6. General description of proposed ordinance including contract scope of work if applicable:

The existing professional services on-call contract provides technical support, design and construction management services related to the baggage system and the train. This is a contract amendment to provide additional monies for professional on-call technical services for the baggage systems and Automated Guideway Transportation Systems (AGTS) at the Airport. Such services will be assigned by task order. Tasks will be defined with schedules and budgets mutually agreed upon between the City and the consultant.

___1___

Renewal terms: N/A

Purpose: To provide continuity of services and technical knowledge related to two important airport systems (baggage and train).

Cost/value: Add up to \$9 million capacity to an existing on-call technical professional services contract in support for the baggage system and the AGTS (train).

Source of funds: CIP and O&M

Benefit: Logistical Planners has provided design, construction management and technical support for both the baggage system and the train for many years and so has accumulated a lot of knowledge about both systems. With the large number of airport projects anticipated to start in the next three years that also touch these two important systems, it is believed that it would be unwise to attempt to change consultants at this time.
