Deviations from Standard Zone District:

Deviation	Why deviation is necessary
General Form – Setbacks to be 0’	Allows stadium to fit on a tight site. This deviates from CMP-ENT, but gets closer to C-MX-16
General Form – Upper Story Setbacks to be 0’	This allows for canopy above to full cover seating.
Fence Height shall not exceed 12’	For safety of players and fans
Fence Opacity	Based off of security fencing standards that other leagues require. NWSL may implement/ need this as they are currently working on their standards document
No required parking	The development is a TOD

The proposed official map amendment is consistent with the City's adopted plans.

The rezoning of the property to the requested PUD zone district is consistent with the policies and recommendations found in each of the adopted plans, as explained in the following paragraphs.

1. Comprehensive Plan 2040

The City's Comprehensive Plan 2040 is made up of six vision elements to form a sustainable, comprehensive vision for Denver. The proposed PUD aligns consistently with these elements, with a particular focus on Equity, Connected Places and Climate.

- Equitable, Affordable and Inclusive
 - Goal 1 – *Ensure all Denver residents have safe, convenient and affordable access to basic services and a variety of amenities*
 - This PUD will provide an additional amenity for the City, easily accessible by various transportation options, such as public transit and bike paths, ensuring equitable access for Denver residents. Located on a currently vacant site, the development will introduce new amenities to the area.
 - Goal 5 – *Reduce the involuntary displacement of residents and businesses*
 - The PUD is in alignment with this goal. As the PUD implicates a vacant lot, it will not be displacing any current residents or businesses in the area. The goal is to bring new businesses to the adjacent neighborhoods with the uses enabled through this PUD.
 - Goal 7 – *Make neighborhoods accessible to people of all ages and abilities*

- The PUD is located in an area that allows for various modes of transportation to access it, whether by foot, bike, train, or car. A mobility study is in the process of being developed to consider all modes of transportation, as well as age and ability accessing the PUD. On event days, while no parking is required on the site as a TOD, ADA parking will be located at the nearest adjacency. Additionally, drop-off locations will be integrated into the design and operations of the site.
- Strong and Authentic Neighborhoods
 - Goal 2 – *Enhance Denver’s neighborhoods through high-quality urban design.*
 - This PUD will allow for the building of a world-class stadium built at the highest quality in an urban environment.
 - Goal 9 – Ensure all neighborhoods are safe.
 - Allowing for the building of a stadium will ensure the site is no longer vacant, thereby increasing safety.
- Connected, Safe and Accessible Places
 - Goal 1- *Deliver a multimodal network that encourages more trips by walking, rolling, biking and transit.*
 - The rezoning will allow the proposed PUD to be a Transit-Oriented Development (TOD). It will be in an exciting spot for those that travel by bike and public transit, with close adjacency to the Platte River bike path, the D, E, H rail lines, and the Broadway bus routes. With no required parking on site for the TOD, these alternative modes of transportation will be highly encouraged due to the ease of access by using them.
 - Goal 2 – *Provide a safe transportation system that serves all users.*
 - The proposed location of the PUD will allow for minimal street crossings as pedestrians make their way from the rail stop to the PUD. Pedestrians will walk within the Broadway station development, across the bridge, and make their way within the pedestrian-oriented streets within the greater Santa Fe yards development
 - Goal 5 – *Ensure the development of a frequent, high-quality and reliable transit network.*

- With the requested rezoning at this location, the PUD will be frequently accessed by people coming from Broadway, which is shown as a “very frequent” transit service corridor in the Denver Moves Transit document.
 - Goal 6 – *Build and maintain safe bicycle and pedestrian networks*
 - This PUD would be a great addition to the bike and pedestrian network in this area of the City. This development will be adding to the connection of the Platte River trail to the areas to the East.
 - Goal 8 – *Strengthen multimodal connections in mixed-use centers and focus growth near transit*
 - As this area develops, the PUD will encourage more growth and activity in the area. With the TOD designation, access to this area will promote public transit as one of the easier ways to access the site.
- Economically Diverse and Vibrant
 - Goal 3 – *Sustain and grow Denver’s local neighborhood business*
 - A stadium in this location will bring spectators to the neighborhood and additional patrons to existing businesses, while also creating opportunities for new businesses.
- Environmentally Resilient
 - Goal 5 – *Enhance and protect the South Platte River*
 - The team is excited about the proposed PUD’s proximity to the river. Steps are being taken for flood control and stormwater capture to highlight the importance of protecting waterways. Access to the Platte River bike path will be much improved with the development of this area.
 - Goal 6 – *Protect and expand Denver’s green infrastructure network*
 - The proposed PUD is actively working with the adjacent park development team to create fluidity and interaction between the two sites. This will be an integral connection for the success of the PUD/ Stadium.
 - Goal 8 – *Clean our soils, conserve land and grow responsibly*
 - While the site is currently vacant, it was a previously developed site that has now been empty for a number of years. It’s in a hard to develop spot, surrounded on 2 sides by high traffic roads/ highways, leaving access to the site difficult via car, which may have discouraged other types of businesses to move into this area.

- While this site is not designated a brownfield site, there are brownfields very nearby. The proposed PUD will bring activity to the area and will help inspire others to rehabilitate and develop on these brownfields

2. Blueprint Denver

Blueprint Denver is an adopted supplement to the Comprehensive Plan 2040. The requested rezoning is consistent with many of the six vision elements that provide the basis for the goals, policies and strategies within Blueprint Denver. The following paragraphs look at how the PUD will be consistent with Blueprint Denver in regards to a) the neighborhood context, b) the future place, c) the growth strategy, d) adjacent street types, e) plan policies and strategies and f) equity concepts.

- a. The proposed rezoning of this Campus PUD fits within a District category as listed in the Neighborhood Contexts within Blueprint Denver.
- b. While the PUD will fit into the District category due to the use, it will be planned alongside a neighborhood that will fit into the Urban Center neighborhood context. The two neighborhood contexts will work together seamlessly to create a new Regional Center in this area. There are plans in place for the surrounding site to provide a range of amenities including park space and potential office, residential and hospitality buildings. With direct access to transit and bike paths, as well as plans to integrate the buildings to connect to the park space, the area will be used to host entertainment and cultural events, bringing people to the center.
- c. The District that this site will occupy is shown as one of the highest percentages of future growth within the Growth Strategy map. The map shows this area as becoming a Regional Center. As this site has been under utilized and vacant for a number of years, the development opportunities with the stadium/ PUD site will help to provide jobs and housing in the area with the diverse amenities being planned. This goal for the PUD aligns with the Growth Strategy as shown in Blueprint Denver.
- d. The street types surrounding this PUD will be developed with a mix of Mixed-Use and Main Street elements due to the mix of uses anticipated between the Campus/ Stadium use of the PUD and adjacent uses of businesses, residential, and hospitality spaces. The way the site is located with the park space situated on the adjacent site, it will allow for design elements to keep automobile speeds low to allow for enhanced experience and safety for pedestrians and bikes.

e. Plan policies and strategies

- Land Use & Built Form: General
 - i. The PUD aligns well with Policy 01, 02 & 09 with the PUD being set in a transit-oriented development and in an area prioritized for Growth within the Growth Map.
 - Land Use & Built Form: Economics
 - i. The PUD aligns with Policy 05 as it is actively working with a new organization to the City – the NWSL Women’s Soccer Team. Between the team and stadium, new jobs will be created within a whole new regional center along a very active corridor in Denver.
 - Mobility
 - i. As discussed often throughout this PUD Application, alternative forms of transportation are being actively promoted with the development of this PUD. Infrastructure adding to safe access points are already in place for this future development, which will aid in getting people to the PUD safely via different modes of transportation.
 - Quality-of-Life
 - i. The PUD and adjacent properties are working together and have top priorities in alignment with these policies. The Stadium and park space are working together to minimize flooding and manage stormwater (Policy 03). The Santa Fe Yards development as a whole is prioritizing green space, pedestrian access and connection to adjacent trails (Policy 01, 02, 05, 07).
- f. The PUD will add to the equity concepts in Blueprint Denver for this area of the City by bringing brand new job opportunities related to the PUD/ Stadium. This site has not been very accessible to the surrounding neighborhoods and has added to the divide that has occurred due to the railroad, highways, river that naturally create a separation here. This development will bridge those gaps, bringing pedestrian paths, bike paths and green space to more people in the area. Alongside those pathways, the existing RTD stop is within walking distance, giving access to the future businesses coming to this area.

3. Neighborhood/ Small Area Plan

A. The I-25 and Broadway Station Area Plan (2016)

The proposed rezoning is consistent with the I-25 and Broadway Station Area Plan (2016).

The *italicized text* signals an excerpt from the plan. The language that follows is used to detail how the proposed map amendment is consistent with the goals of the plan.

- *“Recruit new, growing entrepreneurial and innovative businesses seeking to locate in a growing employment district.” (p.44)*
- *“Seek businesses that can serve both the local and commuter populations including day-care and preschools, out-patient medical offices, doctors offices, library, satellite community college or night schools, or vocational training facilities.” (p.45)*
- *“Support the economic resiliency of the Station Area and surrounding neighborhoods with a strong mix of land uses.” (p.45)*
- *“A VIBRANT Broadway Station is an 18-hour, mixed-use district that is the heart and gathering place for adjacent neighborhoods as well as a regional destination.” (p.52)*
- *“Transit-Oriented Developments have land uses with a direct correlation to the function of a mass transit system.” (p.55)*
- *“Create a compact development pattern with small blocks and building frontages that spatially define public streets and open spaces.” (p.58)*
- *“Incorporate a variety of building heights and form to create an interesting urban environment.” (p.58)*
- *“Future building design at I-25 and Broadway Station should create an identity for the Station Area that makes this a unique ‘place’ within the city.” (p.59)*
- *“Create a sense of place.” (p.60)*
- *“Create a unique identity within the City and Region.” (p.61)*
- *“Locate active uses at edges of the park where feasible to provide “eyes on the park.” (p.84)*

The proposed rezoning would further the goals of the I-25 and Broadway Station Area Plan.

The designation for the site calls for accommodating a variety of uses on the site to activate the station area which would be accomplished by a stadium. Furthermore, the “Town Center” map designation encourages and anticipated such an entertainment use on the site.

A stadium would also accomplish the key plan goals of creating a sense of place and a unique identity.

General Review Criteria

Public Interest: The proposed official map amendment is in the Public Interest

- a. This PUD is in the public interest by complying with adopted plans as well as bringing the Stadium to the heart of Denver in an accessible area of the City with multiple transportation options for the public and not depending on car access only. This PUD will also develop an area of the City that has been vacant for a number of years and will bring activity and life to the Broadway station rail stop and Platte River trail.

The proposed official map amendment is consistent with the description of the applicable neighborhood context, and with the stated purpose and intent of the proposed Zone District.

- a. The proposed PUD is designed to accommodate the Stadium within the Campus PUD. The distinct nature of the stadium's design requires a specific size and form, which is incorporated into the overall PUD District Plan. This design will help create a dense, mixed-use, transit-oriented area. The surrounding parcels are planned to feature green spaces and hardscaped plazas, connecting pedestrian, bike, and transit paths. Together, these elements align with and support the City's adopted plans.

Additional Review Criteria

The PUD District is consistent with the intent, purpose, all applicable standards and criteria stated in Article 9, Division 9.6 (Planned Unit Development).

The PUD is responding to unique circumstances due to the use, building form, and site for the project needing more flexible zoning than what is achievable through standard zone districts.

The PUD District and the PUD District Plan comply with all applicable standards and criteria stated in Division 9.6

The PUD complies with applicable standards and criteria as stated in Article 9, Division 9.6. The standards and criteria are addressed in the attached application, narratives, and forthcoming SDP submittal. A Comprehensive Sign Plan (CSP) will follow these submittals.

The development proposed on the subject property is not feasible under any other Zone Districts, and would require an unreasonable number of variances or waivers and conditions.

Due to the specific nature of the design of a Stadium and the tight constraints of this site for the Stadium, the project is not feasible under any other Zone Districts and would require a lengthy variance process to allow for the building to be built as a successful Stadium for the City of Denver.

The PUD District and the PUD District Plan establish permitted uses that are compatible with existing land uses and adjacent to the subject property

The PUD establishes permitted uses for this site. It is in alignment and compatible with the adjacent planned land uses. The adjacent land in the area is not yet developed, but is in progress to be developed and is planned to directly support the use of this PUD.

The PUD District, the PUD District Plan establish permitted building forms that are compatible with adjacent existing building forms, or which are made compatible through appropriate transitions at the boundaries of the PUD District Plan (e.g. through decreases in building height, through significant distance or separation by rights-of-way, landscaping or similar features; or through innovative building design).

Since a Stadium is not currently a defined building form under Denver Zoning, the PUD establishes the building form standards for a Sports/ Entertainment Primary Use. As the PUD is being planned within other currently vacant parcels (concurrently undergoing plans for development), the adjacent properties will be developed in alignment with the building form on this PUD. Landscaping features and the adjacent park design will allow for appropriate transitions at the boundary of the PUD District Plan.

Community Outreach Documentation

As part of the rezoning process, we have conducted initial community outreach and plan further community engagement activities throughout the process.

On 06/25/25, we held a Community Open House in the Athmar Park neighborhood attended by more than 90 members of the community. We reached out directly to RNOs, business groups, City Council offices and adjacent members of the community to encourage attendance.

Participants identified themselves as coming from the following neighborhoods: Baker, Athmar Park, Valverde, Ruby Hill, Overland, Downtown, Westwood and Platt Park.

Comments received focused on the following areas: transportation/parking, cultural & community integration, local business integration/economic opportunity, environmental, and questions about the stadium operation plans.

On 5/29/25, we attended the kick-off meeting of the Community Benefits Agreement (“CBA”) Committee and have subsequently met with this group weekly since their first meeting.

On 07/17/25, we will attend and present at an Inter-Neighborhood Cooperation meeting to discuss this rezoning among other issues related to the stadium. More presentations and updates will be provided at future RNO and other organization meetings in the near future, along with another formal project community meeting planned for early September.

As of 7/10/25, we have either briefed or provided information about the rezoning application to all thirteen members of the City Council prior to our planned submission date of this application.

We anticipate further community conversations with individuals, businesses and RNOs as the rezoning moves through the process. The project team has also contracted with a local non-profit organization to assist with outreach and engagement to underserved and underrepresented communities.

We are also developing a web page for direct community feedback and to facilitate meetings. The project team also intends to distribute project-related newsletters and surveys to gather more feedback and community input.
