6. General description/background of proposed ordinance including contract scope of work if applicable:

Agreement No. 15-07.06 This agreement is to fund the Final Design, Right-of-Way Acquisition and Construction of Drainage and Flood Control Improvements along Sanderson Gulch, Lipan Street to the South Platte River. These funds will be used primarily for design. Delineation of construction responsibilities between the UDFCD and CCD will be determined once the design is complete. The project will construct flood control improvements along Sanderson Gulch to ultimately remove 94 properties from the floodplain. By reducing the risk of flooding from 10-, 25-, 50-, and 100-year events, and theoretically reducing the size of the floodplain in Denver this project protects the lives of citizens who live, work, and frequent this area, as well as infrastructure (roads and railway bridges) and a portion of the local economy (local businesses).
