

DEPARTMENT OF AVIATION CITY COUNCIL ORDINANCE REQUEST SUMMARY On-Call Construction Services

Purpose and Use of Agreements

The purpose of these on-call contracts is to maintain a pool of available construction contractors to perform facility and infrastructure projects throughout the main terminal, concourses, airfield, and surrounding area. The work associated through this contract will be performed via approved task orders.

This is a multiple award on-call construction agreement that will provide Inside/Outside Plant Telecommunications Infrastructure Engineering, Construction, and Installation services. The agreement will allow the contractors to collaborate with Denver International Airport (DEN) staff and perform such tasks as may be required to construct and/or build a communication infrastructure. This will consist of locating and/or relocating existing cable infrastructure and installation of new services and solutions to support new construction of buildings, standalone communications 'huts', internal distribution frame (IDF) rooms, and other structural components that require telecommunications services.

Contracts Description

There are four On-Call Professional Services and General Construction contracts in this submittal. Each contract has a term of three years which is set to commence from the date of execution of the contract. Each contract has a maximum contact value of \$5,000,000.00
