# Review Criteria

1. Consistency with Adopted Plans
2. Uniformity of District Regulations
  - Request furthers the uniform application of zone district
3. Further Public Health, Safety and Welfare
  - Allows the redevelopment of a property that is consistent with the desired character as described by the city's adopted land use plans, allows an increase number and mix of housing types on an enhanced transit corridor, and promotes pedestrian-friendly building forms.

# Review Criteria

4. Justifying Circumstances
  - Changed or Changing Conditions
    - New residential density within walking distance of the Broadway Community Corridor.
    - Increased site plan review activity in proximity to both the Broadway and Evans transit stations.
    - Reconstruction of 17 blocks of street from 2010 to 2013 widening the roadway, creating a raised center median, providing major streetscape improvements like new sidewalks, coordinated street furniture, bike racks, pedestrian lighting and landscaping of the entire corridor.
  - Adopted Plans:
    - Blueprint Denver 2019 recommending a Community Corridor place type on a Main Street Arterial street and high capacity transit street with a recommended building height of up to 5 stories.

Therefore, the proposed map amendment is justified to recognize these changes.

# Review Criteria

5. Consistency with Neighborhood Context, Zone District Purpose and Intent
  - The Urban Context is characterized by single-unit and two-unit residential uses with small-scale commercial sometimes embedded with residential areas. More often commercial uses are located along mixed-use arterials or on main streets.
  - The general purposes of the Urban Main Street zone districts:
    - to promote safe, active and pedestrian-scaled commercial streets through building forms that clearly define and activate the public street edge,
    - to enhance the convenience, ease and enjoyment of transit, walking, shopping and public gathering, and
    - to improve the transition between commercial development and adjacent residential neighborhoods.
  - The U-MS-5 district applies to collector and arterial street corridors where a building scale of 1 to 5 stories is desired.
