

Council Bill15-0381

Concerning a proposed intergovernmental agreement regarding Montclair and Park Hill basin drainage improvements and I-70 transportation enhancements

Councilmember Montero

June 22, 2015

Thank you, Mister President.

I move to amend Council Bill 15-0381 in the following particulars:

On page 1, line 17, strike the City Clerk's Filing number "2015-0265" and replace it with the City Clerk's Filing number "2015-0265-A"

Explanation of Amendment

The purpose of the amendment is to include technical changes requested by the Colorado Department of Transportation (CDOT).

The Mayor's Office reports that there are no changes to the financial commitments or project details as presented in committee, and CDOT and the City remain committed to creating a partnership that is mutually beneficial and keeps the community in mind.

This amendment allows for the substitution of the new contract with a new filing number.

These changes would:

- 1) Clarify language that the Brighton Blvd Box Culvert could be used for both City surface drainage needs and as an alternative connection point for the I-70 residual drainage pipe. This will enable us to build the drainage pipe in Brighton Blvd prior to paving currently scheduled for 2016/2017, thus limiting future paving impacts.
- 2) Add boiler plate language required for all state contracts with vendors per the request of the State Controller's office.
