5. General description or background of proposed request. Attach executive summary if more space needed:

The franchise agreement with Public Service of Colorado d/b/a Xcel Energy states that Xcel must relocate their facilities when requested by the Manager of Public Works. Manager of Public Works requested that Xcel relocate transmission line 3911 out of their easement to accommodate the 39th Avenue Greenway project. Article 5.7.E. Utility Easements states that where a Utility Easement is involved, the Company (Xcel) shall be paid for such relocation unless otherwise provided in the applicable terms of the Utility Easement. The relocation cost is \$567,481.51.

The costs for a relocation of an electric transmission line is included in the City's Franchise Agreement if they are in the right of way or on City property. However, this relocation is located in a perpetual utility easement owned by BNSF and therefore the City is required to pay for the relocation. This relocation was anticipated as part of the 39th Avenue Greenway project and was included as part of the project budget.
