**Background: Reconstruction of the sidewalk area along 14th Street between Market Street and Colfax Avenue to promote placemaking and create a pedestrian friendly environment. Work within the sidewalk area includes the removal and replacement of the existing curb and gutter and sidewalk. In general, the replacement curb and gutter will be installed at a location further into the street, thus requiring the removal of asphalt and/or concrete pavement and associated patching. To create the pedestrian friendly environment raised granite planters, planter posts, irrigation systems, tree plantings, street pedestrian and accent lighting and wayfinding monuments are to be installed. Once the hard surfaces beyond the curb and gutter are complete, the street will be either reconstructed or planed and overlaid with HMA, and striped to the final cross section which includes parking, a bike lane, and the travel lanes**
