

DEPARTMENT OF AVIATION CITY COUNCIL ORDINANCE REQUEST SUMMARY TSA Recapitalization and Baggage Handling System Modernization

Purpose and Use of Agreement(s)

The efficient processing of bags is a critical operational need for DEN. PCL Construction Services, Inc. was selected via a competitive Request for Proposal (RFP) process to provide design/build task-based services for Denver International Airport (DEN) for the Transportation Security Administration Recapitalization and Baggage Handling System Modernization scopes.

The City and the TSA have entered into Other Transaction Agreements (OTA) in which the recapitalization of TSA's existing baggage screening machines has been approved through this OTA, which will fund certain portions of the work. The contract further contains additional scope options, including but not limited to four potential baggage handling system terminal projects for which DEN has sought grant funding under the Federal Aviation Administration's (FAA) Notice of Funding Opportunity for the Bipartisan Infrastructure Law, Airport Terminal, and Tower Project Information Submittal. Work Scopes will be issued as funds become available; the contract will not exceed \$500,000,000.

Contract(s) Description
