**Background:**The project is a continuation of the conceptual and preliminary design work prepared and shown in the 14th Street Corridor Improvement Feasibility Study, Phase 2. The major project components include removal of the existing asphalt pavement and reconstruction of the roadway with concrete pavement to provide three travel lanes and on street parking in accordance with current City Standards. The sidewalk along the roadway will be widened and pedestrian amenities and street furnishings will be installed to provide a pedestrian friendly, attractive corridor to Denver's major visitor facilities. The Project will be funded with 2007 IPTF Bond and private funds.
