

THE CHERRY CREEK
STEERING COMMITTEE

June 29, 2024

To: Denver Planning Board (“DPB”) and Denver City Planning Department (“CPD”)
Regarding: Cherry Creek West PUD Rezoning Application #2022I-00264 (the “Application”)
Applicant: The Buell Foundation, presented by and through East West Partners (the “Applicant”)
Property Location: 2500 East 1st Avenue, Denver CO 80206 comprised of over 13 acres (the
“Property”)

Dear DPB and CPD:

The undersigned is the Chair of the Cherry Creek Steering Committee (“CCSC”), which is a Colorado unincorporated nonprofit organization representing and comprised of the Registered Neighborhood Organizations of Cherry Creek North Neighborhood Association, Cherry Creek East Association, Country Club Historic Neighborhood Association, Hilltop Neighborhood Association (collectively, the “Area RNOs”), Capitol Hill United Neighbors and various other residential stakeholders to the south of the Cherry Creek and those residents north of 6th Avenue. Other members of the CCSC include the Cherry Creek Mall and the Cherry Creek North Business Improvement District (the “BID”) acting in concert with the Cherry Creek Business Alliance (collectively with the Cherry Creek Mall, the “CC Business Interests”). The area’s transportation management association, Transportation Solutions (of which, for purpose of disclosure, the undersigned is a board member) is also a member of the CCSC. Transportation Solutions is actively advising the Applicant and has not been included in this specific discussion.

This letter is written solely with respect to the residential Area RNO member representatives of the CCSC, and the CC Business Interests have not provided their specific comments at this time. Representatives of these Area RNO residential members have met together and desire to express their concerns with the Application to CPD and the DPB as set forth herein.

The CCSC and, indeed, many of the residents that are members of the respective Area RNOs have been meeting with the Applicant for a period of over two and a half years to participate in and understand the rezoning effort and the proposed project to be developed on the Property. These presentations have been consistent in describing the specifics of the proposed development project (the “Project”), as the same are shown in the Project website at <https://cherrycreekwest.com>, to include 7 buildings averaging less than 10.5 stories as follows: (i) 4 residential buildings, three of which will be a height of 13 stories (using the affordable housing regulations allowing for increased height in exchange for affordable housing units) and one of which will be located along University and will be 8 stories, and (ii) 3 commercial buildings along 1st Avenue including two 8 story office buildings and one 11 story office building. The Applicant has promised a large amount (approximately 3.8 acres) of open space with community access. Importantly, the BID design guidelines will be amended to apply to the Property (with

modifications necessary to meet the specifics of the proposed Project design requirements) so that the Project will be developed in a manner consistent with the BID which was rezoned in 2014 to the “CCN District” and which has seen substantial growth in the last decade since such rezoning.

The many Applicant neighborhood presentations have resulted in substantial comments and concerns being raised regarding the Project, including questions regarding the amount of traffic that will be generated by the Project. Many residents have also applauded the Applicant’s promise to develop much needed affordable housing in the area. Indeed, continued discussions with the Applicant have resulted in a positive and collaborative process to enter into a Development and Community Benefit Agreement (a “DCBA”) that will address many of these neighborhood concerns and Applicant commitments. We continue to be hopeful that entering into such DCBA will allow the Area RNOs to join in supporting the Project and the rezoning Application.

However, the process has stalled in the discussions and a draft of the DCBA is still not far enough along to allow the Area RNOs to be able to support the Project at this time without expressing some of the main issues with the Application. These concerns are those that the CPD staff could well address in making the PUD Application more specific on the following issues:

1. While the Applicant has consistently identified the number and size of the buildings, the PUD does not specify the total number of buildings or their specific heights. While we understand that the Applicant has not yet finalized its site development work, we strongly urge that the PUD be modified to specify what the Applicant has represented: 7 buildings at the maximum heights identified to the residents since the beginning of this process as shown in their presentation materials. The PUD is a perfect vehicle to make the specifics clear for the size of the development and the buildings. And the varying heights of the buildings as shown in the Applicant’s presentations will make the Project more consistent with the varied heights that are part of the fundamental zoning character of the CCN District with which this Project is intended to be consistent. Currently, the PUD document states in Table 4.1 that there is no maximum number of buildings and the height is 12 stories with exceptions. This would allow for a much more dense and uniformly tall Project than what is and has been presented. We urge the CPD and Applicant team to modify the PUD to reflect the maximum number of buildings at 7 and the average height to be not more than 10.5 stories (or specific to the building stories represented in the presentation materials as outlined above.)
2. The uses of the buildings are not specified in the PUD. We understand that there is currently being negotiated a Development Agreement between the City and the Applicant that will guarantee a specified minimum of residential affordable housing units. While we applaud that approach, the concern of residents is that the Applicant could, under the PUD, lessen the overall amount of residential use

and increase the number of office buildings unless the PUD is modified to state the use specifics to those buildings. The traffic data will be much different if the uses are modified to increase office and decrease residential uses.

3. Similarly, the Applicant has represented to the neighborhoods that they will not develop medical office building (“MOB”) uses, which would substantially increase the amount of traffic to the Property. We have asked the Applicant to restrict the amount of medical uses to those that are limited to senior supportive care (that would be or could be included in a senior supportive housing building) and small use cosmetic/aesthetics uses consistent with smaller boutique office uses of this type. There is a large neighborhood concern for having the Project turn into a medical office campus in any respect. Any one large building developed as an MOB could completely skew the manner in which the Project would operate and the number of car vehicle trips that would be anticipated to result.
4. The open space requirements should include a specific requirement for a ‘green space’ similar to that included in the representations of the Applicant.
5. The Applicant has committed to including bike lanes, a bike facility and increased landscaped pedestrian access areas. While this may be included in the final infrastructure master plan, this requirement is important for the neighborhood bike lane connections and to set the stage for implementation of the recommendations made by the Denver Moves Cherry Creek team with DOTI.
6. Parking requirements shall include the minimum number required under the CCN District requirements and the Applicant has agreed to unbundle parking to allow for more parking available to other users. This should be documented in the PUD or one of the incorporated documents, such as the infrastructure master plan.
7. We understand that the DBP will evaluate the Application to determine whether the PUD rezoning request is consistent with the Cherry Creek Area Plan. Those on the CCSC were instrumental in the preparation of the Cherry Creek Area Plan and the rezoning of the BID. The Applicant’s agreement to use the BID design guidelines is applauded and will further the development of the unique Cherry Creek Area in a consistent manner. The 12-story designation of the property in the Cherry Creek Area Plan was a placeholder, intending that the property match the 12-story portion of the BID on the eastern most edge of the CCN zoning district. The requirement that the Property should now be required to include varying heights would be consistent with the BID District zoning, which was finalized two years after the Cherry Creek Area Plan and sets the character of the entire Cherry Creek business area. This varying height requirement of the CCN District zoning sets Cherry Creek apart from downtown or other areas where there

is a uniform development height. Including the requirement that this Property be zoned for the varying building heights consistent with the Applicant's presented plans will assure that the vision of the Cherry Creek Area Plan is realized. Only in this way will the Project rezoning be consistent with the neighborhood context and the zone district's purpose and intent.

The request of the Area RNOs is that the PUD documents (including the attachments) make it clear that the Applicant will be required to develop what it has represented to the neighborhoods. The above concerns are in support of that request and we ask that the CPD staff make modifications to the PUD documents, including modifications to the infrastructure master plan, the City development agreement and the transit management plan, to address these concerns and memorialize what the Applicant has represented and shown over the last 2.5 years.

While we continue to be hopeful that the Applicant and the Area RNOs will reach agreement on a DCBA that could address these same concerns, we are writing this letter to collectively urge CPD and DPB to require that the above issues be addressed before the Applicant's rezoning Application is moved forward to LUTI and City Council. Otherwise, we anticipate that there may be significant opposition from Area RNOs and others to the Application.

Thank you in advance for your consideration.

Sincerely yours,

M. Lou Raders

M. Lou Raders, Chair CCSC

To: Denver Planning Board, Denver Planning Department

Regarding: Cherry Creek West PUD 36

Dear Members,

As Denver develops, each new project should help achieve the overall Great City vision while not disproportionately negatively impacting others. While we all understand with development may come additional auto traffic, but illegal and dangerous traffic patterns should never be created.

With the prior redevelopment of the Cherry Creek Shopping Center site, there was the privatization of Cherry Creek North Drive, which is signaled at University Blvd. This intersection is approximately 150 feet north of University Blvd and Cherry Creek South Drive, a public signaled intersection that services properties from University Blvd to Colorado Blvd on the south side of the creek. Cherry Creek South Drive provides the only access to the high-density housing at One Polo Creek, Portico, and Cherry Creek Tower as well as direct access to Daniels Office Building, Central Cristian Church, City of Brest Park, Stokes Place/Green Bowers neighborhood and several gated residential communities. It is also the connection to Glendale and the State Health Department.

With present conditionals, southbound traffic on University Blvd turning east at Cherry Creek North Drive go into the designated left hand turn lane while those turning east at Cherry Creek South Drive are forced to change lanes mid intersection, creating an illegal traffic movement. Often cars ignore the forced left onto Cherry Creek North Drive and drive straight through the intersection to turn left at Cherry Creek South Drive, illegally again and creating an accident waiting to happen. With present conditions, traffic often stacks half way to First Avenue. This present issue is not the turning traffic at Cherry Creek North Drive but cars turning left onto Cherry Creek South Drive. Any extension of the left hand turn lane to service Cherry Creek North Drive will not correct the issues for Cherry Creek South Drive.

I have been bringing up this safety concern to East West Partners, DOTI, and City Council and staff members since the early presentations of this project and have suggested that parties figure out how to do traffic studies to address this issue.

This is a great opportunity to correct this dangerous intersection. For this rezoning request to be fairly reviewed, DOTI needs to explain the City's investment for the adjacent area infrastructure improvements. I feel this needs to be addressed before the project moves forward to the Land Use committee and Council.

Attached, please find a satellite map to clarify the issue intersections.

Meredith Gabow

**CITY AND COUNTY OF DENVER, COLORADO
REGISTERED NEIGHBORHOOD ORGANIZATION
POSITION STATEMENT**

Following a vote of the Registered Neighborhood Organization, please complete this form and email to rezoning@denvergov.org. You may save the form in *.pdf format if needed for future reference. Questions may be directed to planning staff at rezoning@denvergov.org or by telephone at 720-865-2974.

Application Number	22i-00264
Location	Cherry Creek West Development Project
Registered Neighborhood Organization Name	Alamo Placita Neighborhood Association (APNA)
Registered Contact Name	Patrick Williams, President
Contact Address	532 N Emerson St, Denver, CO 80218
Contact E-Mail Address	williams.patrick067@gmail.com
Date Submitted	July 25, 2024

As required by DRMC § 12-96, a meeting of the above-referenced Registered Neighborhood Organization was held on , with members in attendance.

With a total of members voting,

voted to support (or to not oppose) the application;

voted to oppose the application; and

voted to abstain on the issue.

It is therefore resolved, with a total of members voting in aggregate:

The position of the above-referenced Registered Neighborhood Organization is that Denver City Council

Application #

Comments:	<p>Alamo Placita Neighborhood Association (APNA) wishes to stand in opposition to the above referenced project. Increasing density in the Cherry Creek area will only increase traffic in an area that is already a traffic nightmare. Former Denver City Councilman, Wayne New and former CEO of Western Development, David Steel, have made realistic suggestions to make the project a more acceptable development. They have a five (5) page summary of their suggestions that APNA has reviewed and would like for the City Council to review. A copy of that five (5) page summary is attached.</p> <p>Thank you for your time and consideration.</p>

Dear Ms. Peñafiel,

I live in the Speer neighborhood, and I am writing this letter in support of the Cherry Creek West project located at 2500 East 1st Avenue.

The Cherry Creek West plan and rezoning delivers on a wide range of City and neighborhood goals and priorities, including but not limited to:

- Easy access to Cherry Creek, connecting the project to downtown and other neighborhoods.
- Delivering much needed affordable housing. Cherry Creek is a wonderful place to live and work, but many people cannot afford to live there.
- The amount of open space will be wonderful for residents and visitors in the neighborhood. Cherry Creek needs green space.
- More space for bikers and pedestrians.

I have been very pleased to see the amount of work the developer has done with the community and surrounding neighborhoods through this process. It is certainly in the city's best interest to work with developers who care about the place and the people around their project.

I strongly urge the Denver City Council to approve this project and rezoning application and appreciate the partnership between the City, community, and developers like East West.

Sincerely,
Ben Wells

francisca.penafiel@denvergov.org

Dear Ms. Peñafiel,

I am writing to let you know that I support the Cherry Creek West project and rezoning. (This project is bounded by 1st Avenue, University Blvd, Clayton Street, and the Cherry Creek Trail).

This is a key project in our community and Cherry Creek West is doing a great job of getting to know what the Cherry Creek community would like to see with this new development. Many of us are excited that they are focusing on the creek and green space in Cherry Creek along with the development of this long vacant property.

This Cherry Creek West project delivers on a wide range of City goals and priorities, including but not limited to providing mixed-use development in the City's urban core, affordable housing and housing supply, publicly accessible open space, pedestrian and bike improvements, transportation demand management (TDM), and customized zoning with an emphasis on high-quality design.

It is clear how East West Partners' vision for the site closely aligned with the goals and recommendations in the Cherry Creek Area Plan and Blueprint Denver.

I am excited for this project move forward, as it has been under review and in discussions with the community for well over two years. I strongly urge Denver City Council to approve this project based on the significant number of public benefits and improvements it will bring to the Cherry Creek area and Denver as a whole.

Thank you for the opportunity to provide my support for Cherry Creek West.

Sincerely,

Christine Des Enfants

Denver CO 80205

As a nearby Denver resident who lives and works near Cherry Creek, I am writing this letter in support of the PUD-G 36 rezoning application and large development review framework for the Cherry Creek West project located at 2500 East 1st Avenue. The Cherry Creek West plan and rezoning delivers on a wide range of City and neighborhood goals and priorities, including but not limited to:

- **Connecting the surrounding neighborhoods to the Creek** and Cherry Creek Trailway—delivering on the namesake of the neighborhood and visions set forth in numerous neighborhood planning efforts over the years.
- Setting forth PUD zoning regulations, design standards and guidelines, and design review processes (CCN DAB) to ensure this important site will be held to **very high standard of development** and in line with the surrounding Cherry Creek area.
- Delivering **affordable housing** units in line with the City's Expanding Housing Affordability (EHA) goals for a high impact site—enabling more people who work in Cherry Creek to afford to live in the neighborhood.
- Providing substantially **more open space than required** and the first meaningful open spaces and community gathering spaces to the Cherry Creek area in many years.
- **Significantly upgrading the pedestrian and bicycle network** in the area and establishing meaningful and enhanced **Transportation Demand Management (TDM)** strategies and regulations for the site.

This project implements many of the recommendations of Blueprint Denver and will deliver much needed housing stock to a part of Denver with excellent infrastructure capacity to accommodate this infill redevelopment of a tired and underutilized site.

East West Partners has done an extensive amount of community and neighborhood outreach. Over the same period I have served on the Advancing Equity in Rezoning Task Force, and am confident that, in terms of community outreach, East West Partners has exceeded the direction and expectation of this task force.

As a nearby resident and former member of the Denver Planning Board I strongly urge the Denver City Council to approve this project and rezoning application.

Sincerely,

July 24, 2024

Sent via email to: Francisca.Penafiel@Denvergov.org

Dear Ms. Peñafiel,

As a nearby Denver resident at 461 Race St in Denver Country Club Neighborhood, I am writing this letter in support of the PUD-G 36 rezoning application and large development review framework for the Cherry Creek West project located at 2500 East 1st Avenue.

This Cherry Creek West property deserves a high quality developer and as a peer of East West the site is in good hands. If you look at the Unions Station Master Development East West led this area development and they did a terrific job and so far from what I have seen from Cherry Creek West they are on the right tack and just need some help with this PUD. They are providing over 100 affordable units at 60% AMI which is needed for this area and over 100,000 SF of retail for the nearby residents.

I strongly urge the Denver City Council to approve this project and rezoning application and appreciate the partnership between the City, community, and developer that is evident in the rezoning application and large development framework documents (Infrastructure Master Plan, Housing Agreement, Development Agreement).

Sincerely,

Jimmy Balafas
461 Race St

Dear Ms. Peñafiel,

Thank you for all that you are doing to make and protect our city. I understand responsible growth as I was a part of one of Denver's most successful communities, Riverfront Park. As a Denver resident for over 45 years and living in the Cherry Creek area for most of that time, I am writing this letter in support of the PUD-G 36 rezoning application and large development review framework for the Cherry Creek West project located at 2500 East 1st Avenue. The Cherry Creek West plan and rezoning delivers on a wide range of City and neighborhood goals and priorities, including but not limited to:

- **Connecting the surrounding neighborhoods to the Creek** and Cherry Creek Trailway—delivering on the namesake of the neighborhood and visions set forth in numerous neighborhood planning efforts over the years.
- Setting forth PUD zoning regulations, design standards and guidelines, and design review processes (CCN DAB) to ensure this important site will be held to **very high standard of development** and in line with the surrounding Cherry Creek area.
- Delivering **affordable housing** units in line with the City's Expanding Housing Affordability (EHA) goals for a high impact site—enabling more people who work in Cherry Creek to afford to live in the neighborhood.
- Providing substantially **more open space than required** and the first meaningful open spaces and community gathering spaces to the Cherry Creek area in many years.
- **Significantly upgrading the pedestrian and bicycle network** in the area and establishing meaningful and enhanced **Transportation Demand Management (TDM)** strategies and regulations for the site.
- Performing a full traffic and mobility study and **delivering improvements outlined in the Infrastructure Master Plan (IMP)**.

Quality infill development like Cherry Creek West helps to achieve the concept of a 15-minute neighborhood and is exactly what a healthy, growing and thriving City needs.

East West Partners has done an extensive amount of community and neighborhood outreach over the past 2.5 years and has been a good partner to surrounding community and numerous City agencies—each of which has asked for a lot.

I strongly urge the Denver City Council to approve this project and rezoning application and appreciate the partnership between the City, community, and developer that is evident in the rezoning application and large development framework documents (Infrastructure Master Plan, Housing Agreement, Development Agreement).

Thank you for your consideration

The residents of Denver will be so proud to see the outcome of this new community. East West Partners are the absolute best company to provide responsible and thoughtful leadership.

David

Dear Ms. Peñafiel,

As a Cherry Creek North resident, I am writing this letter in support of the PUD-G 36 rezoning application and large development review framework for the Cherry Creek West project located at 2500 East 1st Avenue. The Cherry Creek West plan and rezoning delivers on a wide range of City and neighborhood goals and priorities, including but not limited to:

- **Connecting the surrounding neighborhoods to the Creek** and Cherry Creek Trailway—delivering on the namesake of the neighborhood and visions set forth in numerous neighborhood planning efforts over the years.
- Setting forth PUD zoning regulations, design standards and guidelines, and design review processes (CCN DAB) to ensure this important site will be held to **very high standard of development** and in line with the surrounding Cherry Creek area.
- Delivering **affordable housing** units in line with the City’s Expanding Housing Affordability (EHA) goals for a high impact site—enabling more people who work in Cherry Creek to afford to live in the neighborhood.
- Providing substantially **more open space than required** and the first meaningful open spaces and community gathering spaces to the Cherry Creek area in many years.
- **Significantly upgrading the pedestrian and bicycle network** in the area and establishing meaningful and enhanced **Transportation Demand Management (TDM)** strategies and regulations for the site.
- Performing a full traffic and mobility study and **delivering improvements outlined in the Infrastructure Master Plan (IMP)**.

Quality infill development like Cherry Creek West helps to achieve the concept of a 15-minute neighborhood and is exactly what a healthy, growing and thriving city needs.

East West Partners has done an extensive amount of community and neighborhood outreach over the past 2.5 years and has been a good partner to surrounding community and numerous City agencies—each of which has asked for a lot.

I strongly urge the Denver City Council to approve this project and rezoning application and appreciate the partnership between the City, community, and developer that is evident in the rezoning application and large development framework documents (Infrastructure Master Plan, Housing Agreement, Development Agreement).

Sincerely,

JR Bitzer

Good Evening Friends-

I am writing to express my strong support for the proposed Cherry Creek West development project at the Cherry Creek Shopping Center. As a nearby resident, and patron of the Cherry Creek area, I believe that this development will bring significant benefits to our city.

East-West Partners, the developer behind this project, has a well-established reputation for delivering high-quality projects that prioritize community needs and sustainability. Their track record of successful developments makes me confident that Cherry Creek West will be a valuable addition to our area.

The Cherry Creek West project promises to enhance our community by providing new retail, dining, and entertainment options, as well as green spaces and pedestrian-friendly areas. This development will not only boost our local economy but also improve the quality of life for residents and visitors alike. Personally, I am excited to shop there, maybe work there, and MAYBE even live there.

I believe that Cherry Creek West will be a catalyst for positive change, encouraging further investment and growth in our community while maintaining the unique character and charm of the Cherry Creek area.

I urge you and your fellow council members to support this project and help make it a reality. Thank you for considering my views on this important development.

Dear Ms. Peñafiel,

As a resident of the Denver's Hilltop neighborhood and an office occupant in Cherry Creek, I am writing this letter in support of the PUD-G 36 rezoning application and large development review framework for the Cherry Creek West project located at 2500 East 1st Avenue. A mixed use development that incorporates a live, work, play master plan is ultimately the highest and best use of this site. The affordable housing component, the open / gathering spaces and walkability to many surrounding shops, restaurants and offices will contribute greatly to the long term success and sustainability of the Cherry Creek neighborhood. East West Partners is a reputable developer that has spent significant time thoughtfully planning and analyzing the various components of the site.

I **strongly** urge the Denver City Council to approve this project and rezoning application and working with East West Partners to make this project come to life for the benefit of all residents and tenants in the Cherry Creek neighborhood.

Sincerely,

Brittany Goodwin

Ms. Peñafiel, Councilwoman Sawyer,

My name is Andrew Schmidt and I'm a resident over in Wash Park and own a roofing company up in Swansea. With University being my main route every day, I recently heard about the Cherry Creek West development and decided to look into the proposed plans. I see those vacant parking lots twice a day and always wondered what was going on there. This last week, I had a chance to get some info re: the proposed changes and couldn't be more excited for the plan and for the thoughtfulness it seems to be informed by. IMHO, the city of denver has had a lot of irresponsible development, but this seems to represent how to listen well, and do it right.

We need these empty lots activated and this brings vibrancy, green space and a community informed design to bear. I love that it connects the river and includes affordable units, which we so desperately need. Also really into the 15 min community concept to increase walkability. Creating a space like this, ties communities together, encourages economic and job growth and takes a terrible group of old unused buildings/lots and brings the best part of Denver back in, our people. The efforts to maximize the common and green spaces are just awesome, I think:)

Also, I love the farmers market there, but usually don't attend b/c it's so dang hot in the summer time to host it on asphalt with zero shade. Last time I was there, I think I saw a kid actually melt... Be pretty cool to have that spread across green space, shade, and activation all around it. I bet it doubles in size too, helping all our small business and farming communities that participate.

Anyways, thanks for listening and I just wanted to share my opinion in favor of the plans. Thank you both for what you do!

Sincerely,

Andrew

[Report Suspicious](#)

Dear Ms. Peñafiel,

I am writing to express my support for the PUD-G 36 rezoning application and large development review framework for the Cherry Creek West project at 2500 East 1st Avenue. As a resident in the Mayfair/Hilltop area, I believe this project aligns with various City and neighborhood goals, which include:

- Connecting our surrounding neighborhoods to the Creek and Cherry Creek Trailway. This pathway has consistently been envisioned in previous neighborhood planning efforts.
- Implements PUD zoning regulations, design standards, and guidelines to ensure high-quality development consistent with our Cherry Creek area.
- Provides affordable housing units in line with the City's Expanding Housing Affordability goals.
- Offers more open spaces and community gathering areas to our Cherry Creek area.
- Improves our pedestrian and bicycle network as well as implements our Transportation Demand Management strategies.
- Conducts a comprehensive traffic and mobility study while delivering improvements as outlined in the Infrastructure Master Plan.

Cherry Creek West is a prime example of a quality infill development that contributes to the concept of a 15-minute neighborhood, fostering a healthy and thriving City.

Over the past 2.5 years, East West Partners has actively engaged with our community and City agencies, demonstrating their commitment to being an outstanding partner.

Ms. Peñafiel, I urge YOU, as well as the Denver City Council to approve this project and rezoning application. This in turn, your approval will highlight the collaborative efforts among the City, community, and developers, which will be evident in the rezoning application and large development framework documents.

Thank you for your time,

Denver CO 80205

Sent via email to: Francisca.Penafiel@Denvergov.org

Dear Ms. Peñafiel,

The purpose of this letter is to submit my strong support for the PUD-G 36 rezoning application and large development review framework for the Cherry Creek West project located at 2500 East 1st Avenue. We currently office across from the mall in the ANB Bank building at 1st and St. Paul and have called Cherry Creek our Denver headquarters for many years.

The Cherry Creek West plan and rezoning delivers on a wide range of City and neighborhood goals and priorities, including but not limited to:

- Delivering affordable housing units in line with the City's Expanding Housing Affordability (EHA) goals for a high impact site—enabling more people who work in Cherry Creek to afford to live in the neighborhood.
- Providing substantially more open space than required and the first meaningful open spaces and community gathering spaces to the Cherry Creek area in many years.
- Setting forth PUD zoning regulations, design standards and guidelines, and design review processes (CCN DAB) to ensure this important site will be held to very high standard of development and in line with the surrounding Cherry Creek area.
- Connecting the surrounding neighborhoods to the Creek and Cherry Creek Trailway—delivering on the namesake of the neighborhood and visions set forth in numerous neighborhood planning efforts over the years.
- Significantly upgrading the pedestrian and bicycle network in the area and establishing meaningful and enhanced Transportation Demand Management (TDM) strategies and regulations for the site.
- Performing a full traffic and mobility study and delivering improvements outlined in the Infrastructure Master Plan (IMP).

Quality infill development like Cherry Creek West helps to achieve the concept of a 15-minute neighborhood and is exactly what a healthy, growing and thriving City needs.

East West Partners has done an extensive amount of community and neighborhood outreach over the past 2.5 years and has been a good partner to surrounding community and numerous City agencies—each of which has asked for a lot.

Further, East West Partners has an exceptionally long and excellent track record of delivering high quality projects throughout Colorado. It gives me great comfort knowing that they are leading this effort to revitalize this stale and stagnant part of Cherry Creek. You will be hard pressed to find a better developer company, and more specifically, a better team within a development organization, to lead an effort as important as Cherry Creek West than the team from East West Partners.

I strongly urge the Denver City Council to approve this project and rezoning application and appreciate the partnership between the City, community, and developer that is evident in the rezoning application and large development framework documents (Infrastructure Master Plan, Housing Agreement, Development Agreement).

Sincerely,

Sam Kasperek

Strong opposition

Your comment:

First, the heights of the buildings should not be allowed to be taller. 12/13 story buildings are way too tall for what is essentially a transition zone of Cherry Creek to those of us on the other side of the Creek.

Second, the tallest structures should be on 1st Ave, the north side of the property which interfaces only with commercial buildings. The south side of the development interfaces with both the open space of the creek and the residents on the other side of the creek. Having 13 story buildings that go straight up will create a dark canyon because it blocks the sun in the morning and because it will create a sheer cliff wall to the north side of the creek, when the whole point of the creek is that it be essentially an open space for walking, talking, enjoying nature. Structures that reflect the sun to the walkway--the buildings sheer walls with run east west and so become large mirrors--lighting up and heating up the creek area, neighbors to the south, etc. which will ruin the very amenity the whole development is dependent upon, namely the open space nature of the creek.

Plus, such tall buildings so close the neighbors to the south will totally ruin their view. It is not Denver, it is New York city!

If the buildings on the south side of the development are more reasonable, 5 maybe 6 stories, and at the very least slope in way that gets taller towards 1st Ave will preserve sun, temperatures, reflections, open space, nature--my guess is there is a habitat issue with sheer walls and the creek. It must be mitigated--as well as views.

Point is, the development needs to be oriented to the creek and residential neighbors on the south. I am happy there is a development coming, but it is currently way oversized for the neighborhood, and especially the creek. Please, this is a crime that won't be able to be reversed once it is built.

Councilman Paul Kashmann
City and County Building
1437 Bannock Street, Room 451
Denver, CO 80202

Dear Councilwoman Sawyer and Councilman Kashmann:

My name is Christina Caulkins. I live at 6 Polo Club Lane in Denver, CO 80209.

I am very disturbed by the size, density and construction timeline of the proposed Cherry Creek West development at First Avenue and University Boulevard as presented by East West Partners. I ask that you turn down their development application and have them reduce the height and density of this behemoth project.

I am not opposed to development. I am a commercial real estate investor myself. However, this project is too big, too dense and will cause too much disturbance in the neighborhood for 9 years of construction and beyond. I drive by the site of this proposed development between 2 and 8 times per day, so I will be adversely impacted each and every day by approval of this plan.

I recall a few years ago when the sewer and drainage lines underneath University Boulevard and First Avenue were being replaced and upgraded. I believe it was, in part, to support the Cherry Creek West development. The traffic was very difficult for more than a year. Many North-South drivers diverted to Colorado Blvd, which is already congested, making for absolute gridlock on most afternoons. We tried to get around the Denver Country Club on Alameda, but that is a tiny lane, mostly impassable for trucks and treacherous on icy winter days. Once you add in the holiday congestion from the Cherry Creek Mall, the traffic problems are simply magnified. I think we can expect this kind of disturbance for a significant portion of the 9 year development timeline for the Cherry Creek West project.

Queuing traffic from Northbound University onto Speer Blvd at rush hour is already congested. Oftentimes, two of the northbound University Blvd lanes are blocked with cars jockeying for position and doing very dangerous maneuvers to wedge themselves into the turn lanes. When we add 10,000 additional car trips from this development passing through this intersection every day, it is going to cause enormous problems.

During the proposed Phase I, East West Partners say that construction workers and heavy equipment will park on the other half of the site. That's good news, but there will certainly be

several lanes of University and First Avenue closed down to excavate, put in infrastructure and ultimately build the structures whose setbacks are merely a few feet from the roadway. And then what happens when Phase 1 is built and four additional high rise buildings are breaking ground? Where will those workers and construction vehicles be accommodated? They will either be in our neighborhoods and/or several lanes of University and First Avenue will again be closed to accommodate parking, material storage requirements or crane parking, to name just a few.

I believe East West Partners is a good operator, but they are being given too much in height and density accommodations on this plan.

The massive 2,000 spot parking structure is not sufficient for this enormous project. If you assume that each of the 825 residences will have at least one vehicle, you consume 825 parking spots. The 600,000 square feet of office will take another 1,800 spots, assuming the typical minimum 3 spots per 1,000 square feet ratio. Now, you are at 2,625 spots and only proposing to build 2,000. What about the retail square footage, which is typically real estate's largest user of parking spots per square foot? Where are they going to park? That's right, in our neighborhoods to the south. All over our neighborhood. There won't be any other options.

I appreciate some aspects of the plan – a market square, greenspace for gathering, improved bike lanes. However, this is simply too much built square footage, too dense and too high with too much resulting traffic. Cherry Creek might be the only high performing office and retail neighborhood in the city right now. Why would you risk making it impossible to move around in this neighborhood? What about adding incentives to bring some vibrancy back to our downtown so it can come back from the brink of death? I implore you to vote against this overblown Cherry Creek West project and bring the standards of Cherry Creek back to a lower density village where it can live in harmony with the surrounding single family neighborhoods.

Thank you, Councilwoman Sawyer and Councilman Kashmann, for hearing my comments and thank you for your commitment and service to our City. I would appreciate hearing from you on the date and time for the next planning commission or City Council meeting that includes a public comment period. It is difficult to find that information on your website. Thank you.

Sincerely

Christina R Caulkins

Report Suspicious

Councilwoman, I am a resident at 5 Polo Club Ln, Denver, 80209. Like my neighbor, Christina Caulkins, I am opposed to the proposed East West project.

This development is not sustainable for any neighborhoods in your district. The impact of such a large development will have far reaching, negative results on residents and on people who commute using University, Alameda, Cherry Creek Drive and Speer/First Avenue. I might add the local business will likely be affected due to traffic congestion. As a 4th generation Denverite, who was raised in Hilltop and the Polo Grounds, I can attest to the many changes that have taken place. Some are positive, others are not. I support urban planning, but this project portents urban disaster. More density is not good in an already compressed area.

Safety is a concern, as well.

City Council considerations should not be solely based on cash inflow. Safety, quality of life, small business success and accessibility to the area have to be considerations and concerns.

Thank you for your service.

Sincerely,

Wendy Kaufman

You have not previously corresponded with this sender.

I have been instructed to send this to you so it gets to the Council. It regards the Cherry Creek West Development on 2500 E 1st Avenue, Zoning change from B-3 to PUD-G 36. Case number: 2022i-00264. Thank you very much!

Problems with the height and sheer wall of the buildings on the sought border of Cherry Creek West

First, the heights of the buildings should not be allowed to be taller. 12/13 story buildings are way too tall for what is essentially a transition zone of Cherry Creek to those of us on the other side of the Creek.

Second, the tallest structures should be on 1st Ave, the north side of the property which interfaces only with commercial buildings. The south side of the development interfaces with both the open space of the creek and the residents on the other side of the creek. Having 13-story buildings that go straight up will create a dark canyon because it blocks the sun in the morning and because it will create a sheer cliff wall to the north side of the creek when the whole point of the creek is that it is essentially an open space for walking, talking, enjoying nature. Structures that reflect the sun to the walkway--the building's sheer walls run east and west and so become large mirrors--lighting up and heating up the creek area, neighbors to the south, etc., which will ruin the very amenity the whole development is dependent upon, namely the open space nature of the creek.

Plus, such tall buildings so close the neighbors to the south will totally ruin their view. It is not Denver, it is New York!

If the buildings on the south side of the development are more reasonable, 5 maybe 6 stories, and at the very least slope in a way that gets taller towards 1st Ave will preserve sun, temperatures, reflections, open space, and nature--my guess is there is a habitat issue with sheer walls and the creek. It must be mitigated--as well as views.

The development should be designed with the creek and the residential neighbors to the sought in mind. While I appreciate the prospect of a new development, the current proposal is

disproportionately large for our neighborhood, especially for the creek area. I urge you to consider the irreversible impact this could have once built.

It is too much- too much density, too many cars and too much disruption for 9 years of construction across all phases. Please protect us from this!

Cherry Creek Growth and Traffic

Have you recently driven down Alameda, University, Steele, 1st Avenue or Cherry Creek South Drive and experienced the incredible traffic and congestion in the Cherry Creek area? Have you tried to cross 1st Avenue and feared that you could be hit by a car? You are not alone.

We believe in smart, well designed development, but we all know that the unintended consequence of too much density without concurrent transportation planning is uncontrolled traffic. However, a Denver Moves Cherry Creek statement from City Planning and the Department of Transportation and Infrastructure reads, “DMCC recommends that an **increase in density in Cherry Creek** is needed to support higher frequency/more reliable transit and allow for more local trips within Cherry Creek to be taken by walking/bicycling.” They are putting the cart before the horse.

What’s driving this large increase in Cherry Creek traffic? The causes are:

- Cherry Creek North Business Improvement District (BID) – **10 year 150%** density growth
- Underutilized BID underground parking and limited on street parking – creating parking and traffic problems in the neighborhoods
- Increased Leetsdale / Colorado cut through traffic on 1st Avenue to downtown – **50% of 1st Avenue traffic** is from cars originating from Leetsdale, Colorado Boulevard, and University
- Reduced RTD bus services / limited routes – limited service reduces employee transportation
- Lack of planned transit implementation on major arterial corridors – the 2012 Cherry Creek Area Plan stated “Cherry Creek has highest regional traffic volume” and called for transit services. The City has estimated that it will take **10 to 20 years** to implement transit.
- Limited use of City transportation demand management strategies to reduce traffic – City strategies to reduce traffic have not been emphasized or enforced
- Maximum Intersection Capacities – 10 of the major 13 Cherry Creek area intersections exceed the maximum traffic of **36,000 cars per day** (intersection traffic chart attached)

Even with all of the above, the City will be allowing the rezoning of the largest development in City Creek history. This **Cherry Creek West Project development** on the west side of the Cherry Creek Shopping Center poses the following issues which will have to be addressed.

- Scale – the approximate 1,600,000 square foot (SF) development will be 45% greater in SF compared to the present Shopping Center.
- Building Height – 3 of the 7 buildings will be 13 stories in height and 1 building will be 11 stories. The average height of all buildings will be 10.5 stories. (developer diagram attached)
- Vehicle Traffic – According to the developer, the number of vehicle trips onto 1st Avenue and University will increase traffic by 1,000 vehicle trips per PM Peak Hour or 10,000 per day. (developer traffic study attached)
- Traffic Flow – The flow of traffic will be difficult with the property having only 4 entrances /exits that are: 2 one-way only and 2 two-way with lights. The existing Shopping Center, which is 45% smaller, has 7 entrances / exits with 4 two-way with lights.
- Construction Difficulties - The entire 13 acre property will require 2 to 3 story-depth underground for project infrastructure construction and parking. 10 years of project construction will create continuous 1st Avenue traffic issues.

What can immediately be done to reduce traffic since transit is 10 to 20 years in the future?

1. Establish a **75% residential use** ratio for new development for next 5 years since residential construction creates the lowest level of new vehicle trips

2. Expand **RTD route services** to Cherry Creek
3. Implement **specific Transportation Demand Management measures** for all **existing and new** building developments, which will have the potential of reducing Cherry Creek traffic by **2,500 vehicle trips** per PM Hour
 - a) Require RTD Eco-Pass programs to increase bus usage
 - b) Require hourly parking or unbundled parking for all building users, including employees
 - c) Implement bicycle support amenities for all buildings
4. Implement and fund **shuttle services** from Cherry Creek to University / I25, the Colorado Blvd / I25, and Colorado / I70 light rail stations to expedite service to the present transit network
5. Propose to the City a **Development Impact Fee Program** to help fund Cherry Creek improvements – a plan which has created millions of dollars from developers in other cities
6. Even with these above **Cherry Creek options and recommendations**, the easiest and most effective solution for immediate traffic reduction is to address new building use, size, and heights. Therefore, **reducing the total CCW new development square feet and height to 8 stories** will have a significant reduction in vehicle trips.

What can residents do to help? Implementation of any of these recommendations falls under the purview of the various registered neighborhood organizations (RNO) and their respective Councilperson. Each RNO should send a Position Statement to the City and County of Denver (Councilperson). If a Position Statement is not sent, then, in effect, the RNO is endorsing the CCW Project as submitted. Written resident comments can also be sent to your Councilperson.

All concerned organizations and residents should attend Planning Board and the City Council meetings to express their opinions. Approval of the submitted CCW rezoning will create traffic and congestion for the foreseeable future. RNOs and business organizations are the ones with the stature to make a formal submittal of objection.

Denver, CO 80202

Councilman Paul Kashmann
City and County Building
1437 Bannock Street, Room 451
Denver, CO 80202

Dear Councilwoman Sawyer and Councilman Kashmann:

My name is Bijal Choksi. I live at 7 Polo Club Lane in Denver, CO 80209.

I am very disturbed by the size, density and construction timeline of the proposed Cherry Creek West development at First Avenue and University Boulevard as presented by East West Partners. I ask that you turn down their development application and have them reduce the height and density of this behemoth project.

I am not opposed to development. I own commercial real estate myself. However, this project is too big, too dense and will cause too much disturbance in the neighborhood for 9 years of construction and beyond. I drive by the site of this proposed development multiple times per day, so I will be adversely impacted each and every day by approval of this plan.

I am concerned about the congestion and disturbance for a significant portion of the 9 year development timeline for the Cherry Creek West project.

Queuing traffic from Northbound University onto Speer Blvd at rush hour is already congested. Oftentimes, two of the northbound University Blvd lanes are blocked with cars jockeying for position and doing very dangerous maneuvers to wedge themselves into the turn lanes. When we add 10,000 additional car trips from this development passing through this intersection every day, it is going to cause enormous problems.

During the proposed Phase I, East West Partners say that construction workers and heavy equipment will park on the other half of the site. That's good news, but there will certainly be several lanes of University and First Avenue closed down to excavate, put in infrastructure and ultimately build the structures whose setbacks are merely a few feet from the roadway. And then what happens when Phase 1 is built and four additional high rise buildings are breaking ground? Where will those workers and construction vehicles be accommodated? They will either be in our

neighborhoods and/or several lanes of University and First Avenue will again be closed to accommodate parking, material storage requirements or crane parking, to name just a few.

I believe East West Partners is a good operator, but they are being given too much in height and density accommodations on this plan.

The massive 2,000 spot parking structure is not sufficient for this enormous project. If you assume that each of the 825 residences will have at least one vehicle, you consume 825 parking spots. The 600,000 square feet of office will take another 1,800 spots, assuming the typical minimum 3 spots per 1,000 square feet ratio. Now, you are at 2,625 spots and only proposing to build 2,000. What about the retail square footage, which is typically real estate's largest user of parking spots per square foot? Where are they going to park? That's right, in our neighborhoods to the south. All over our neighborhood. There won't be any other options.

I appreciate some aspects of the plan – a market square, greenspace for gathering, improved bike lanes. However, this is simply too much built square footage, too dense and too high with too much resulting traffic. Cherry Creek might be the only high performing office and retail neighborhood in the city right now. Why would you risk making it impossible to move around in this neighborhood? What about adding incentives to bring some vibrancy back to our downtown so it can come back from the brink of death? I implore you to vote against this overblown Cherry Creek West project and bring the standards of Cherry Creek back to a lower density village where it can live in harmony with the surrounding single family neighborhoods.

Thank you, Councilwoman Sawyer and Councilman Kashmann, for hearing my comments and thank you for your commitment and service to our City. Thank you.

Sincerely

Bijal Choksi

As a resident in the Cherry Creek area I am very concerned with the planned redevelopment and traffic congestion that will result from the current plan that has been proposed and will be reviewed on August 7 from 3 to 5pm.

I urge you to reject this current plan as the Cherry Creek area is already over congested with traffic and insufficient parking to handle this proposed plan.

Thank you for your consideration and time.

Respectfully,

Jeff Pooley

Dear Council members,

As a long time resident of Polo Club North(2552 E. Alameda Ave.) I strongly object to the size and scope of the new development.

The streets around Polo Club north are already overly congested. At times the traffic on Alameda backs up in both directions from the Polo Club North entrance to either University or Cherry Creek Dr., South. Denver department of transportation estimates that there are more than 36,000 vehicles passing through the intersection of first and University. By some estimates another 10,000 additional trips would arise from the proposed redevelopment of Cherry Creek west by East West Partners.

This development will create an enormous NEGATIVE impact on our quality of life and

property values. I urge you to reconsider this development and its consequences for the surrounding communities.

Thank you,
Sharon Ripps

denver **STREETS PARTNERSHIP**.org
Advocating for people-friendly streets in Denver

AUGUST 2, 2024

Francisca Peñafiel
Community Planning and Development
City & County of Denver
201 W Colfax Avenue, Dept. 205
Denver CO 80205

Dear Ms. Peñafiel,

On behalf of the Denver Streets Partnership, I am writing this letter in support of the PUD-G 36 rezoning application and large development review framework for the Cherry Creek West project located at 2500 East 1st Avenue.

The mission of the Denver Streets Partnership is to advocate for the cultural and systemic changes necessary to reduce our city's unsustainable dependence on cars and to design communities that put people first. The Cherry Creek West plan and rezoning aligns with this mission by **significantly upgrading the pedestrian and bicycle network** in the area and establishing meaningful and **enhanced Transportation Demand Management (TDM) strategies** and regulations for the site. By delivering **affordable housing** units in line with the City's Expanding Housing Affordability (EHA) goals for a high impact site, the development will enable more people who work in Cherry Creek to afford to live in the neighborhood, and to benefit from direct access to the upgraded pedestrian and bicycle network, as well as the planned Bus Rapid Transit (BRT) routes along both University Boulevard and 1st Avenue. We are pleased that the **Infrastructure Master Plan (IMP) also includes safety improvements** on both of these streets, which are part of Denver's High Injury Network, and urge the City and East West Partners to

prioritize people walking, biking, rolling and accessing transit when finalizing the details of these improvements.

Quality infill development like Cherry Creek West helps to achieve the concept of a 15-minute neighborhood and is exactly what a healthy, growing and thriving City needs.

I encourage the Denver City Council to approve this project and rezoning application and appreciate the partnership between the City, community, and developer that is evident in the rezoning application and large development framework documents (Infrastructure Master Plan, Housing Agreement, Development Agreement).

Sincerely,

A handwritten signature in cursive script that reads "Jill Locantore". The signature is written in black ink on a white background.

[Report Suspicious](#)

Dear Ms. Penafiel,

- My name is Greg Holm, I have lived in the West Washington Park neighborhood of Denver for 35 years. I'm writing in support of the Cherry Creek West project.
- I am citizen of Denver concerned about the crisis of housing availability and affordability as well as the injustice caused by the City of Denver's ill-conceived zoning policies, which are designed primarily to meet the needs and desires of current single-family homeowners, the wealthiest cohort of Denver's population
- Housing is a human right which should be available and affordable for all Denver residents, at all income levels and at all stages of life. The Mayor and City Council are morally obligated to change policy to remove regulatory roadblocks to allow robust housing development
- High end housing development in high opportunity, high income neighborhoods has been empirically shown (using analysis of moving chains) to reduce displacement and gentrification and reduce the cost of housing in lower income neighborhoods – citations below:
 - Bratu, Cristina and Harjunen, Oskari and Saarimaa, Tuukka, City-wide Effects of New Housing Supply: Evidence from Moving Chains (August 31, 2021). VATT Institute for Economic Research Working Papers 146, Available at SSRN: <https://ssrn.com/abstract=3929243> or <http://dx.doi.org/10.2139/ssrn.3929243>
 - Mast, Evan. 2019. "The Effect of New Market-Rate Housing Construction on the Low-Income Housing Market." Policy Brief. Kalamazoo, MI: W.E. Upjohn Institute for Employment Research. <https://doi.org/10.17848/pb2019-13>
- Suburban development of single-family homes has only a very small impact on the cost of housing in the urban core – the only way to reduce the cost of housing in central cities is increased density in the urban core – citation below:
 - French, Robert and Valentine, Gilbert, Suburban Housing and Urban Affordability: Evidence from Residential Vacancy Chains (April 30, 2024), Joint Center for Housing Studies of Harvard University
- Broad upzoning has been empirically shown to result in swift and large increases in residential construction – housing starts tripled over just 9 years in Auckland, NZ following first a 2013 partial and then a 2016 full upzone – citation below:
 - Politano, Joseph, New Zealand's Building Boom – And What the World Must Learn From It (March 21, 2024) Apricitas Economics
- Denver is the 7th most costly housing market in the U.S. (Fox 31) and, accounting for the ratio of income to housing cost, Denver is the 5th least affordable city (DBJ) Our housing crisis results primarily from two key factors:

- restriction of housing supply due to City of Denver's restrictive zoning and building codes.
- the lock-up of 77% of the land in the City of Denver in exclusionary single-family zoning, which results in all other land uses competing for sites in the remaining 23% of land in the city.
- The City of Denver recently estimated that there are 46,000 extremely burdened residents, paying 50% or more of their income for housing – in response, the City of Denver passed the Expanding Housing Affordability Act – this response is totally inadequate.
 - Per the Denver Post - from 2017 – 2021 only 5,120 apartments were built in Denver each year.
 - At that rate, if Expanding Housing Affordability results in an average of 10% affordable units, it will take 92 years to provide these 46,000 residents with affordable housing. (Denver Post 12/2/2021).
 - To remedy the housing crisis the City of Denver needs an explosion of housing construction of various types, size and cost in every neighborhood throughout the city
 - Given the above factors it is critical that CPD, Planning Board and City Council consistently approve housing projects, **especially high-density projects in high opportunity, high income neighborhoods, such as Cherry Creek West**
 - In addition, the City of Denver needs to follow the example of Auckland, NZ and broadly upzone all neighborhoods to unleash housing construction to increase both availability and affordability

Dear Ms. Peñafiel,

As a nearby Denver resident, and General Manager of Cherry Creek Shopping Center, I am writing this letter in support of the PUD-G 36 rezoning application and large development review framework for the Cherry Creek West project located at 2500 East 1st Avenue. The Cherry Creek West plan and rezoning delivers on a wide range of City and neighborhood goals and priorities, including but not limited to:

- **Connecting the surrounding neighborhoods to the Creek** and Cherry Creek Trailway—delivering on the namesake of the neighborhood and visions set forth in numerous neighborhood planning efforts over the years.
- Setting forth PUD zoning regulations, design standards and guidelines, and design review processes (CCN DAB) to ensure this important site will be held to **very high standard of development** and in line with the surrounding Cherry Creek area.
- Delivering **affordable housing** units in line with the City’s Expanding Housing Affordability (EHA) goals for a high impact site—enabling more people who work in Cherry Creek to afford to live in the neighborhood.
- Providing substantially **more open space than required** and the first meaningful open spaces and community gathering spaces to the Cherry Creek area in many years.
- **Significantly upgrading the pedestrian and bicycle network** in the area and establishing meaningful and enhanced **Transportation Demand Management (TDM)** strategies and regulations for the site.
- Performing a full traffic and mobility study and **delivering improvements outlined in the Infrastructure Master Plan (IMP)**.

Quality infill development like Cherry Creek West helps to achieve the concept of a 15-minute neighborhood and is exactly what a healthy, growing and thriving City needs.

East West Partners has done an extensive amount of community and neighborhood outreach over the past 2.5 years and has been a good partner to surrounding community and numerous City agencies—each of which has asked for a lot.

I strongly urge the Denver City Council to approve this project and rezoning application and appreciate the partnership between the City, community, and developer that is evident in the rezoning application and large development framework documents (Infrastructure Master Plan, Housing Agreement, Development Agreement).

Sincerely,

J.T. Fulton, CRRP, CRX, CLS, CSM

Dear Ms. Peñafiel,

I am writing this letter in support of the Cherry Creek West project and rezoning bounded by 1st Avenue, University Blvd, Clayton Street, and the Cherry Creek Trail.

Cherry Creek West delivers on a wide range of City goals and priorities, including but not limited to providing mixed-use development in the City's urban core, affordable housing and housing supply, publicly accessible open space, pedestrian and bike improvements, transportation demand management (TDM), and customized zoning with an emphasis on high-quality design.

It is clear how East West Partners' vision for the site closely aligned with the goals and recommendations in the Cherry Creek Area Plan and Blueprint Denver.

I am excited for this project move forward, as it has been under review and in discussions with the community for well over two years. I strongly urge Denver City Council to approve this project based on the significant number of public benefits and improvements it will bring to the Cherry Creek area and Denver as a whole.

Thank you for the opportunity to provide my support for Cherry Creek West.

Sincerely,

Jeff Robert

Dear Ms. Peñafiel,

As a nearby Denver resident in the Hilltop area, I am writing this letter in support of the rezoning application and large development review framework for the Cherry Creek West project located at 2500 East 1st Avenue. I have grown up in the Cherry Creek area my whole life, as I attended East High school and then CU Boulder. I believe the Cherry Creek West plan delivers on goals that would be beneficial to my community. The most important to me is the connecting the surrounding neighborhoods to the Creek and Cherry Creek Trailway. The project offers more open space and community gathering that is important to our neighborhood. Cherry Creek has changed over many years, and the development would upgrade the pedestrian and bicycle network. I also believe that Cherry Creek has gotten very expensive and I believe we need more affordable housing units which the development provides.

I strongly urge the Denver City Council to approve this project.

Sincerely,

Emma Eckenhausen

Hi Francisca & Amanda - I'm writing to put on record my support for the Cherry Creek West project East West Partners is proposing.

I have reviewed plans, and as a Realtor in Denver for 20 years, and a Denver resident, I endorse the project, as projects like this help stop urban sprawl and consequently help the environment, as well as improve quality of life for residents and business owners by promoting walkability.

My qualifications for endorsement include serving two terms on the Board of Directors at the Denver Association of Realtors, and serving on Mayor Hancock's Housing Task Force.

Thank you for your time and attention on this - don't hesitate to reach out to me if there is anything more I can do to give support to this fine project - David Browning

Dear Ms. Peñafiel,

As a nearby Denver resident I am writing this letter in support of the PUD-G 36 rezoning application and large development review framework for the Cherry Creek West project located at 2500 East 1st Avenue. The Cherry Creek West plan and rezoning delivers on a wide range of City and neighborhood goals and priorities. For me, the most important aspect of this development is the addition of green space in the neighborhood. As a parent to two grade-school kids I know that more fun and active open space is needed and will be enjoyed by families throughout the nearby neighborhoods. I look forward to walking with our kids to the new green spaces and community gathering areas.

I strongly urge the Denver City Council to approve this project and rezoning application and appreciate the partnership between the City, community, and developer that is evident in the rezoning application and large development framework documents (Infrastructure Master Plan, Housing Agreement, Development Agreement).

Sincerely,

Stacie Loucks

Dear Ms. Peñafiel,

Based on the attached Fact Sheet and as a nearby Denver resident I am writing this letter in support of the PUD-G 36 rezoning application and large development review framework for the Cherry Creek West project located at 2500 East 1st Avenue. The Cherry Creek West plan and rezoning delivers on a wide range of City and neighborhood goals and priorities. For me the most important aspect of the development is the reconnection to the street grid and the bicycle and pedestrian upgrades. Me and my family ride our bikes throughout the CCN neighborhood often and having additional bike facilities will be extremely beneficial. In addition the creation of a grid system within the property will make it much more walkable for me and my family. We look forward to using the green spaces and community gathering areas. I strongly urge the Denver City Council to approve this project and rezoning application and appreciate the partnership between the City, community, and developer that is evident in the rezoning application and large development framework documents (Infrastructure Master Plan, Housing Agreement, Development Agreement).

Dear Ms. Peñafiel,

I am writing you today in support of the Cherry Creek West project and rezoning bounded by 1st Avenue, University Blvd, Clayton Street, and the Cherry Creek Trail.

Cherry Creek West is a well thought out redevelopment that will deliver on a wide range of City goals and priorities. This includes, but is not limited to, providing a mixed-use development in the City's urban core, affordable housing, publicly accessible open space, pedestrian and bike improvements, transportation demand management (TDM), and customized zoning with an emphasis on high-quality design.

East West Partners' vision for the site closely aligned with the goals and recommendations in the Cherry Creek Area Plan and Blueprint Denver which is a critical for Planning Board and City Council to approve the proposed rezoning for the project. I am excited for this project to move forward, it has been under review and in discussions with the community for well over two years. I strongly urge City Council to approve this project based on the significant number of public benefits and improvements it will bring to the Cherry Creek area and Denver as a whole.

I support the proposed rezoning for Cherry Creek West and respectfully ask for the Planning Board and City Council to approve this rezoning and adopt the vision for Cherry Creek West.

Sincerely,

Keith Pryor, Resident and Business owner of Denver

Dear Ms. Peñafiel,

Hope you are well!

We are writing this letter in support of the PUD-G 36 rezoning application and large development review framework for the Cherry Creek West project located at 2500 East 1st Avenue.

Our family has lived in the nearby Country Club/Cheesman Park neighborhood for the last 10 years, and we believe that the Cherry Creek West plan and rezoning delivers on a wide range of City and neighborhood goals and priorities, including:

- Providing substantial green space in a more urban setting to complement the existing park spaces of Cheesman, Little Cheesman, Wash Park, and the Cherry Creek Trail.
- Improved access to Cherry Creek Trail, with access to ground-floor retail amenities.
- Design guidelines for an infill development to replace predominantly soulless parking lots.
- Delivering affordable housing units in line with the City's Expanding Housing Affordability

We would love to see walkable sidewalks connecting every street in our neighborhood, especially as families walk on 3rd and 4th Streets to and from University Blvd and Cherry Creek North. This would help to further reduce vehicle traffic within the larger neighborhood and increase pedestrian safety.

We're also excited to see a local quality developer, like East West Partners, bring this vision to life by incorporating input from the community and showing thoughtfulness to the long-term impacts.

We strongly urge the Denver City Council to approve this project and rezoning application and appreciate the partnership between the City, community, and developer that is evident in the rezoning application and large development framework documents (Infrastructure Master Plan, Housing Agreement, Development Agreement).

Sincerely,
Tom and Natacha Kiler

Denver Planning Board,

I am a commercial and residential real estate appraiser, a resident of Virginia Village who offices in Cherry Creek East, a former member of the Cherry Creek Steering Committee when I lived in Cherry Creek North for some 25 years, a current member of the Board of Transportation Solutions and a former member of the Board of Directors of RTD. I write to support approval of the PUD-G 36 application for the Cherry Creek West project at 2500 East 1st Avenue.

Based on the presentations I have observed by the developer, East West Partners and my review of the application, I see that development of Cherry Creek West based on the submitted plan and application will activate an underused site which has very adequate infrastructure. The development will fulfill many City and neighborhood goals and priorities including expanded affordable housing, more open space than required, improved mobility through Transportation Demand Management (TDM), implementation of Blueprint Denver, and connection of Cherry Creek North with the Cherry Creek Trail.

As a long-time nearby resident and business owner I suggest that the Denver Planning Board and City Council approve this application.

Dear Ms. Peñafiel,

I am writing this letter in support of the Cherry Creek West project and rezoning bounded by 1st Avenue, University Blvd, Clayton Street, and the Cherry Creek Trail.

Cherry Creek West delivers on a wide range of City goals and priorities, including but not limited to providing mixed-use development in the City's urban core, affordable housing and housing supply, publicly accessible open space, pedestrian and bike improvements, transportation demand management (TDM), and customized zoning with an emphasis on high-quality design.

It is clear how East West Partners' vision for the site closely aligned with the goals and recommendations in the Cherry Creek Area Plan and Blueprint Denver.

I am excited for this project to move forward, as it has been under review and in discussions with the community for well over two years. I strongly urge Denver City Council to approve this project based on the significant number of public benefits and improvements it will bring to the Cherry Creek area and Denver as a whole.

Thank you for the opportunity to provide my support for Cherry Creek West.

Sincerely,
Emily Tracy

Strong opposition

Your comment:

The Polo Club North Condominium Association at 2552 E Alameda Avenue, consisting of 126 Units, opposes the scope and size of the Cherry Creek West redevelopment proposed by East West Partners. The traffic corridors around Cherry Creek are already overloaded with cars traveling through Cherry Creek from the east and south, or coming to Cherry Creek for work, or to shop. We support planned redevelopment with less density, and transportation designed to take the burden off local neighborhoods streets

Strong opposition

Your comment:

Dear City Council and Planning Board Members,

I am writing to express my strong concerns regarding the proposed Cherry Creek West project by East West Partners. After careful consideration of the plans, I believe the current proposal is excessively dense and requires significant revisions to address issues of density, traffic, and congestion.

The scale of this mixed-use development project is alarming; the density is far too intense for the Cherry Creek area. This level of development will undoubtedly lead to increased traffic congestion and strain our local infrastructure.

It appears that the planning board is granting East West Partners an undue amount of flexibility and concessions. The proposed rezoning to allow for buildings up to 13 stories tall raises concerns about whether the interests of developers are being prioritized over those of residents and the community at large.

The traffic impact of this development cannot be overstated. Cherry Creek is already experiencing congestion issues, and adding such a significant number of new residents, office workers, and retail customers will only exacerbate this problem. The developer's claims about traffic mitigation measures should be scrutinized much more rigorously.

Furthermore, the proposed building heights of up to 13 stories are completely out of character with the adjacent Cherry Creek Mall. This will create a stark contrast to the existing urban landscape and set a concerning precedent for future developments in the area.

I urge the city council and planning board to reconsider the current proposal and require East West Partners to significantly scale back their plans. We need development that respects the existing character of Cherry Creek and doesn't overwhelm our infrastructure. The current proposal for Cherry Creek West fails on both counts.

Additionally, this project with the new development at the Sear's site and other developments just a couple of blocks away in Cherry Creek is TOO MUCH TOO SOON.

It's time for our city officials to stand up for the residents of Denver and demand a more reasonable, less dense development plan for Cherry Creek West and the surrounding neighborhood. The future livability and character of our community depend on it.

Sincerely,
Julie Thomas

Moderate opposition

Your comment:

The proposed project will increase traffic and density to an area that already suffers from heavy traffic due to limited access points and increased residential and office density. It is important that the developer work closely with the City of Denver and the Cherry Creek Steering Committee stakeholders to mitigate the negative impacts on traffic and quality of life during construction and after completion of the proposed project. As such, the project should not be approved until the developer signs a Community Benefit Agreement that aligns with what the developer presented to Cherry Creek Steering Committee stakeholders. Thank you for your consideration.

Your comment:

Dear Planning Board Members,

As residents/property owners in Cherry Creek for over two decades, we generally favor improvement to the area. However, the current plans under consideration for Cherry Creek West presented by East-West Partners have us concerned.

We urge to Board Members to complete their due diligence by seeing to it that East-West Partners agrees IN WRITING to safeguards and guarantees regarding building heights, densities, open space, and control of construction impacts. Will you ensure a signed Community Benefit Agreement, reflecting the desires of the Cherry Creek Steering Committee, is in place prior to the Board granting approval of the project?

Looking for your support, as we hope to support you.

Sincerely,
Edward Beckman & Michael Parra

Strong support

Your comment:

To the Denver Planning Board

My name is Arthur Lewis

I was born in Denver and have lived in the 100 block of Vine St. for over 20 years.

I live about as close as one can live to this project.

I am in support of the project and think it will be a great benefit for economic development and tax revenue. I wish the buildings were built higher. During this process I hope you have confirmed that these developers have the financing and resources to make this project a reality- the last thing we want is a half built building or development.

Thank you

Arthur Lewis

Your comment:

As a member of Cherry Creek East Neighborhood Association and the Cherry Creek Steering Committee, I am supportive of the "Development and Community Benefit Agreement" being presented today by Lou Raders, chair of the CCSC. Without the execution of this agreement, I cannot in good faith support this project for all the reasons that Ms. Raders will be enumerating today! Thank you for your attention and due consideration of this agreement and it's importance for the future impact of this immense project on the Cherry Creek community.

Respectfully,
Brooks H Waldman

Dear Ms. Peñafiel and Councilmember Sawyer,

As a Denver resident who lives walking distance from the Cherry Creek neighborhood, I am writing in support of the PUD-G 36 rezoning application and large development review framework for the Cherry Creek West project.

Quality infill development like Cherry Creek West helps to achieve the concept of a 15-minute neighborhood and is exactly what Denver needs. I am particularly supportive of the intentional ways East West Partners has addressed affordable housing, connections to surrounding neighborhoods like mine, upgrades to pedestrian and bicycle accessibility, and overall traffic management. East West Partners has also impressed me with their extensive community and neighborhood outreach and willingness to adapt their planning to these diverse stakeholder priorities.

I strongly urge City Council to approve this project and rezoning application and appreciate the strength of partnership among the City, community, and developer.

Thank you for your consideration.

Dear Ms. Peñafiel,

As a nearby Denver resident, I am writing this letter in support of the PUD-G 36 rezoning application and large development review framework for the Cherry Creek West project located at 2500 East 1st Avenue. The Cherry Creek West plan and rezoning delivers on a wide range of City and neighborhood goals and priorities. For me, the most important issue is the delivery of affordable housing units that will enable people who work in Cherry Creek to afford to live in the neighborhood and also add to the overall supply of affordable housing in Denver. This project will also create an influx of market rate units to assist with overall supply issues that create affordable housing issues.

I strongly urge the Denver City Council to approve this project and rezoning application and appreciate the partnership between the City, community, and developer that is evident in the rezoning application and large development framework documents (Infrastructure Master Plan, Housing Agreement, Development Agreement).

I am a Hilltop resident and am writing in support of the PUD-G 36 rezoning application and large development review framework for the Cherry Creek West project located at 2500 East 1st Avenue.

The Cherry Creek West plan and rezoning delivers on a wide range of citywide and neighborhood goals and priorities. Those most important to me are:

- Creating more housing, and in particular, more affordable housing, in an area that has seen prices skyrocket and housing types move in the direction of massive, single-family estates.
- Creating density at a level that can support real transit ridership and service; transit-oriented development is essential if we going to have a real transit system in the city.
- Connecting the surrounding neighborhoods to the Cherry Creek Trailway and to the creek and providing vitally important open space.
- Placemaking – creating public spaces that encourage community gathering and support community-serving businesses.
- Real commitment to matching new development with transportation (in every mode) including significant improvements to bike and pedestrian networks.
- Launching a full traffic and mobility study and delivering improvements outlined in the Infrastructure Master Plan (IMP).

I strongly urge the Planning Board to recommend approval and the Denver City Council to approve this project and rezoning application and appreciate the partnership among the City, community, and developer that is evident in the rezoning application and large development framework documents (Infrastructure Master Plan, Housing Agreement, Development Agreement).

Sent via email to: Francisca.Penafiel@Denvergov.org

Dear Ms. Peñafiel,

As a Principal at Tryba Architects and a nearby Denver resident living in Congress Park , I am writing this letter in support of the PUD-G 36 rezoning application and large development review framework for the Cherry Creek West project located at 2500 East 1st Avenue.

East West Partners has gone above and beyond to conduct community and neighborhood outreach over the past 2.5 years and has been a good partner to the surrounding community. The plan meets the many goals of our City's Comprehensive Plan and helps to densify our city in the right place, adjacent to an amazing trail network and the livable urban neighborhood of Cherry Creek North. They have been patient with and agreeable to countless City agencies throughout a process that in other cities would have taken mere months. We should be lucky to have East West developing on this site in Denver, not punishing them with 2.5 years of entitlement work.

I strongly urge the Denver City Council to approve this project and rezoning application and appreciate the partnership between the City, community, and developer that is evident in the rezoning application and large development framework documents (Infrastructure Master Plan, Housing Agreement, Development Agreement).

Sincerely,

Sarah Komppa, Principal

Your comment:

I am not objecting to development of this parcel by East/West, the chosen lessee of the property owner, The Temple Hoyne Buell Foundation.

The serious issue for Planning Board to be aware of is this PUD's application for allowances that do not identify or guarantee what has been presented to the public. Support for the project has been growing because of the site specific, confirmed number and location of building, their height, and the amenities, both built and open space/Cherry Creek accessible. The PUD application seeks approval for broad interpretations of site build out. This project will take the next decade to complete, so it is imperative for the residential neighborhoods within statistical Cherry Creek and their neighbors to the south, north and northeast, that a site specific Development Agreement with Community Benefits clarify the site specific build out and amenities confirmed in the East/West presentations, include a process for monitoring the DACB expectations for the build out, and provide a road map for expected outcomes for Cherry Creek West until its successful completion. It is my understanding that there is already work underway by the Cherry Creek Steering Committee (whose residential members represent the relevant RNOs impacted by Cherry Creek West.) How frustrating if the property owner and the developer cannot work with their residential neighbors toward a DACB after garnering support for what could be such a jewel for Cherry Creek. Thank you for considering my comments. Respectfully, Barbara H Metzger, 242 S Monroe St 80209

Dear Ms. Peñafiel,

As a resident of Crestmoor and a business owner with an office in Cherry Creek (American National Bank building), I am writing this letter in support of the PUD-G 36 rezoning application and large development review framework for the Cherry Creek West project located at 2500 East 1st Avenue. The Cherry Creek West plan and rezoning delivers on a wide range of City and neighborhood goals and priorities, including but not limited to:

- **Connecting the surrounding neighborhoods to the Creek** and Cherry Creek Trailway—delivering on the namesake of the neighborhood and visions set forth in numerous neighborhood planning efforts over the years.
- Setting forth PUD zoning regulations, design standards and guidelines, and design review processes (CCN DAB) to ensure this important site will be held to a **very high standard of development** and in line with the surrounding Cherry Creek area.
- Delivering **affordable housing** units in line with the City’s Expanding Housing Affordability (EHA) goals for a high-impact site—enabling more people who work in Cherry Creek to afford to live in the neighborhood.
- Providing substantially **more open space than required** and the first meaningful open spaces and community gathering spaces to the Cherry Creek area in many years.
- **Significantly upgrading the pedestrian and bicycle network** in the area and establishing meaningful and enhanced **Transportation Demand Management (TDM)** strategies and regulations for the site.
- Performing a full traffic and mobility study and **delivering improvements outlined in the Infrastructure Master Plan (IMP)**.

Quality infill development like Cherry Creek West helps to achieve the concept of a 15-minute neighborhood and is exactly what a healthy, growing and thriving City needs.

East West Partners has done an extensive amount of community and neighborhood outreach over the past 2.5 years and has been a good partner to surrounding community and numerous City agencies—each of which has asked for a lot.

I strongly urge the Denver City Council to approve this project and rezoning application and appreciate the partnership between the City, community, and developer that is evident in the

rezoning application and large development framework documents (Infrastructure Master Plan, Housing Agreement, Development Agreement).

Sincerely,

Brad Cornell

Dear Ms. Peñafiel,

We're writing in support of the PUD-G 36 rezoning application and large development framework for East West Partners Cherry Creek West project located at 2500 East 1st Ave. in Denver. We bought our first property in the Platte Park neighborhood in the 1990's. We frequent the Cherry Creek area for pleasure and for work, on a regular basis. We feel the rezoning and development plan outlined in the application and the project website will add value and beauty to the area along the main arteries and the creek. The development will provide the residential owners, office tenants and visitors with much needed open space. Some of the highlights include but are not limited to:

- Access to upgraded, well-organized bike paths that take advantage of the creek, which we all enjoy.
- Opportunities for special events in newly developed open space for people to gather and connect.
- Enhanced green space, crucial in a highly populated area with surrounding buildings.
- Provide affordable living and working quarters for people who may not otherwise be able to afford this area. With guidance from the design board, this could mean many local lives could

be changed for the better.

- Gets rid of acres of unsightly, impervious parking spaces and adds underground parking spaces and porous green zones.
- Traffic engineering will help the flow of traffic for the increased population in residential units.

We personally urge you to approve the development and rezoning application and we look forward to seeing these improvements take hold to beautify one of our favorite spots in Denver.

Thank you for your time.

Susan and Ken Dlin
Denver property and business owners

Dear Ms. Peñafiel,

As a nearby Denver resident, I am writing this letter in support of the PUD-G 36 rezoning application and large development review framework for the Cherry Creek West project located at 2500 East 1st Avenue. The Cherry Creek West plan and rezoning delivers on a wide range of City and neighborhood goals and priorities, including but not limited to:

Connecting the surrounding neighborhoods to the Creek and Cherry Creek Trailway—delivering on the namesake of the neighborhood and visions set forth in numerous neighborhood planning efforts over the years.

- Setting forth PUD zoning regulations, design standards and guidelines, and design review processes (CCN DAB) to ensure this important site will be held to **very high standard of development** and in line with the surrounding Cherry Creek area.
- Delivering **affordable housing** units in line with the City’s Expanding Housing Affordability (EHA) goals for a high impact site—enabling more people who work in Cherry Creek to afford to live in the neighborhood.
- Providing substantially **more open space than required** and the first meaningful open spaces and community gathering spaces to the Cherry Creek area in many years.
- **Significantly upgrading the pedestrian and bicycle network** in the area and establishing meaningful and enhanced **Transportation Demand Management (TDM)** strategies and regulations for the site.
- Performing a full traffic and mobility study and **delivering improvements outlined in the Infrastructure Master Plan (IMP)**.

Quality infill development like Cherry Creek West helps to achieve the concept of a 15-minute neighborhood and is exactly what a healthy, growing and thriving City needs.

East West Partners has done an extensive amount of community and neighborhood outreach over the past 2.5 years and has been a good partner to surrounding community and numerous City agencies—each of which has asked for a lot.

I strongly urge the Denver City Council to approve this project and rezoning application and appreciate the partnership between the City, community, and developer that is evident in the rezoning application and large development framework documents (Infrastructure Master Plan, Housing Agreement, Development Agreement).

Sincerely,

Chase Rodawig

Dear Ms. Penafiel –

I have been a resident of Denver, and the operator of a small local business based in Denver for over two decades. My flagship HW Home store had been located in the Clayton Lane development until recently when we relocated to the Cherry Creek Shopping Center. We work with residents, visitors, businesses, and other entities. HW generates sales tax and pays significant property taxes to the city and state. We employ around 40 employees in our operation.

We are well aware of the work of East West Partners as an entity and have been keenly aware of the proposed Cherry Creek West development. We are thrilled to see the details of the new development and extremely pleased to see the classic approach of East West that is about creating the best space for the community and not simply the typical developer concerned with maximum density.

Cherry Creek is tight on space. I can personally attest as I am a local merchant/retailer stuck in the space shortage as we lost our Clayton Lane lease, luckily found short-term space in CCSC, and are looking for our new permanent home. We do not have the balance sheet nor power of a large national chain. We are little and local. We are what makes Cherry Creek special. We are all about our neighbor and our customer.

We implore you to approve this needed expansion in Chery Creek.

Respectfully,

Ron

Dear Ms. Peñafiel,

As a nearby Denver resident in Congress Park and the Executive Director / CEO of CherryArts, I am writing this letter in support of the PUD-G 36 rezoning application and large development review framework for the Cherry Creek West project located at 2500 East 1st Avenue, as recently approved by the Denver Planning Board. The Cherry Creek West plan and rezoning delivers on a wide range of City and neighborhood goals and priorities, including but not limited to:

- **Connecting the surrounding neighborhoods to the Creek** and Cherry Creek Trailway—delivering on the namesake of the neighborhood and visions set forth in numerous neighborhood planning efforts over the years.
- Setting forth PUD zoning regulations, design standards and guidelines, and design review processes (CCN DAB) to ensure this important site will be held to **very high standard of development** and in line with the surrounding Cherry Creek area.
- Delivering **affordable housing** units in line with the City’s Expanding Housing Affordability (EHA) goals for a high impact site—enabling more people who work in Cherry Creek to afford to live in the neighborhood.
- Providing substantially **more open space than required** and the first meaningful open spaces and community gathering spaces to the Cherry Creek area in many years.
- **Significantly upgrading the pedestrian and bicycle network** in the area and establishing meaningful and enhanced **Transportation Demand Management (TDM)** strategies and regulations for the site.
- Performing a full traffic and mobility study and **delivering improvements outlined in the Infrastructure Master Plan (IMP)**.

Quality infill development like Cherry Creek West helps to achieve the concept of a 15-minute neighborhood and is exactly what a healthy, growing and thriving City needs.

East West Partners has done an extensive amount of community and neighborhood outreach over the past 2.5 years and has been a good partner to surrounding community and numerous

City agencies—each of which has asked for a lot.

I strongly urge the Denver City Council to approve this project and rezoning application based upon the improvements it will bring to the area and community. The thoughtful development of a vacant property that will incorporate the natural landscape of the creek, has a vision for green space, walkability, sustainability, trail improvements and affordable housing will be an asset to our community.

Sincerely,
Tara Brickell

Dear Ms. Peñafiel,

As a nearby Denver resident - I live at 1108 Race Street, I am writing this letter in support of the PUD-G 36 rezoning application and large development review framework for the Cherry Creek West project located at 2500 East 1st Avenue, as recently approved by the Denver Planning Board. The Cherry Creek West plan and rezoning delivers on a wide range of City and neighborhood goals and priorities, including but not limited to:

- Connecting the surrounding neighborhoods to the Creek and Cherry Creek Trailway—delivering on the namesake of the neighborhood and visions set forth in numerous neighborhood planning efforts over the years.
- Setting forth PUD zoning regulations, design standards and guidelines, and design review processes (CCN DAB) to ensure this important site will be held to very high standard of development and in line with the surrounding Cherry Creek area.
- Delivering affordable housing units in line with the City’s Expanding Housing Affordability (EHA) goals for a high impact site—enabling more people who work in Cherry Creek to afford to live in the neighborhood.
- Providing substantially more open space than required and the first meaningful open spaces and community gathering spaces to the Cherry Creek area in many years.
- Significantly upgrading the pedestrian and bicycle network in the area and establishing meaningful and enhanced Transportation Demand Management (TDM) strategies and regulations for the site.
- Performing a full traffic and mobility study and delivering improvements outlined in the Infrastructure Master Plan (IMP).

Quality infill development like Cherry Creek West helps to achieve the concept of a 15-minute neighborhood and is exactly what a healthy, growing and thriving City needs.

East West Partners has done an extensive amount of community and neighborhood outreach over the past 2.5 years and has been a good partner to surrounding community and numerous City agencies—each of which has asked for a lot.

I am deeply involved in civic issues, and serve as President of the Bonfil-Stanton Foundation.

Prior to assuming this position and moving to Denver 11 years ago, I worked for the Mayor of Philadelphia and served as Chief Cultural Officer and Director of the Office of Arts, Culture and the Creative Economy for that city, so I am extremely familiar with the issues of how to create and sustain a vibrant livable city. I also am an avid bike rider and proponent of efforts that promote walkability and bikeability (built environment improvements that also benefit people with mobility issues - older people, wheelchair users, people using strollers). This project succeeds on all counts. We also have a crisis of available affordable housing, especially in areas like Cherry Creek, another plus for this project.

I strongly urge the Denver City Council to approve this project and rezoning application and appreciate the partnership between the City, community, and developer that is evident in the rezoning application and large development framework documents (Infrastructure Master Plan, Housing Agreement, Development Agreement).

Sincerely,

Gary Steuer

Dear Ms. Peñafiel,

Hope you are well. As a Cherry Creek area resident (Alamo Placita, but close enough!), I want to express my support for the PUD-G 36 rezoning application and large development review framework for the Cherry Creek West project. The Cherry Creek West plan further drives the neighborhood as a healthy and dynamic lifestyle center and will be a *massive* asset for Denver. More importantly, increasing the stock of rental housing (affordable and market rate) is good for renters – more apartments means more competition amongst owners, which means landlords need to compete for residents with competitive pricing! As a renter, we need to be doing all we can to support new housing projects to keep up with demand.

I will not attempt to speak for the general public but I will voice a few personal opinions (listed below). Ultimately, I want to see Denver continue to evolve as a vibrant, dynamic city and I think we have a unique opportunity with the Cherry Creek West project. Very excited to see the finish product when this project is completed!

- More affordable (and market rate!) housing is good for renters – simple supply/demand!
- Love the open space concept – Cherry Creek needs more open space
- Upgrading the pedestrian bike infrastructure is a win for all (but particularly for us bikers!)

I strongly support the Cherry Creek West project and I hope my voice has been heard. Appreciate you all for considering my opinion. I think it's a no-brainer!

Best,
Adam

- **Significantly upgrading the pedestrian and bicycle network** in the area and establishing meaningful and enhanced **Transportation Demand Management (TDM)** strategies and regulations for the site.
- Performing a full traffic and mobility study and **delivering improvements outlined in the Infrastructure Master Plan (IMP)**.

Quality infill development like Cherry Creek West helps to achieve the concept of a 15-minute neighborhood and is exactly what a healthy, growing and thriving City needs.

East West Partners has done an extensive amount of community and neighborhood outreach over the past 2.5 years and has been a good partner to surrounding community and numerous City agencies—each of which has asked for a lot.

I strongly urge the Denver City Council to approve this project and rezoning application and appreciate the partnership between the City, community, and developer that is evident in the rezoning application and large development framework documents (Infrastructure Master Plan, Housing Agreement, Development Agreement).

Sincerely,
Lizzy Wagner

[Report Suspicious](#)

Dear Ms. Peñafiel,

As a nearby Denver resident who has lived in Parkhill for over 20 years, I am writing this letter in support of the PUD-G 36 rezoning application and large development review framework for the Cherry Creek West project located at 2500 East 1st Avenue. While I did copy much of this wording of support from someone more knowledgeable, I could not help but be especially excited about the affordable housing and high standard of development. I work in education and witness how difficult it is for anyone in this industry to live within Denver city limits.

The Cherry Creek West plan and rezoning delivers on a wide range of City and neighborhood goals and priorities, including but not limited to:

- **Connecting the surrounding neighborhoods to the Creek** and Cherry Creek Trailway—delivering on the namesake of the neighborhood and visions set forth in numerous neighborhood planning efforts over the years.
- Setting forth PUD zoning regulations, design standards and guidelines, and design review processes (CCN DAB) to ensure this important site will be held to **very high standard of development** and in line with the surrounding Cherry Creek area.
- Delivering **affordable housing** units in line with the City's Expanding Housing Affordability (EHA) goals for a high impact site—enabling more people who work in Cherry Creek to afford to live in the neighborhood.
- Providing substantially **more open space than required** and the first meaningful open spaces and community gathering spaces to the Cherry Creek area in many years.
- **Significantly upgrading the pedestrian and bicycle network** in the area and establishing meaningful and enhanced **Transportation Demand Management (TDM)** strategies and regulations for the site.
- Performing a full traffic and mobility study and **delivering improvements outlined in the Infrastructure Master Plan (IMP)**.

Quality infill development like Cherry Creek West helps to achieve the concept of a 15-minute neighborhood and is exactly what a healthy, growing and thriving City needs. Besides being a customer in Cherry Creek, I'm also a proponent of Denver benefitting from more substantial investments in submarkets that attract outside talent to the area to help our employment and

residential base in a very competitive national landscape for the best and brightest of talent.

East West Partners has done an extensive amount of community and neighborhood outreach over the past 2.5 years and has been a good partner to surrounding community and numerous City agencies—each of which has asked for a lot.

I strongly urge the Denver City Council to approve this project and rezoning application and appreciate the partnership between the City, community, and developer that is evident in the rezoning application and large development framework documents (Infrastructure Master Plan, Housing Agreement, Development Agreement).

Sincerely,

Kristen Wiley

Re: Architectural Services Proposal

As a Principal Emeritus of 4240 Architecture and lifelong Denver resident I am writing to express my strong support for the PUD-G 36 rezoning application and large development review framework for the Cherry Creek West project. The Cherry Creek West plan and rezoning align with numerous City and neighborhood goals and priorities, including:

- **High Standards of Development:** The PUD zoning regulations, design standards, guidelines, and design review processes (CCN DAB) will ensure that this significant site meets the highest standards of development, consistent with the surrounding Cherry Creek area.
- **Affordable Housing:** The project will provide affordable housing units in line with the City's Expanding Housing Affordability (EHA) goals, allowing more people who work in Cherry Creek to live in the neighborhood.
- **Increased Open Space:** Cherry Creek West will offer substantially more open space than required, introducing the first meaningful open and community gathering spaces to the area in many years.
- **Enhanced Pedestrian and Bicycle Network:** The project will significantly upgrade the pedestrian and bicycle infrastructure and implement enhanced Transportation Demand Management (TDM) strategies and regulations.
- **Traffic and Mobility Improvements:** A comprehensive traffic and mobility study has been conducted, and the project will deliver the improvements outlined in the Infrastructure Master Plan (IMP).

Quality infill development like Cherry Creek West is essential for achieving the concept of a 15-minute neighborhood and is exactly what a healthy, growing, and thriving city needs. East West Partners has demonstrated a strong commitment to community and neighborhood outreach over the past 2.5 years, proving to be a good partner to the surrounding community and numerous City agencies.

I strongly urge the Denver City Council to approve the PUD-G 36 rezoning application and large development review framework for Cherry Creek West.

Sincerely,

Sent via email to: Francisca.Penafiel@Denvergov.org

Dear Ms. Peñafiel,

As a Cherry Creek neighborhood resident and commuter to downtown Denver daily, I am writing this letter in support of the PUD-G 36 rezoning application for the Cherry Creek West project located at 2500 East 1st Avenue.

The Cherry Creek West plan looks to prioritize several concepts that are especially important to me and my family as recent City and Cherry Creek residents:

- Connects the surrounding neighborhoods to the Creek and Cherry Creek Trailway—delivering on the namesake of the neighborhood and visions set forth in numerous neighborhood planning efforts.
- Expands the pedestrian and bicycle network in the area.
- Calls for building affordable housing units which will hopefully enable more people who work in Cherry Creek to afford to live in the neighborhood.
- Provides an increased amount of open space—maybe the first meaningful open spaces and community gathering spaces to the Cherry Creek area in as many years as I have lived in the area.

Well planned mixed-use development like Cherry Creek West helps to bolster the concept of a “live and work within 15-minutes” oriented neighborhood; and begins to bring about what any healthy, growing and thriving city needs—the City of Denver hopefully soon to be both a benefactor and beneficiary of this kind of concerted effort.

I appreciate the neighborhood outreach which I have witnessed over the past couple of years. It looks as if the amalgam of smart professionals and passionate people shepherded by East West Partners to thoughtfully gather and hear all constituents—especially the surrounding community and numerous City agencies—each of which has shared and asked for a lot, has been successful to date and moving forward a model to be replicated.

I strongly urge the Denver City Council to approve this project and rezoning application and appreciate the partnership between City, community, and developer that is evident in the application and large development framework documents (Infrastructure Master Plan, Housing Agreement, Development Agreement).

Sincerely,
Gary D. Clarke
Resident

Dear Ms. Peñafiel,

As a 35 year Denver resident, I am writing this letter in support of the PUD-G 36 rezoning application and large development review framework for the Cherry Creek West project located at 2500 East 1st Avenue. The Cherry Creek West plan and rezoning delivers on a wide range of City and neighborhood goals and priorities, including but not limited to:

- **Connecting the surrounding neighborhoods to the Creek** and Cherry Creek Trailway—delivering on the namesake of the neighborhood and visions set forth in numerous neighborhood planning efforts over the years.
- Setting forth PUD zoning regulations, design standards and guidelines, and design review processes (CCN DAB) to ensure this important site will be held to **very high standard of development** and in line with the surrounding Cherry Creek area.
- Delivering **affordable housing** units in line with the City's Expanding Housing Affordability (EHA) goals for a high impact site—enabling more people who work in Cherry Creek to afford to live in the neighborhood.
- Providing substantially **more open space than required** and the first meaningful open spaces and community gathering spaces to the Cherry Creek area in many years.
- **Significantly upgrading the pedestrian and bicycle network** in the area and establishing meaningful and enhanced **Transportation Demand Management (TDM)** strategies and regulations for the site.
- Performing a full traffic and mobility study and **delivering improvements outlined in the Infrastructure Master Plan (IMP)**.

Quality infill development like Cherry Creek West helps to achieve the concept of a 15-minute neighborhood and is exactly what a healthy, growing and thriving City needs.

East West Partners has done an extensive amount of community and neighborhood outreach over the past 2.5 years and has been a good partner to surrounding community and numerous City agencies—each of which has asked for a lot.

I strongly urge the Denver City Council to approve this project and rezoning application and appreciate the partnership between the City, community, and developer that is evident in the rezoning application and large development framework documents (Infrastructure Master Plan, Housing Agreement, Development Agreement).

Sincerely,

Brian Breitenwischer

Dear City Council:

The City Council will be reviewing a rezoning application for the Cherry Creek West development. While I support the ultimate development of Cherry Creek West, I strongly oppose the developers having an open agenda to build whatever they want that is primarily driven by their profits.

The community is speaking out in solidarity through the Cherry Creek Steering Committee in a Community Benefit Agreement (CBA). There some are key points the CBA has brought to light that are not in the City Rezoning plan. To be specific the number of buildings, height of buildings, percentage of green space, and some restrictions on usage.

As a property owner of 8 years in Cherry Creek and have witness rapid and careless development in the area which you as City Council has approved without proper regard and considerations of the residences' 'quality of life' being considered while such large projects

are approved for benefits of developers only.

Please as a City Council, each member should stand up for the owners both residence and commercial businesses that are going to be effected for the next 10 years of greedy developers. Endorse the CBA and LISTEN to what they are proposing as CBA is the voice of the residences and business owners in the community.

Thank you for your attention to this very important and life changing matter being brought before you.

Sincerely,
Irene Dionne

Dear Ms. Peñafiel,

As a nearby Denver resident living in Cherry Creek North, I am writing this letter in **enthusiastic** support of the PUD-G 36 rezoning application and large development review framework for the Cherry Creek West project located at 2500 East 1st Avenue.

The Cherry Creek West plan and rezoning delivers on a wide range of City and neighborhood goals and priorities, including but not limited to:

- **Connecting the surrounding neighborhoods to the Creek** and Cherry Creek Trailway—delivering on the namesake of the neighborhood and visions set forth in numerous neighborhood planning efforts over the years.
- Setting forth PUD zoning regulations, design standards and guidelines, and design review processes (CCN DAB) to ensure this important site will be held to **very high standard of development** and in line with the surrounding Cherry Creek area.
- Delivering **affordable housing** units in line with the City's Expanding Housing Affordability (EHA) goals for a high impact site—enabling more people who work in Cherry Creek to afford to live in the neighborhood.
- Providing substantially **more open space than required** and the first meaningful open spaces and community gathering spaces to the Cherry Creek area in many years.
- **Significantly upgrading the pedestrian and bicycle network** in the area and establishing meaningful and enhanced **Transportation Demand Management (TDM)** strategies and regulations for the site.
- Performing a full traffic and mobility study and **delivering improvements outlined in the Infrastructure Master Plan (IMP)**.

Quality infill development like Cherry Creek West helps to achieve the concept of a 15-minute neighborhood and is exactly what a healthy, growing and thriving City needs.

East West Partners has done an extensive amount of community and neighborhood outreach over the past 2.5 years and has been a good partner to surrounding community and numerous City agencies—each of which has asked for a lot.

Dear Ms. Peñafiel,

As a person who works in and spends a great deal of time in the Cherry Creek area, I am writing this letter in support of the PUD-G 36 rezoning application and large development review framework for the Cherry Creek West project located at 2500 East 1st Avenue. The Cherry Creek West plan and rezoning delivers on a wide range of City and neighborhood goals and priorities, including but not limited to:

- **Connecting the surrounding neighborhoods to the Creek** and Cherry Creek Trailway—delivering on the namesake of the neighborhood and visions set forth in numerous neighborhood planning efforts over the years.
- Setting forth PUD zoning regulations, design standards and guidelines, and design review processes (CCN DAB) to ensure this important site will be held to **very high standard of development** and in line with the surrounding Cherry Creek area.
- Delivering **affordable housing** units in line with the City’s Expanding Housing Affordability (EHA) goals for a high impact site—enabling more people who work in Cherry Creek to afford to live in the neighborhood.
- Providing substantially **more open space than required** and the first meaningful open spaces and community gathering spaces to the Cherry Creek area in many years.
- **Significantly upgrading the pedestrian and bicycle network** in the area and establishing meaningful and enhanced **Transportation Demand Management (TDM)** strategies and regulations for the site.
- Performing a full traffic and mobility study and **delivering improvements outlined in the Infrastructure Master Plan (IMP)**.

Quality infill development like Cherry Creek West helps to achieve the concept of a 15-minute neighborhood and is exactly what a healthy, growing and thriving City needs. It represents a much needed improvement to the land on which it is located and the adjoining neighborhood.

East West Partners has done an extensive amount of community and neighborhood outreach over the past 2.5 years and has been a good partner to surrounding community and numerous City agencies—each of which has asked for a lot.

I strongly urge the Denver City Council to approve this project and rezoning application and appreciate the partnership between the City, community, and developer that is evident in the rezoning application and large development framework documents (Infrastructure Master Plan, Housing Agreement, Development Agreement).

Sincerely,

James Winter

RE: Cherry Creek West Community Project

Dear Ms. Peñafiel,

My wife and I are contacting you to provide some comments and show our support for the Cherry Creek West project that will be built in our neighborhood. We live less than a mile away, at 7th and Gaylord. We have been residents in the area between the Botanic Gardens and Cherry Creek for 17 years.

We believe this project will have a profound impact on the area for the betterment of those that now live in the area and for those that will occupy the homes and business in the project. Several times a day, we drive by the vacant Bed Bath and Beyond monolith with its massive vacant parking lot. For years, we hoped that this monstrosity would NOT become the home for ANOTHER big box store. We hoped for something more. Some type of development that the area residents would be proud to visit, use and enjoy.

Since we will live close by, we have thoroughly looked at the materials provided on Cherry Creek West. My wife and I believe not only will Denver be proud of this, but it will deliver on many of the City's goals and priorities. We are excited that it will be based on mixed-use development in Denver's urban core. Unlike the massive CC Mall, it provides both affordable housing and local housing. It will have LIFE after the stores close.

And unlike the Mall, it provides truly publicly accessible open space, with pedestrian and bike improvements that will be used. When I first moved to Denver in the 1980s, I was amazed that the Cherry Creek Mall was next to the beautiful Cherry Creek but took NO advantage of it. My wife is former urban planner in the United Kingdom. After moving here 25 years ago, she commented on the first time we tried to cycle around and through the CC Mall area. It was if, she said, the Mall tried to ignore that it was next to a beautiful tree lined creek.

Last but not least, we also have home in the Vail Valley and are familiar with the high-quality development by East West Partners. We have watched over many years how East West Partners has transformed a blighted and ignored area of Avon on the Eagle River into a premier resort and living destination, with recreation and bike paths for all visitors and Vail Valley residents to use. A similar story can be seen in what East West Partners has done with the Snowmass Village base village. This was also a blighted area abandoned by other developers for years. Now, it is a gorgeous focal point that all Aspen and Snowmass residents and area residents, of all stripes, point to in pride.

And as I am sure you are aware; the City of Denver already has numerous East West Partners projects that testify to what it can and will do in its developments. When I first moved to Denver in 1986 to work with Holland & Hart, I remember the urban desert downtown. One afternoon that year, I was helping friends in an old building that was being restored into a restaurant. I had the privilege of spending the afternoon holding a VERY tall and rickety step ladder while an enterprising John Hickenlooper painted the ceiling of what was to become Wynkoop Brewery. And that afternoon, we talked about his visions for downtown Denver. The transformation has surpassed all our dreams. I believe Cherry Creek is next!

My wife and I look forward to the CCW project moving forward. As residents that will be in this neighborhood, we urge the Denver City Council to approve it, as it will provide a tremendous number of public benefits and improvements. Both to Cherry Creek area and Denver as a whole. This project will be something Denver will be proud of and show off, like it already does for the spectacular Union Station and downtown area redevelopment.

Please contact us if you have any questions.

Best regards,
