(who, what, why)

The Versaterm Records Management System (RMS) is the primary application suite used by the Denver Police Department (DPD) for storing and transmitting incident, arrest, and investigative data. In addition, the application provides interfaces to external systems such as the National Crime Information Center (NCIC), Colorado Information Sharing Consortium (CISC), online reporting, Denver Sheriff's Department, City Attorney's Office, District Attorney's Office, and Denver County Courts. The application supports the data collection, incident response, investigation, and reporting aspects of DPD employee workflows. The level of electronic integration achieved by vRMS with external agencies allows DPD to accurately and efficiently deliver records to agency partners. The product suite continues to evolve to more effectively address emerging use cases and new system integrations. Nearly all civilian and sworn employees of DPD use the vRMS application suite. There are, approximately, 2500 users of the vRMS application. This renewal includes 14 mobile licenses including annual maintenance and support for the Denver Sheriff's Department.
