Proposed Zone Amendment

## Future Neighborhood Context

**Urban Edge:** Contains elements of the suburban and urban contexts. Small multi-unit residential and commercial areas are typically embedded in 1-unit and 2-unit residential areas. Block patterns are generally regular with a mix of alley access. Buildings are lower scale and generally set back farther from the street.

  - Public Park and Open Space

**Future Street Type**

- Residential Arterial
- Residential Collector
- Local or Undesignated

Proposed Zone Amendment

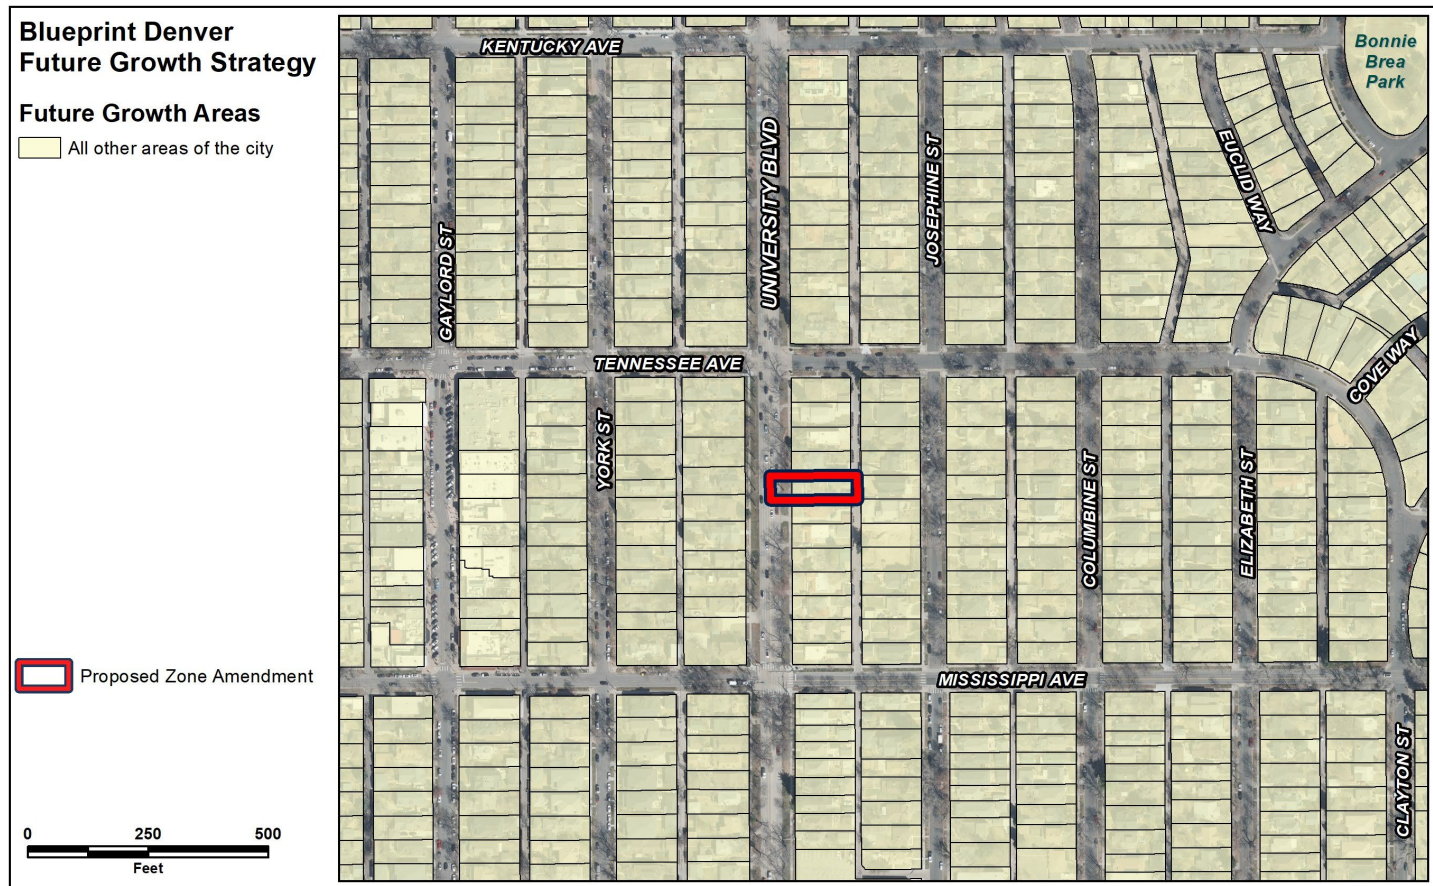

**Future Place Type**

**Residential Low:** Predominantly one- and two-unit, though many areas are mostly one-unit. Includes Accessory Dwelling Units. In some contexts, some higher-intensity residential uses may be mixed throughout. Neighborhood-serving retail may be found in some key locations. Buildings are predominantly low-scale houses and duplexes. Setbacks and lot coverage vary across neighborhood contexts.

# Review Criteria: Justifying Circumstances

Since the date of the approval of the existing Zone District, there has been a change to such a degree that the proposed rezoning is in the public interest. Such change may include:

- a. Changed or changing conditions in a particular area, or in the city generally; or,
- b. A City adopted plan; or*
- c. That the City adopted the Denver Zoning Code and the property retained Former Chapter 59 zoning.

# Consistency with Neighborhood Context, Purpose and Intent Statement

## DIVISION 4.1 NEIGHBORHOOD CONTEXT DESCRIPTION

### SECTION 4.1.1 GENERAL CHARACTER

The Urban Edge Neighborhood Context is characterized by a mix of elements from both the Urban and Suburban Neighborhood Contexts. The Urban Edge Neighborhood Context is primarily single-unit and two-unit residential uses. Small-scale multi-unit residential uses and commercial areas are typically embedded in residential areas. Single-unit residential structures are typically the Urban House and Suburban House building forms. Multi-unit building forms are typically the Row House, Garden Court, Town House or Apartment building forms embedded with other residential uses. Commercial buildings are typically the Shopfront and General building forms that typically contain a single type of use. Single and two-unit residential uses are primarily located along local and residential arterial streets. Multi-unit residential and commercial uses are located along local streets, arterials, and main streets.

### SECTION 4.1.2 STREET, BLOCK AND ACCESS PATTERNS

The Urban Edge Neighborhood Context consists of a regular pattern of block shapes surrounded by orthogonal streets within a grid or modified grid. Orthogonal streets provide connection and a mixed presence of alleys. Block sizes and shapes are consistent and include attached, detached and non-existent sidewalks, treelawns where provided for by detached sidewalks, street and surface parking, and landscaping in the front setback.

### SECTION 4.1.3 BUILDING PLACEMENT AND LOCATION

Single-, two-unit and multi-unit residential buildings typically have consistent moderate to deep front setbacks. Building orientation along a block face may be inconsistent or consistent. Commercial buildings typically have consistent orientation and front setbacks deep enough to allow for a mix of landscaping and some parking.

### SECTION 4.1.4 BUILDING HEIGHT

The Urban Edge Neighborhood Context is characterized by low scale buildings except for some mid-rise commercial and mixed use structures, particularly at nodes or along arterial streets.

### SECTION 4.1.5 MOBILITY

There is reliance on the automobile with some pedestrian and bicycle activity and low to medium level of access to the multi-modal transportation system.

## 4.2.2.1 General Purpose

- A. The intent of the Residential districts is to promote and protect residential neighborhoods within the character of the Urban Edge Neighborhood Context. These regulations allow for some multi-unit districts, but not to such an extent as to detract from the overall image and character of the residential neighborhood.
- B. The building form standards, design standards, and uses work together to promote desirable residential areas. The standards of the single unit districts accommodate the varied pattern of suburban and urban house forms. While lot sizes vary, lot coverage is typically low creating generous setbacks and yard space. The standards of the two unit and row house districts promote existing and future patterns of lower scale multi unit building forms that typically address the street in the same manner as an urban house building form.
- C. These standards recognize common residential characteristics within the Urban Edge Neighborhood Context but accommodate variation by providing eight Residential Zone Districts.
- D. The regulations provide a consistent framework to property owners, developers, and neighborhood residents to reinforce desired development patterns, encourage affordable housing, and accommodate reinvestment in residential districts.

## H. Single Unit D1x (E-SU-D1x)

E-SU-D1x is a single unit district allowing suburban houses and urban houses with a minimum zone lot area of 6,000 square feet and accessory dwelling units. Setbacks and lot coverage standards accommodate front and side yards similar to E-SU-Dx and allow a detached accessory dwelling unit in the rear yard.

# CPD Recommendation

CPD recommends approval, based on finding all review criteria have been met:

1. Consistency with Adopted Plans
2. Uniformity of District Regulations
3. Further Public Health, Safety and Welfare
4. Justifying Circumstances
5. Consistency with Neighborhood Context, Zone District Purpose and Intent
