Scope of work:

The Consultant, as deemed necessary by the Contract Manager or their designated representative, will be required to provide professional services for specific task scopes of work. This work will NOT involve Construction, Maintenance, Repair or Design and will be dedicated solely to Data Analysis. The Consultant team must be able to demonstrate proficiency and expertise in the portions of the scope of work they bid on, along with the following qualifications and capabilities:

1. Impact evaluation, Data analytics and reporting and planning: Analyses of city-wide data sets to determine impact of potential future as well as past policies or programs to determine how well they help the City progress towards goals.
2. Analysis of technology and research and other support to inform policy and program design.

CASR is endeavoring to pursue a variety of future policies and programs that will require technical consulting input. Among these are initiatives aimed at existing and new building decarbonization, deployment of heat pumps, distributed energy resources, vehicle electrification, resilience landscape design, ecosystem services, climate resiliency, green workforce, environmental justice and zero waste and water. CASR is also interested in tracking and reducing embodied carbon in new buildings.

3. Energy consulting and evaluations. Analysis to help with implementation of individual projects.

CASR is leveraging the Climate Protection Fund to decarbonize both public and private buildings and homes and will require technical and engineering consulting to implement electrification, solar, and EV projects in both settings. In addition, CASR is pursuing individual projects to achieve existing and new building decarbonization, deployment of heat pumps, distributed energy resources, vehicle electrification, resilience landscape design, ecosystem services, climate resiliency, green workforce, environmental justice and zero waste and water.
