5. **General description or background of proposed request. Attach executive summary if more space needed:**
(who, what, why)

The Denver Sheriff Department was the subject of a technology support and services audit published in March 2023 (Cybersecurity: Department of Technology Services and Department of Public Safety). The audit identified several findings related to potential cybersecurity vulnerabilities within the Detention Center.

The purchase of the Salient servers is necessary to replace existing hardware that has reached end-of-life status and now presents significant operational and security risks. Continuing to rely on this outdated equipment increases the likelihood of system downtime and exposes the Detention Center to preventable cybersecurity threats. Replacing the servers will ensure the continuity, integrity, and security of essential systems that support the safety of staff, individuals in custody, and facility operations.
