking demonstration or community gardening event. The comparison between intake form and post-program evaluation will show that youth and families with young children aged birth-5 significantly increased their understanding of how to access and prepare healthy and culturally relevant food.

Importantly, families will feel increased excitement about and support in this journey. The CRNs will also collect testimonials from families participating in SFP, 24/7 Dad, and perinatal resource navigation more broadly to further illustrate impact. Results will be reviewed on a rolling basis as sessions are delivered and evaluation forms are reviewed, as well as more formally by organizational leadership on a quarterly basis.
