Scope of work: Construction services for the GARDI A South Rehabilitation Project at Denver International Airport (DEN). This project is a continuation of the DEN Gate Apron Drainage and Rehabilitation Improvements (GARDI) Program. The scope of work will include demolition and rehabilitation of existing apron pavement and rehabilitation select underground utilities to improve the pavement condition and drainage condition. The pavement reconstruction will take place from the Concourse building face to the outer VSR trench drain and will re-establish positive drainage of the apron. In addition to pavement reconstruction, various gate apron utilities will be rehabilitated and replaced as necessary. Utility improvements include replacing jet fuel hydrant pits, removing and replacing storm and sanitary sewer structures, installing new water vault hatches, replacing existing fire hydrants, replacing the existing trench drain, and the installation of a jet fuel double block and bleed valve. The project will be closely coordinated with DEN Stakeholders during construction to minimize operational impacts.
