## Growth Strategy

- As the city experiences increase in population, it will also see an increase in the need for parks and open spaces
- Preserving existing parks and facilitating the development of new parks is critical to supporting Denver's growth strategy.

# Blueprint Denver – Equity Analysis

## Blueprint Denver Contains Three Major Equity Concepts

- Integrating these concepts into planning and implementation will help to create a more equitable Denver.

# Blueprint Denver – Equity Analysis

## Access to Opportunity

- Preserving existing parks and facilitating the development of new parks supports this equity concept and may, in some cases, improve this metric for some locations.

## Vulnerability to Involuntary Displacement

- The rezoning is not expected to impact any of these measures
- Potential impacts will be studied and mitigated as part of citywide public investments.

## Expanding Housing and Jobs Diversity

- Expanding the park system necessitates more employees for park maintenance, which may create additional local job opportunities for ongoing and seasonal maintenance work.

## Recommendations: Quality-of-Life Infrastructure

Quality-of-life infrastructure refers to the places, trees, plants, waterways, parks and outdoor spaces that stitch together our communities and contribute to the health, needs, comfort, environmental resilience and social connectedness of Denver. Quality-of-life infrastructure helps ensure everyone has access to parks, trees, waterways, outdoor spaces, recreational amenities, healthy food and outdoor community gathering places. In some instances, quality-of-life infrastructure can incorporate important civic and institutional places, views, social services, libraries or schools. It also includes recognizing that trees and the natural environment are vital pieces of civic infrastructure and key features to mitigate the impacts of climate change. Quality-of-life infrastructure supports the need for individuals to connect with nature, community, history, access healthy food systems and enjoy a clean environment.
