

POINT IN TIME

Metro Denver 2024 Data

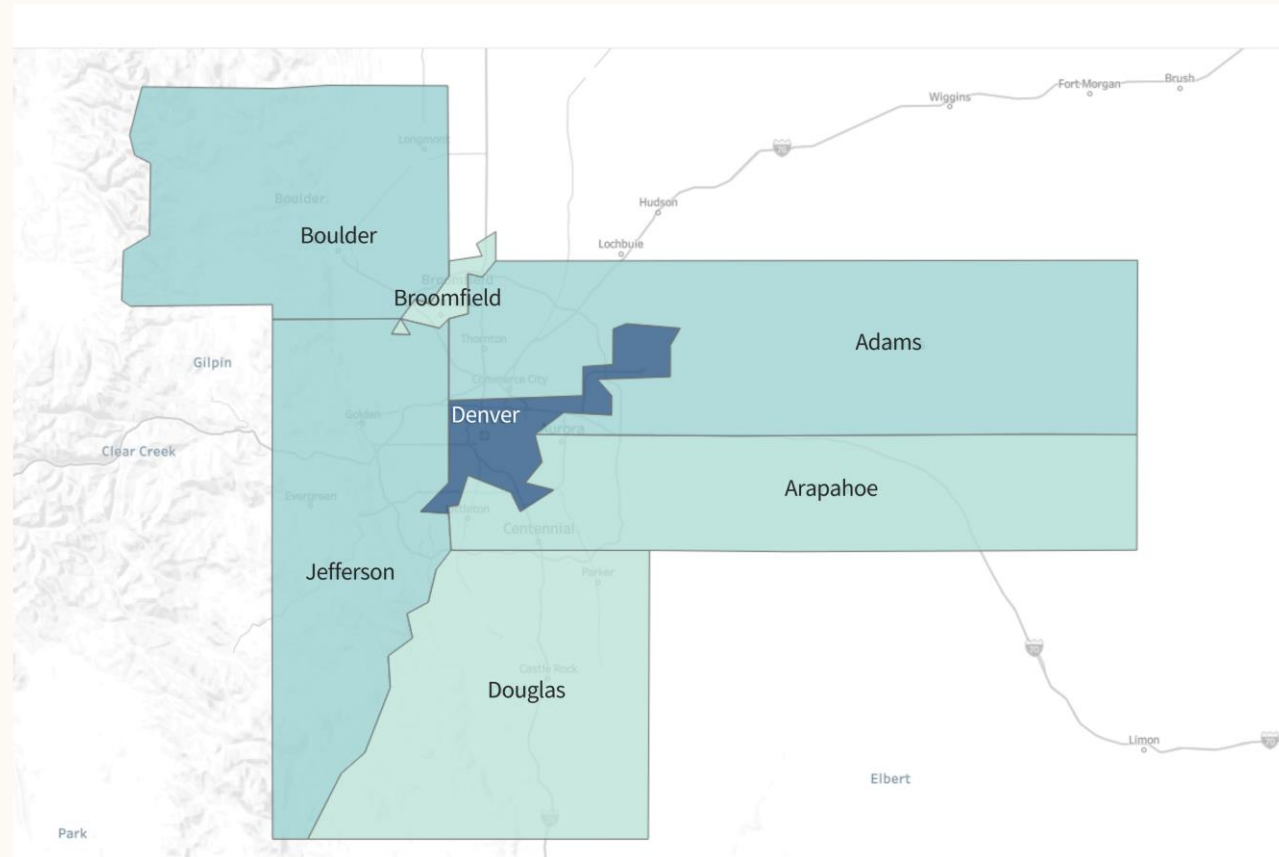

POINT IN TIME

The Point in Time is an unduplicated count of people experiencing homelessness on a single night in January. The Dept. of Housing and Urban Development (HUD) defines literal homelessness as living in a place not meant for human habitation, emergency shelter, or some transitional housing programs.

Persons at risk of becoming homeless (such as those staying with friends or family or staying in a motel) are not included in this count.

SEVEN COUNTY METRO DENVER REGION

HOW IT WORKS

MDHI works closely with leads in the seven counties to determine the needs and resources of each community, organize the count and survey, and ensure each count is compliant with HUD guidelines. There are slight variations in each community's approach depending on their needs and resources.

LIMITATIONS

The PIT Count is only one measure of the number of people experiencing homelessness in our community, with numerous variables such as weather, volunteer engagement, and capacity that could result in an undercount. Read a more comprehensive picture in our latest [State of Homelessness Report](#).

REGIONAL OVERVIEW

9,977 PEOPLE

EXPERIENCING HOMELESSNESS IN METRO DENVER ON THE NIGHT OF JANUARY 22, 2024
