Consistency with Adopted Plans: Blueprint Denver

Downtown Neighborhood Context

- Most dense and active context
- Highest intensity residential and includes largest employment center in Denver
- Gives prominence to the pedestrian realm

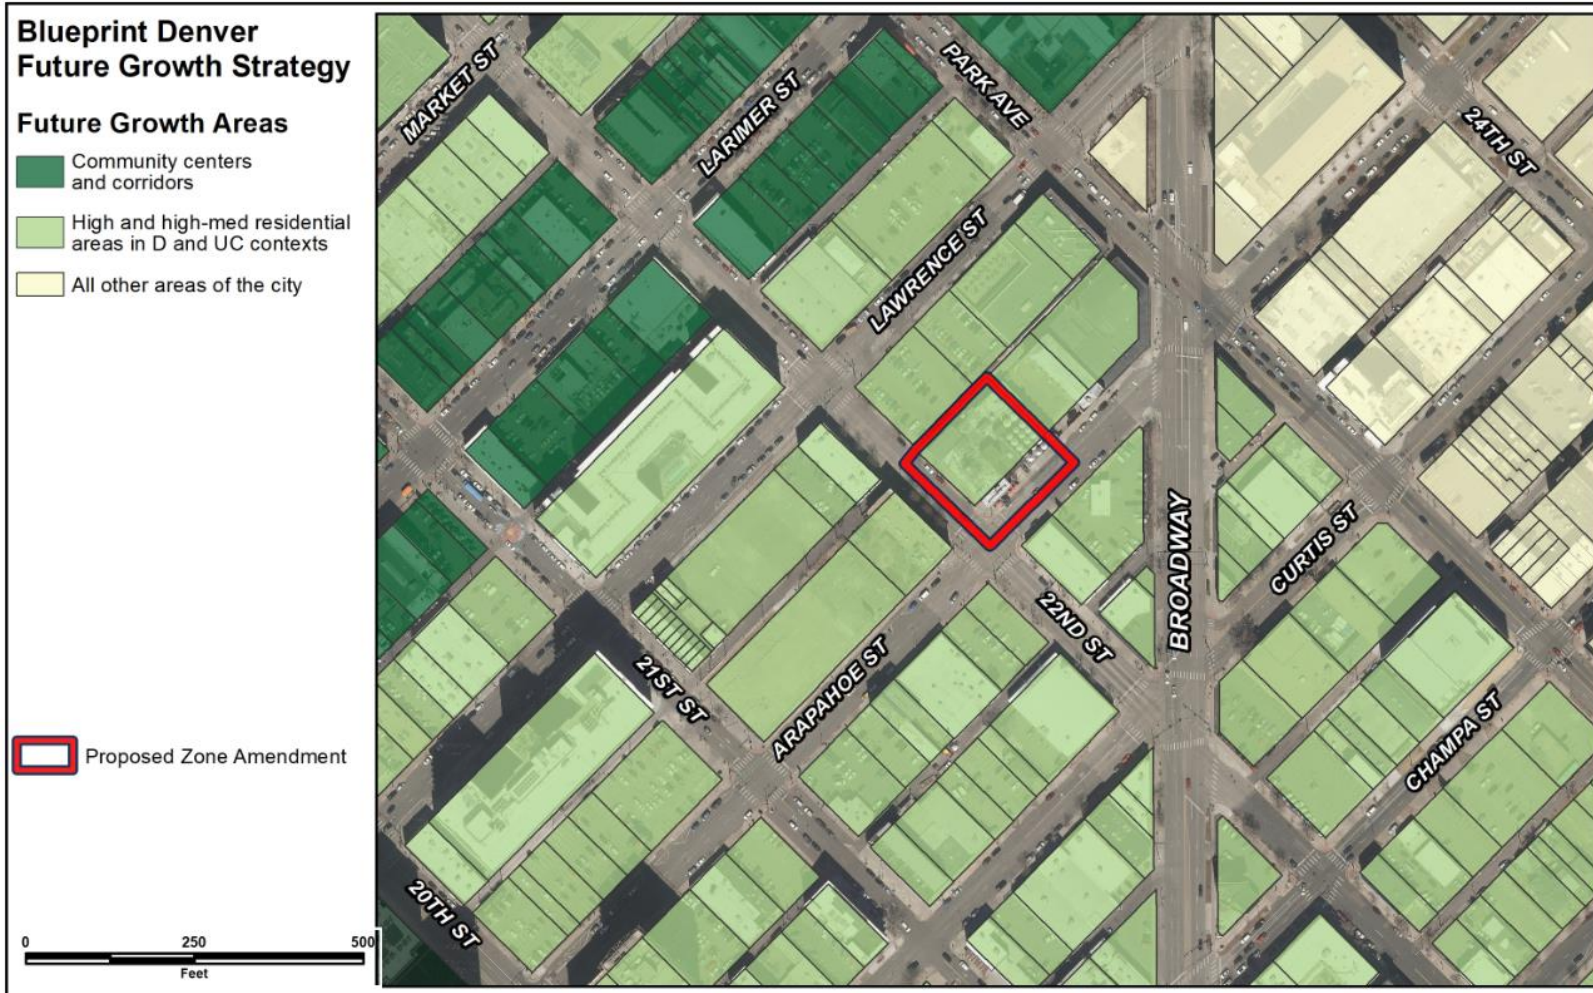

Consistency with Adopted Plans: Blueprint Denver

- **High Residential Area**
 - High mix of uses throughout
 - Most intense and great building heights with very high lot coverage
- **Street Types**
 - Arapahoe and 22nd streets: Downtown Arterial
 - High focus on pedestrian and bike connectivity

Reminder: Evaluating whether the proposed zone district is consistent with the Future Street Classification, but not to assess the traffic impacts of a specific development proposal.

Consistency with Adopted Plans: Blueprint Denver

Growth Area Strategy: High and High-Medium Residential Areas in D- and C- Contexts

- 15% of new housing
- 5% of new employment

Most growth is guided to regional centers, community centers and corridors, select districts and high and medium-high intensity residential areas. Other areas of the city are still expected to see some growth, however more limited.

Consistency with Adopted Plans: Northeast Downtown Neighborhoods Plan (2011)

- Mixed-use areas described as having both a sizeable employment base and variety of mid to high density housing options
- Recommended maximum height of 12 stories (up to 20 stories with point tower form)
- Enhanced building form standards of D-AS-12+ and supplemental DSG consistent with plan direction

Consistency with Adopted Plans: Downtown Area Plan (2007)

- Ideal location for greater range and density of uses
- Recommends small area plans and improvements to pedestrian realm to reinvigorate and revitalize the neighborhood
- Proposed zone district consistent with guidance in Downtown Area Plan
