Annual Eviction Filings - Forcible Entry & Detainer (FED) Filings

- Prior to COVID: Average 8,800 filings annually
- During COVID: Significant reduction in filings due to eviction moratoria and surge in one-time federal resources
- 2023-2025: Significant increase in filings compared to pre-pandemic levels

State and National Context

- Of the 35 cities in Eviction Lab's eviction tracking system (ETS), 19 (54%) had a higher eviction filing rate in 2024 than was typical before the pandemic.
- In Colorado, the eviction process is governed at the state level, limiting localities' use of policy tools to significantly reduce eviction filings.
- Philadelphia is an example of a city showing notable declines, now the second lowest filing rate of the cities tracked in the ETS.
 - This comes after they enacted a [mandatory eviction diversion program](#)
 - Landlord's good faith participation required before seeking a legal eviction through the court
 - Resources may include mediation and funding that covers a tenant's rent arrears
 - 2020-2025, the program has offered mediation to over 11,000 landlord-tenant pairs and reached agreements to stop an eviction in nearly 70% of cases.

Case Suppressed/Unknown	1115 (33.5%)
No	360 (10.8%)
Case Dismissed	199 (6%)
Total Served	3331

- More than half of households served received limited representation
- More than half of households served prevented a judgement for possession or had their case dismissed
- 1/3 of households served do not have data on whether a judgement for possession was prevented due to the case being suppressed and/or the household not informing the legal provider of the outcome of their case

Judgement for possession means the judge ruled in favor of the plaintiff and possession of the unit is returned to the landlord

Eviction Legal Assistance: 2024 Serial Evictions Research

- Between January 2022 and January 2024 there were approximately 22,338 eviction filings. 5,299 of those were from households facing eviction three or more times during that period.
- Those 5,299 filings were from 1,497 households
- 7% of households facing eviction representing 23% of the filings
- These households are more likely to have a writ issued against them, the stage when the court provides the landlord the ability to request the sheriff remove a tenant from their home

Strategies to Reduce Eviction Filings in 2025

- Targeting resources (rental assistance/supportive services) for serial evictees (those who receive multiple filings over a short period of time)
- Allowing TRUA applicants to apply prior to a filing (they must have received a demand for compliance which comes before a filing)
- Working with [HomeStart's Renew Collaborative](#) to help prevent evictions from Denver Housing Authority (DHA) properties
- Working with Excise and License to [enforce](#) the City's ordinance requiring landlords to provide the [Tenant Rights and Resource Guide](#) when signing a lease and issuing a rent demand.
- Better integrating eviction legal services into programs across HOST's portfolio (e.g., educating providers on how to help clients inform their landlords they meet eligibility under this [state law](#) which requires tenant/landlord mediation prior to filing an eviction for tenants who receive cash assistance)
- 2025 (Through September):
 - Spending to date: \$1,921,300 out of \$2.5M (77%)
 - HH served to date: 2634 out of 3055 (86%)
