Blueprint Denver 2019

Urban Neighborhood Context

- Small multi-unit residential and low-intensity mixed-use buildings are typically embedded in single-unit and two-unit residential areas.
- Block patterns are a regular grid with consistent alley access.
- Where they occur, multi-unit buildings are low-scale.
- Mixed-use buildings are sited in a pedestrian-friendly manner near the street.

Blueprint Denver 2019

Local Center Future Place Type

- Primarily provides options for dining, entertainment and shopping. May also include some residential and employment uses.
- Where residential occurs, it should primarily be located to encourage active street frontages.
- The public realm is typically defined by lower-scale buildings with active frontages providing a more intimate, pedestrian scale.
- Heights are generally up to 3 stories and generally will not have a transition area as the low intensity easily integrates into the surrounding neighborhood.

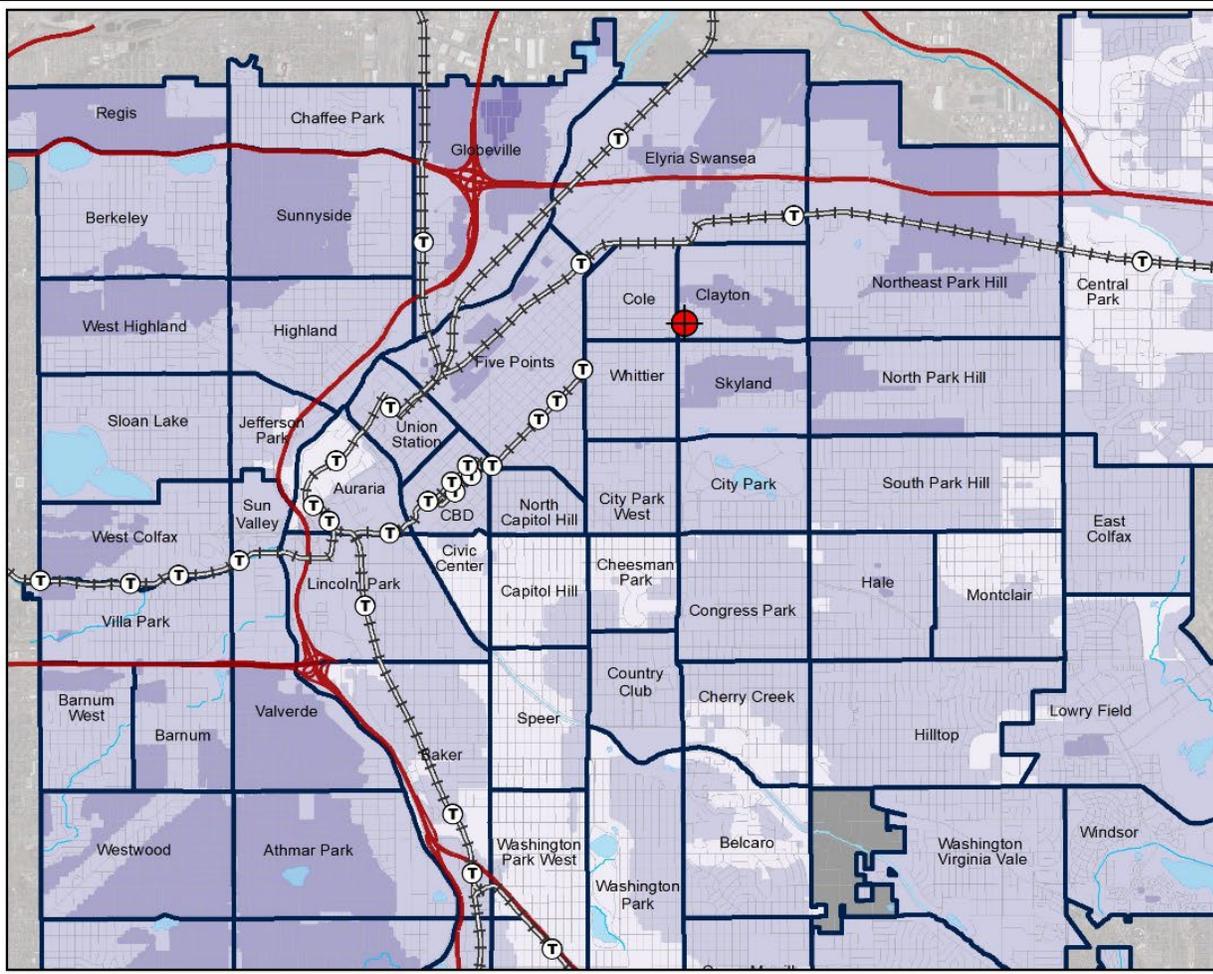

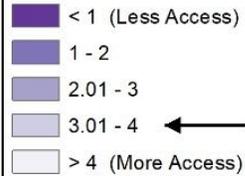

Evaluation is based on the proposed zone district is consistent with the Future Street Classification, not to assess the traffic impacts of a specific development proposal.
