5. General description or background of proposed request. Attach executive summary if more space needed:

The purpose of the amendment is to extend the term of this General Engineering Services Master On-Call Agreement by one year, through January 14, 2022. Capacity of the contract will be increased from \$6 million to \$7 million dollars.

This extension is necessary to provide continuity of service, coordination, close-out, and audit of open task orders that support the Transportation Capital Program and infrastructure needs. This contract is part of the General Engineering set of contracts which is set to expire 01/2021. Procurement on new general engineering services On-Call contracts is planned to occur after the new CEI Ordinance ("DSBO Ordinance") is in effect in May. This Amendment in time extension and capacity increase is needed to ensure continuity of contract availability to support essential functions before the new set is procured.

The Amendment of these On-Call contracts would allow for the time needed to fully realize the opportunity to work closely with DSBO and integrate efficient assignment of goals and updated compliance elements to the replacement set of contracts. These recommended amendments would also allow for overlap in term of the two sets. The replacement set would be procured as soon as possible to allow new task orders to be issued while other tasks are completing on the order set. This would lay the groundwork for a two-year procurement cycle to have newer sets of on calls coming online with greater frequency which is of benefit to DOTI and industry.
