---------------------------	-------------------------------	----------------------------

Describe the project in general terms:

This project will implement a new solution for the assessment, billing, collection and distribution of personal and real property taxes for the City & County of Denver. The City & County of Denver will implement the software product iasWorld from Tyler Technologies leveraging the Software as a Service (SaaS) model for procurement. Additionally, Tyler Technologies will provide Professional Services (Statement of Work) supporting the end-to-end implementation of their product. The scope is to fully replace the functionality of the legacy mainframe applications, CAMA and OASIS, with an integrated commercial off-the-shelf (COTS) solution that leverages more current technologies and offers opportunity to automate and streamline business processes.
