5. General description or background of proposed request. Attach executive summary if more space needed:

Technology Services is requesting approval of an amendment with Zivaro, Inc. to increase the contract amount for the purchase of On Demand Storage as a Service (STaaS) services. Storage is a critical component of Technology Services' data strategy and plays a major role in keeping City Agencies running. STaaS services allows fast and efficient access to stored data for Agency business decisions. STaaS services, versus a traditional storage data infrastructure, reduces complexity, risk and resource management while increasing availability and flexibility.

Through this service, Technology Services continues to invest in technologies that have the flexibility to scale (increase / decrease) storage capacity on an as needed basis. This allows Technology Services to increase capacity for a period of time that it is needed without making a large capital expenditure. As this is a flexible, pay-as-you-go service, it allows for the City to pay for only the storage it needs and consumes.

As the City's data needs continue to grow and evolve, Technology Services requires additional financial capacity in the contract to account for this growth. Some examples of current growth are:

- Migration of siloed agency IT footprints into Enterprise IT Services
- Video surveillance growth (i.e. new cameras in parks for Parks and Rec)
- Migration and refresh of the 911 IT Server environment
- Duplication of systems to support Lifecycle efforts (system upgrades require both legacy and future systems to run in parallel)
- Modernization of the backup architecture (migrating from legacy storage systems to Pure Storage)
