5. General description or background of proposed request. Attach executive summary if more space needed:

The Workday program is in need of additional on-call service provides for various projects, backlog work, and other enhancements to existing Workday features and functionality. Due to the complexity of the Workday platform it is critical that on-call Workday staff have extensive pre-existing experience with the Workday core application as well as have specialized training and certifications (HCM, Security Pro, BIRT reporting, Integrations, etc...) to be able to come on-board and be productive in a timely fashion. Our current staffing partners cannot guarantee experienced Workday certified professionals and/or they only provide Implementation Services (net new large scale project work) and not post implementation support (enhancements, small projects, integrations, etc.) which is why Remy Corp is being considered.

In addition, Remy is a certified Workday Inc. AMS Partner and is recognized as the most comprehensive staffing provider of Workday resources, specifically for post-production support. Technology Services currently has contract with Workday Implementation partners, but not post implementation, which is what this contract will remedy. Examples of some work items that Remy will assist with include:

- Integration clean-up/rework (multi-agency) - \$493,920 (6 month engagement)
- Security review/rework to support the new Time and Absence module (payroll) - \$493,920 (6 month engagement)
- Workday Reporting Support (multi-agency) - \$102,900 (3 month engagement)

Outside of the identified scenarios above, there is also day-to-day support that would be longer, more involved engagements at similar or higher price points depending on the length of engagement and level of expertise needed.
