Review Criteria: Consistency with Adopted Plans

Comprehensive Plan 2040

- *Environmentally Resilient Goal 8, Strategy A- Promote infill development where infrastructure and services are already in place (p.54).*
- *Equitable, Affordable and Inclusive Goal 2 Strategy A – Create a greater mix of housing options in every neighborhood for all individuals and families (p. 28)*

Consistency with Adopted Plans: Blueprint Denver

Future Neighborhood Context: Urban

Small **multi-unit residential** and mixed-use areas are typically **embedded in 1-unit and 2-unit residential areas**. Block patterns are generally regular with a mix of alley access. **Buildings are lower scale and closer to the street.**

Consistency with Adopted Plans: Blueprint Denver

When a new zone district is proposed for a site, the neighborhood contexts map and description should be used to guide which zone districts are appropriate. The mapping of neighborhood context is at the citywide scale, so **the boundaries of the contexts may be interpreted with limited flexibility if the request furthers the goals of Blueprint Denver and is consistent with the overall intent of the neighborhood contexts map.** However, neighborhood context should be consistent across an area and should generally not vary at the parcel level (p. 66)

Consistency with Adopted Plans: Blueprint Denver

Future Place Type: Low Residential

Predominately single- and two-unit uses on smaller lots. Accessory dwelling units and duplexes are appropriate and can be thoughtfully integrated where compatible. Some civic and institutional uses are compatibly integrated throughout and limited mixed-use can occur along arterial and collector streets, as well as where commercial uses have been already established. Vacant institutional uses on corner or select sites may be appropriate locations to introduce additional residential intensity. Medium building coverage. Buildings are generally up to 2.5 stories in height. (Pg. 230)

Evaluation is based on the proposed zone district is consistent with the Future Street Classification, not to assess the traffic impacts of a specific development proposal.

Consistency with Adopted Plans: Blueprint Denver

Future Street Types: Local
Local streets can [vary in their land uses](#) and are found in all neighborhood contexts. They are most often characterized by residential uses.

Evaluation is based on the proposed zone district is consistent with the Future Street Classification, not to assess the traffic impacts of a specific development proposal.

Growth Areas Strategy

All other areas of the city (p. 51)

- 10% of new jobs by 2040
- 20% of new housing by 2040

Most growth is guided to regional centers, community centers and corridors, select districts and high and medium-high intensity residential areas. Other areas of the city are still expected to see some growth, however more limited.

Consistency with Adopted Plans: Blueprint Denver

- “Implement zoning code revisions to **facilitate compatible redevelopment of institutional sites** within neighborhoods” (Land Use and Built Form, Policy 6; p. 75).
- “consider changes to the zoning code that would allow **greater land use flexibility for these types of (institutional) sites that vacate**, such as appropriately scaled higher-density housing or limited neighborhood services” (p. 75).
- “until a citywide approach is implemented, **individual rezonings of these (institutional) sites may be an opportunity for more intense residential uses** or limited neighborhood services to be provided if done in a way that minimizes impacts to surrounding character” (p. 75).
