

**TO:** Denver City Council Land Use, Transportation, and Infrastructure Committee  
**FROM:** Courtland Hyser, Senior City Planner  
**DATE:** August 24, 2016  
**RE:** Official Zoning Map Amendment Application #2015I-00175  
3700 Marion St.  
Rezoning from U-SU-A1 to U-MX-2x

## Staff Report and Recommendation

Based on the criteria for review in the Denver Zoning Code, Staff recommends **approval** for application #2015I-00175 for a rezoning from U-SU-A1 to U-MX-2x.

## Request for Rezoning

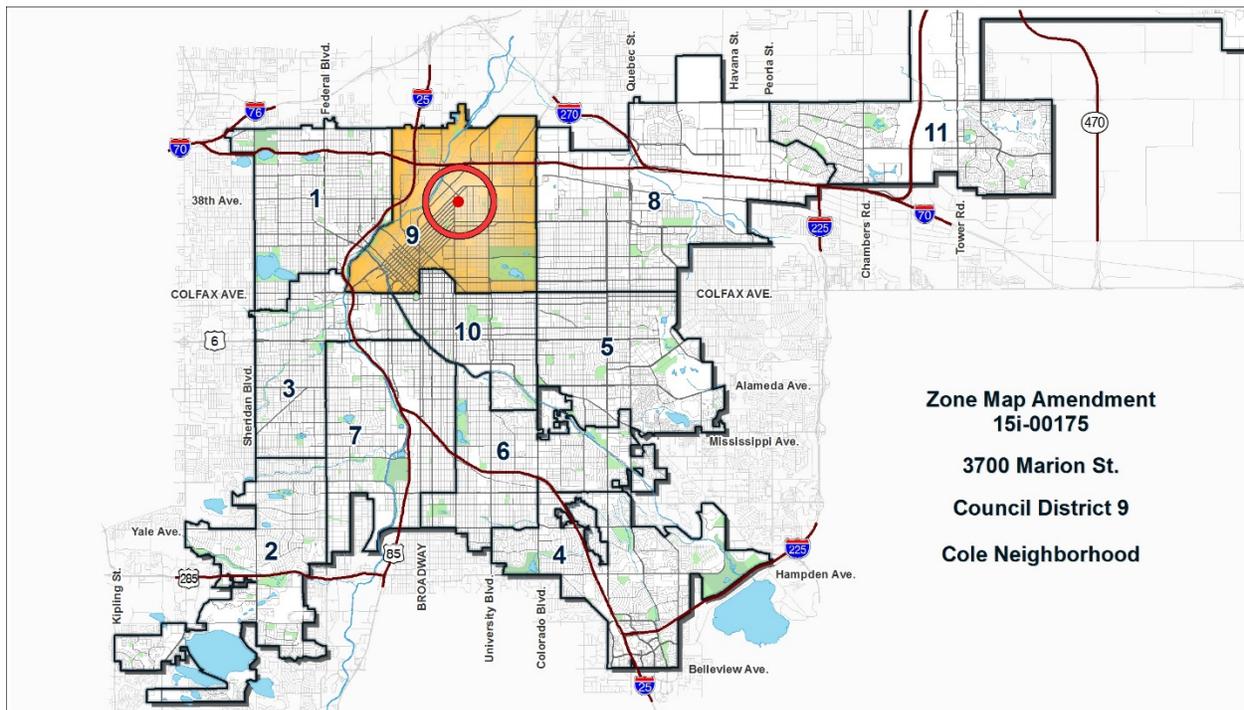

Application:	#2015I-00175
Address:	3700 Marion St.
Neighborhood/Council District:	Cole / Council District 9
RNOs:	Cole Neighborhood Association, Five Points Business District, United Community Action Network, North Neighborhoods Democratic Council, Denver Neighborhood Association, Inter-Neighborhood Cooperation
Area of Property:	4,870 SF (0.11 AC)
Current Zoning:	U-SU-A1
Proposed Zoning:	U-MX-2x
Property Owner(s):	Noah Manos, Cosmo LTD

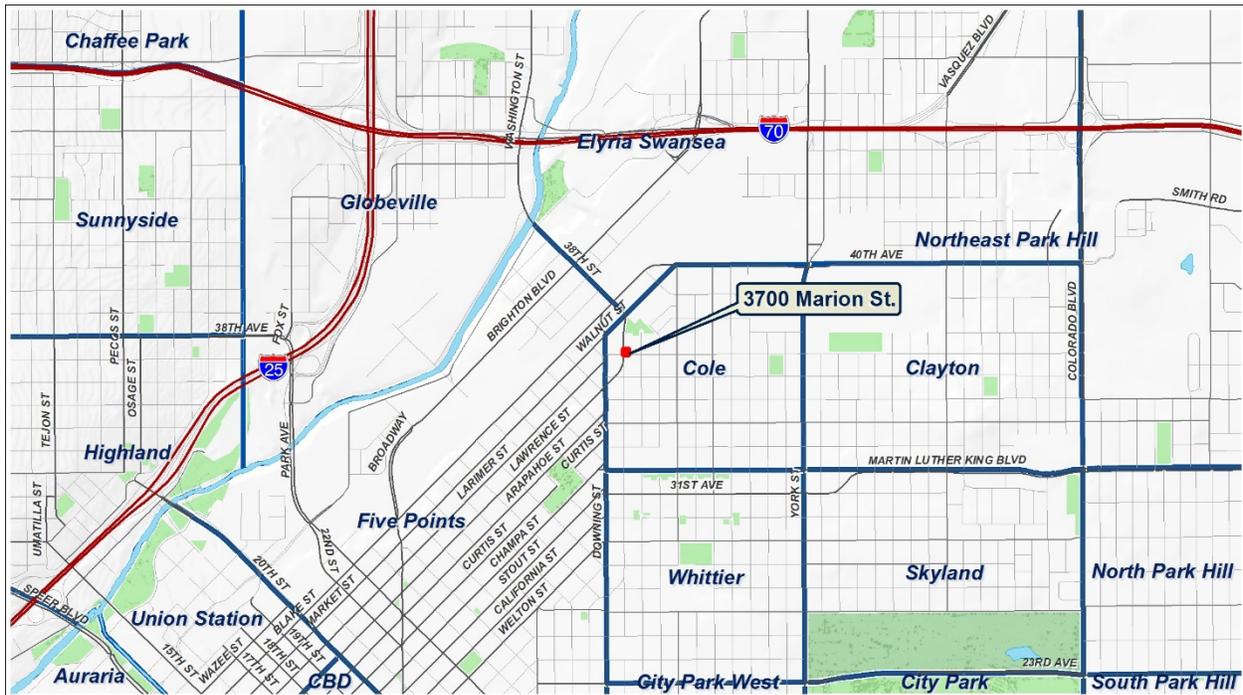

## Summary of Rezoning Request

- The subject property is located in Cole at the intersection of Marion Street and 37<sup>th</sup> Avenue. The property is currently vacant, but formerly held an 8 unit apartment building that was constructed in the early 1900s. The building caught fire and was subsequently demolished in 2014.
- The structure that formerly occupied the site was originally constructed as a shopfront building that was later converted to multi-unit residential.
- In the 2010 citywide rezoning, many embedded commercial buildings in Cole, and on 37<sup>th</sup> Ave in particular, were rezoned to U-MX-2x. The subject property would likely have been zoned U-MX-2x consistent with this pattern if not for the fact that the property was being used solely as multi-unit residential at the time.
- The current U-SU-A1 district would allow a single unit dwelling and an accessory dwelling unit (ADU) to be constructed on the site.
- The property owner is requesting to rezone to U-MX-2x to facilitate the redevelopment of the property, which has a shallow lot depth and is therefore difficult to redevelop under the

provisions of DZC 11.2.3, which allows for a legally established multi-unit use to be re-established in an SU zone district by making use of the single unit or duplex building forms.

- The requested U-MX-2x district stands for Urbane Neighborhood Context – Mixed Use – 2 Stories Maximum. The x indicates that the use list is limited in order to ensure compatibility with nearby residential uses. The district applies to small sites served primarily by local streets embedded within an existing or proposed neighborhood. These are typically one or two parcels and are limited to low scale building forms and low intensity uses.
- Further details of the proposed zone district can be found in Article 5 of the Denver Zoning Code (DZC).

### Proposed Rezoning

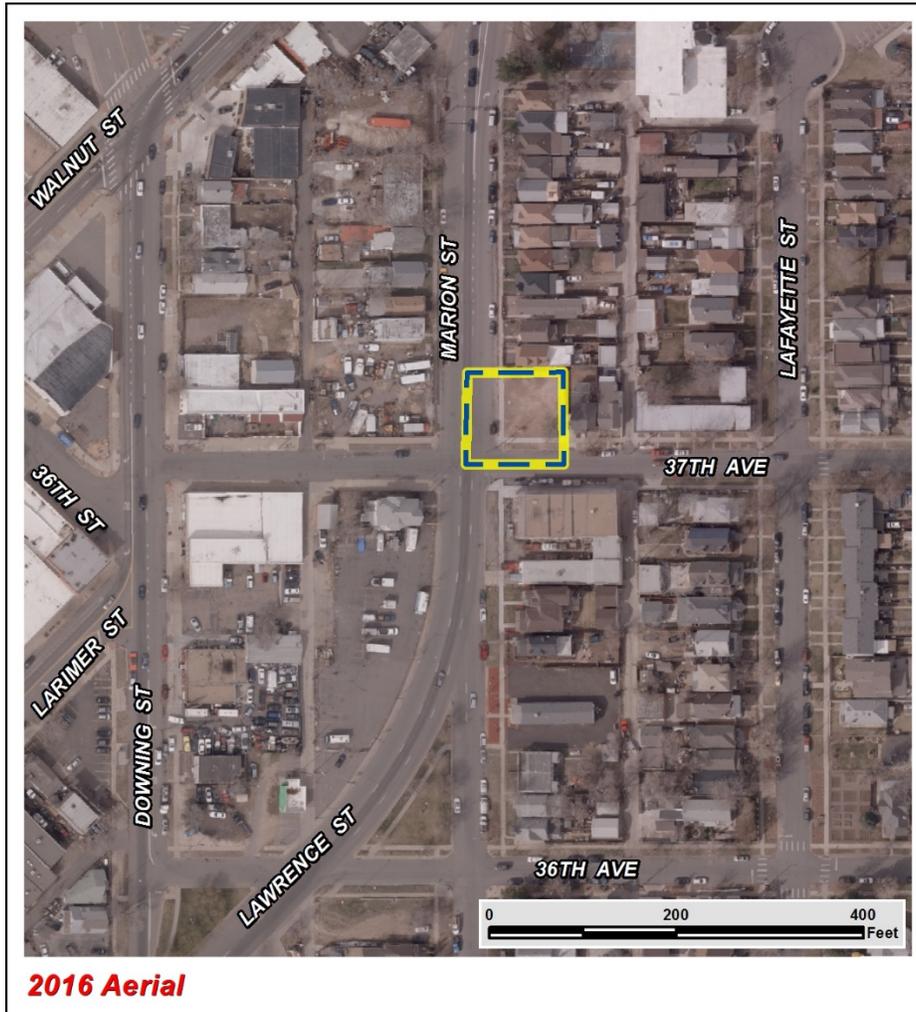

The applicant is requesting to rezone to U-MX-2x, which stands for Urban Neighborhood Context – Mixed Use – 2 Stories Maximum. The x indicates that the use list is limited in order to ensure compatibility with adjacent or nearby residential uses. The district applies to small sites served primarily by local streets embedded within an existing or proposed neighborhood. These are typically one or two parcels and are limited to low scale building forms and low intensity uses. Further details of the proposed zone district can be found in Article 5 of the Denver Zoning Code (DZC).

In the 2010 citywide rezoning, many of the embedded commercial properties in Cole that had residential zoning were rezoned to U-MX-2x. The building that was formerly located at 3700 Marion was originally constructed as a commercial mixed use building and was later adaptively reused as multi-unit residential. Had the subject site been in commercial use at the time of the 2010 citywide rezoning, it's likely that it would have received U-MX-2x zoning like the other embedded commercial and mixed use buildings in Cole.

### Existing Context

The subject property is located in Cole at the intersection of Marion Street and 37th Avenue. The lot is currently vacant, but formerly held an 8 unit apartment building. The apartment building burned down in 2014 and was subsequently demolished. The area surrounding the site is primarily residential, with commercial, industrial, and institutional uses located amongst the residential, especially on busier local streets and on corners. Typical building heights in the area are one and two stories.

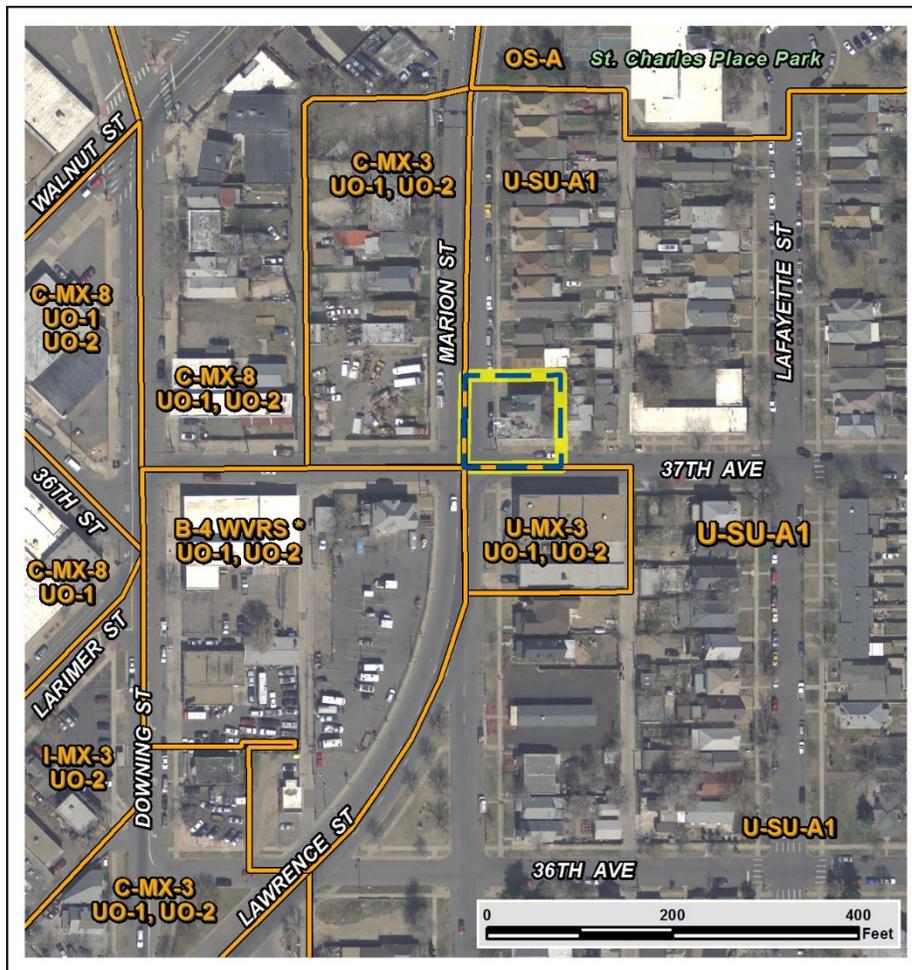

The following table summarizes the existing context proximate to the subject site:

	Existing Zoning	Existing Land Use	Existing Building Form/Scale	Existing Block, Lot, Street Pattern
Site	U-SU-A1	Vacant	n/a	Small urban lots and rectangular grid block pattern. Rear-loaded garages with alleys. Pedestrian-oriented building frontages predominate. Detached sidewalks with tree lawns.
North	U-SU-A1	Single family residential	Urban single family house with alley access, 1.5 stories	
South	U-MX-3, UO-1, UO-2	Industrial	Brick industrial building with alley access, 2 stories	
East	U-SU-A1	Single family residential	Urban single family house with alley access, 1 story	

	Existing Zoning	Existing Land Use	Existing Building Form/Scale	Existing Block, Lot, Street Pattern
West	U-MX-3, UO-1, UO-2	Vacant/Outdoor Storage	n/a	

### 1. Existing Zoning

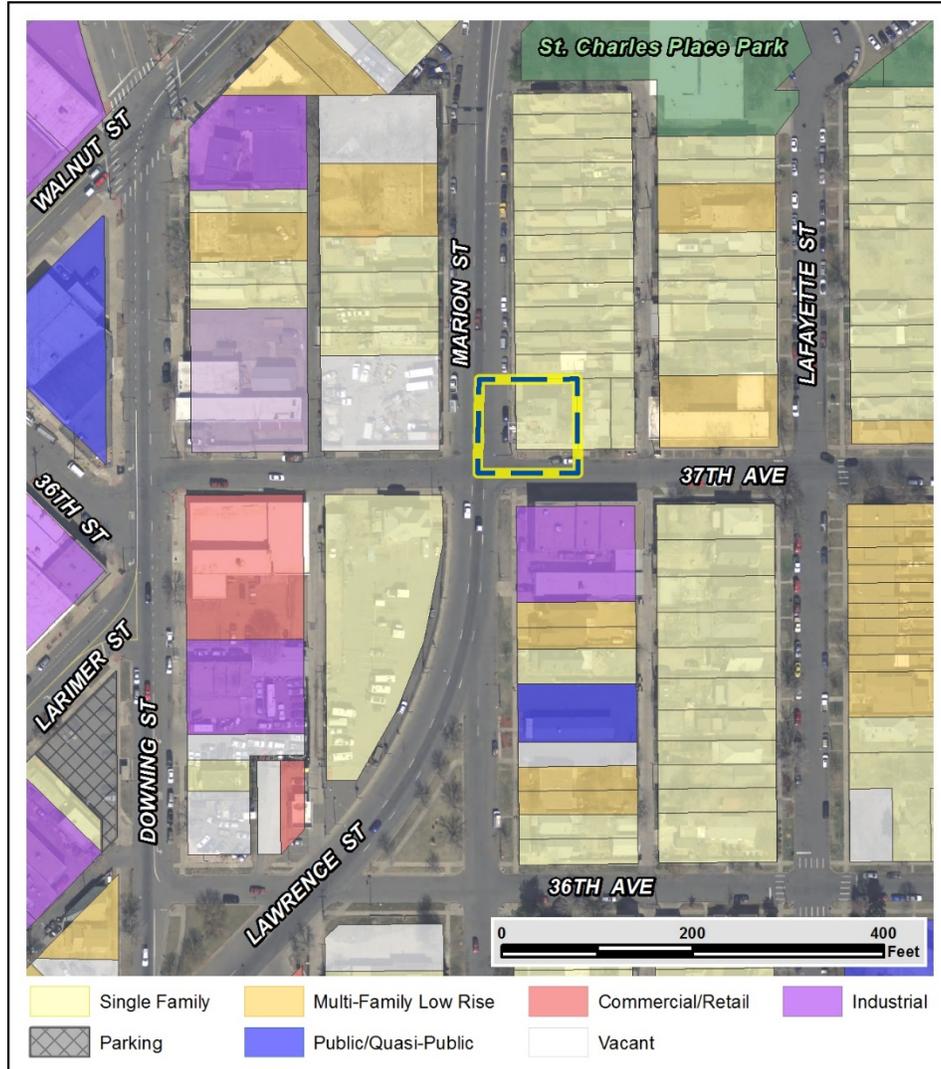

The site is currently zoned U-SU-A1. This zoning was put in place as part of the 2010 citywide rezoning. Prior to 2010, the site and surrounding properties were zoned R-2-A. The U-SU-A1 is a single unit district allowing urban houses and detached accessory dwelling units with a minimum zone lot area of 3000 square feet. The subject property is 4,870 SF and would therefore be allowed to construct one house and an ADU under this zoning. For additional details on the U-SU-A1 zone district, please refer to Article 5 of the Denver Zoning Code (DZC).

### 2. Existing Land Use Map

The subject site is a vacant lot. The lot itself is shallower than surrounding properties and does not extend to the alley. Rather, a single family home is located along the rear property line facing 37<sup>th</sup>

Ave. The area surrounding the site is predominantly residential, with single family being the most common residential type. Higher density residential and non-residential uses are sprinkled throughout the neighborhood. Typical building heights in the area are one and two stories, although adopted plans call for increased intensity to the west towards the 38<sup>th</sup> & Blake commuter rail station.

### 3. Existing Building Form and Scale

View of the subject site from Marion Street, looking east. A single family home that faces 37<sup>th</sup> Ave is located adjacent to the rear property line, resulting in a shallow lot depth for the subject site.

View of the single family home adjacent to and north of the subject site.

The vacant lot across Marion Street to the west is currently being used for outdoor storage of vehicles and materials.

This single family home is located caddy-corner (southwest) from the subject site across 37<sup>th</sup> Ave and Marion St. Outdoor vehicle storage is adjacent to the house.

This industrial building is located south of the subject site, across 37<sup>th</sup> Ave.

### Historical Context

For this rezoning, the historical context of the site is relevant because of the form and character of the building that caught fire in 2014 and was subsequently demolished. Although it was converted to sole residential use at some point in its history, the building was originally constructed as a neighborhood-scale mixed use shopfront building with a corner entrance.

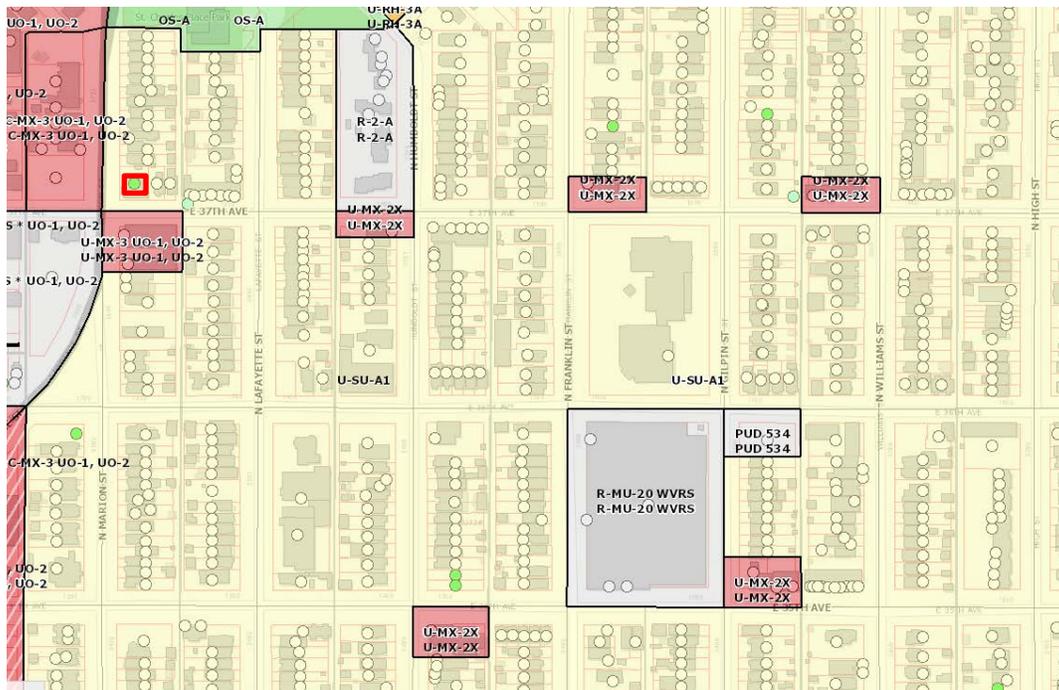

The former building as it appeared in August, 2011.  
Source: Google Street View

The ruins of the former structure as it appeared in August, 2014.  
Source: Google Street View

The 2010 citywide rezoning process made an effort to identify embedded commercial buildings in the Cole neighborhood and give them mixed use zoning. This pattern can be seen east of the subject site on 37<sup>th</sup> Ave, where U-MX-2x zoning has been applied to similarly situated properties. Had the subject site been in commercial use at the time, it's likely that it would have received U-MX-2x zoning like the other embedded commercial and mixed use buildings in Cole.

U-MX-2x zoning is mapped extensively in Cole to allow for the continued use of embedded commercial buildings.

## Summary of City Agency Referral Comments

As part of the DZC review process, the rezoning application is referred to potentially affected city agencies and departments for comment. A summary of agency referral responses follows:

**Public Works – Surveyor:** Approve Rezoning Only - Will require additional information at Site Plan Review

**Development Services – Transportation:** Approved – See Comments Below

Any new development proposal on this site may be subject to improvements in the right-of-way per Public Works standards.

**Asset Management:** Approved – No Comments

## Public Review Process

The public process for the proposed rezoning is summarized below:

- **Informational Notice-** CPD staff provided informational notice of receipt of the rezoning application to affected members of City Council and registered neighborhood organizations (RNOs) on June 15<sup>th</sup>, 2016.
- **Planning Board-** The property was posted for a period of 15 days announcing the August 17<sup>th</sup>, 2016 Denver Planning Board public hearing, and written notification of the hearing was sent to all affected registered neighborhood organizations and City Council members. **Planning Board recommended approval of the proposed rezoning by a vote of 11-0.**
- **Land Use, Transportation, and Infrastructure Committee-** Following Planning Board review, the rezoning application was referred to the Land Use, Transportation, and Infrastructure (LUTI) Committee of the City Council for review at a public meeting. Written notification of the August 30<sup>th</sup>, 2016 LUTI meeting was sent to all affected registered neighborhood organizations and City Council members. Following LUTI review, the rezoning application is typically referred to the full City Council for final action at a public hearing.
- The City Council public hearing is tentatively scheduled for October 17<sup>th</sup>, 2016.
- The RNOs identified on page 1 were notified of this application.
- As of the date of this staff report, no comments have been received regarding this application.

## Criteria for Review / Staff Evaluation

The criteria for review of this rezoning application are found in DZC, Sections 12.4.10.7 and 12.4.10.8, as follows:

### **DZC Section 12.4.10.7**

1. Consistency with Adopted Plans
2. Uniformity of District Regulations and Restrictions
3. Public Health, Safety and General Welfare

### **DZC Section 12.4.10.8**

1. Justifying Circumstances
2. Consistency with Neighborhood Context Description, Zone District Purpose and Intent Statements

### **1. Consistency with Adopted Plans**

The following adopted plans apply to this property:

- *Denver Comprehensive Plan 2000*
- *Blueprint Denver (2002)*
- *Northeast Downtown Neighborhoods Plan (2011)*

#### **Denver Comprehensive Plan 2000**

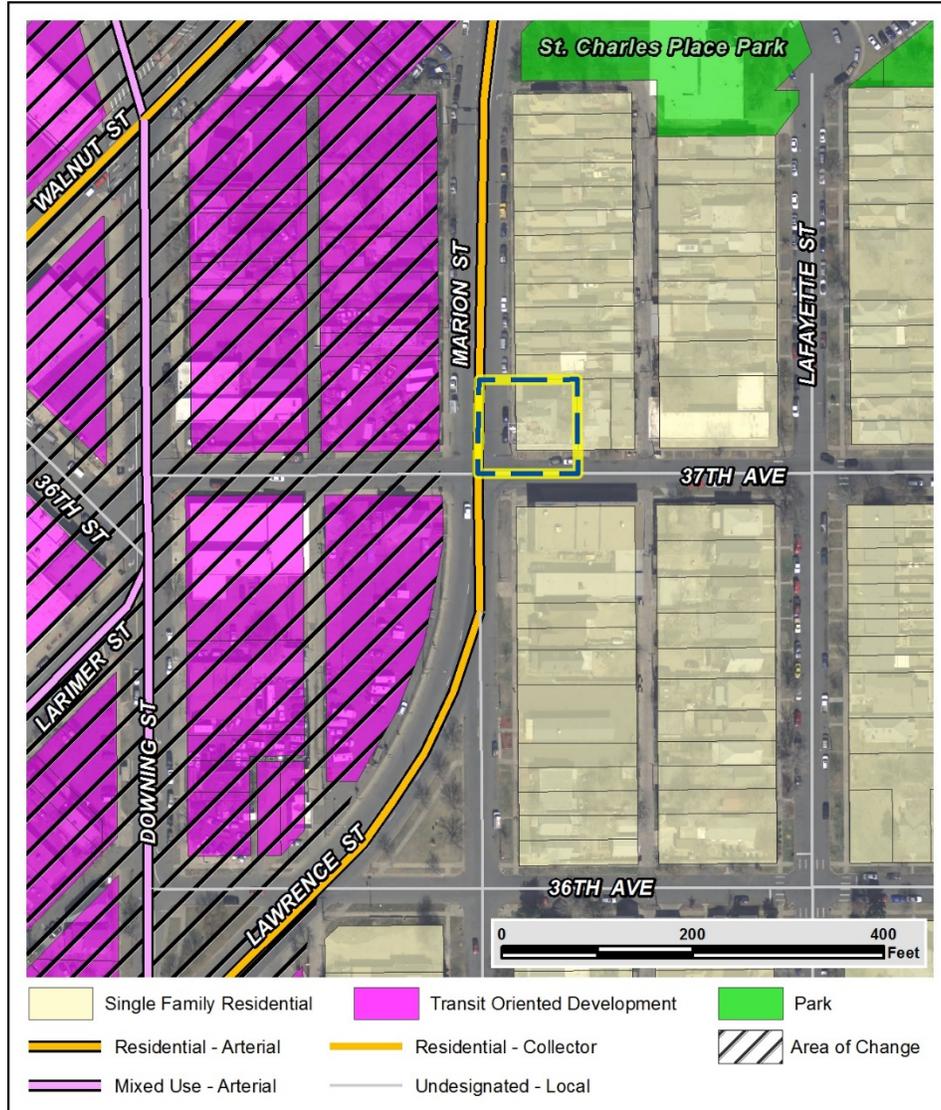

The proposed rezoning is consistent with the following *Denver Comprehensive Plan 2000* strategies:

- Environmental Sustainability Strategy 2-F – Conserve land by: promoting infill development within Denver at sites where services and infrastructure are already in place and designing mixed-use communities and reducing sprawl, so that residents can live, work and play within their own neighborhoods.
- Land Use Strategy 3-B – Encourage quality infill development that is consistent with the character of the surrounding neighborhood; that offers opportunities for increased density and more amenities; and that broadens the variety of compatible uses;
- Neighborhood Strategy 1-F – Invest in neighborhoods to help meet citywide goals and objectives for a range of housing types and prices, community facilities, human services and mobility.

The proposed zone district broadens the variety of allowed uses and housing types from the current zoning while observing development standards and use limitations to help ensure compatibility with the surrounding neighborhood. The rezoning proposal is consistent with the referenced plan recommendations from *Denver Comprehensive Plan 2000*.

#### **Blueprint Denver**

According to the 2002 Plan Map adopted in *Blueprint Denver*, this site has a concept land use of Single Family Residential and is located within an Area of Stability.

**Future Land Use**

Blueprint Denver characterizes single family residential areas as follows: “Neighborhoods of single family houses represent the majority of Denver’s residential areas, particularly those developed after 1900 and especially those built after 1940. Densities are fewer than 10 units per acre, often less than six units per acre neighborhood-wide, and the employment base is significantly smaller than the housing base. Single-family homes are the predominant residential type” (p. 42).

Blueprint Denver’s description of single family residential acknowledges that although single family homes are the predominant land use type, they are not the only land use type, and furthermore that single family residential areas can have an employment base, albeit a much smaller one than the housing base. Although it acknowledges the presence of non-single family land uses in this way,

Blueprint Denver does not give guidance regarding the appropriate location of such uses within single family residential areas.

Following on the practice from the 2010 citywide rezoning of granting Cole's embedded commercial buildings U-MX zoning, the subject site is a rational location for compatible commercial mixed use development as described by Blueprint Denver. This rationale is based on the fact that the former structure was originally designed as a commercial mixed use building, and that similarly situated properties within the Cole neighborhood, and on 37<sup>th</sup> Ave. in particular, have received U-MX-2x zoning in the past. The U-MX-2x zone district is most appropriate for allowing complementary small scale commercial uses in residential areas because it is the least intensive in terms of building forms and allowed uses.

### **Area of Stability**

According to Blueprint Denver, "the goal for the Areas of Stability is to identify and maintain the character of an area while accommodating some new development and redevelopment" (p.120).

The proposed Map Amendment application is consistent with the recommendations for Areas of Stability, as the proposed zone district will accommodate mixed use redevelopment that is compatible with the existing neighborhood character.

### **Street Classifications**

According to Blueprint Denver, Marion is classified as a residential arterial and 37<sup>th</sup> Avenue is classified as an undesignated local street. Residential arterial streets "serve longer distance trips than residential local or collector streets, and maintaining through capacity is a higher priority on a residential arterial than on a residential collector or local street" (p. 62). Local residential streets "are designed to emphasize walking, bicycling and land access over mobility" (p. 55).

The Map Amendment application is consistent with *Blueprint Denver's* street classification recommendations, as the proposed zone district will encourage a pedestrian-oriented street frontage that is characteristic of local streets such as 37<sup>th</sup> and compatible with residential arterial streets such as Marion.

### **Northeast Downtown Neighborhoods Plan (2011)**

The Northeast Downtown Neighborhoods Plan provides guidance for this area. The plan has land use, building height, and policy recommendations that are relevant to the proposed rezoning. The plan recommends Single Family, 2.5 stories for the subject site.

Like Blueprint Denver, the Northeast Downtown Neighborhoods Plan’s description of the single family land use includes some allowances for non-single family uses: “Neighborhoods of single family houses in Northeast Downtown represent older, residential neighborhoods that do not have a significant mix of housing types. Commercial uses are limited to small buildings providing neighborhood services” (p. 16). Also like Blueprint Denver, the Northeast Downtown Neighborhoods Plan does not provide specific guidance as to where non-residential uses are appropriate within these areas. Rather, it recommends replicating existing development patterns as articulated in recommendation A. 3 (p. 20):

■ **A.3 Low Intensity Development in Residential Neighborhoods**

In areas with established residential neighborhood character, including Curtis Park, San Rafael, and the neighborhood edge east of Downing Street (Cole and Whittier):

- Maintain the current mix of low scale building forms such as urban house, duplex and rowhouse.
- Allow new development to replicate existing development patterns, including small lots, shallow setbacks and high building coverage with parking and access in the rear/off the alley.
- Make use of entry features that connect the building and front yards to the street.
- Allow a mix of land uses consisting primarily of residential uses with limited neighborhood-serving commercial.
- Encourage the use of streetscape elements that promote residential character and pedestrian and bicycle use, such as detached sidewalks, pedestrian scale lighting, and tree lawns.

Recommendation A.3 allows for limited neighborhood-serving commercial along the edge of the Cole neighborhood that replicates existing development patterns. The proposed Map Amendment is consistent with this recommendation, as the proposed U-MX-2x zoning will allow for the construction of a two-story neighborhood-serving commercial mixed use building in a location where such a building once stood.

## **2. Uniformity of District Regulations and Restrictions**

The subject property received U-SU-A1 zoning during the 2010 Denver Zoning Code (DZC) update while similarly-situated embedded commercial buildings in Cole, and on 37<sup>th</sup> Ave in particular, received U-MX-2x zoning. By observing this established pattern, the proposed rezoning to U-MX-2x will result in the uniform application of zone district building form, use, and design regulations.

## **3. Public Health, Safety and General Welfare**

The proposed official map amendment furthers the public health, safety, and general welfare of the City primarily through the implementation of the City's adopted plans.

## **4. Justifying Circumstance**

The application identifies changed or changing conditions as the Justifying Circumstance under DZC Section 12.4.10.8.A.4, "The land or its surrounding environs has changed or is changing to such a degree that it is in the public interest to encourage a redevelopment of the area or to recognize the changed character of the area." In this case, relevant changed conditions include the ongoing revitalization of Cole and nearby Five Points and RiNo, the opening of the 38<sup>th</sup> & Blake commuter rail station a few blocks to the west, and the resulting use of 37<sup>th</sup> Ave as a primary pedestrian route to the station from Cole. An additional changed condition is the loss of the original structure to fire in 2014.

## **5. Consistency with Neighborhood Context Description, Zone District Purpose and Intent Statements**

### Neighborhood Context Description

The requested zone district is within the Urban Neighborhood Context which is "primarily characterized by single-unit and two-unit residential uses...Commercial buildings are typically Shop Front and General forms that may contain a mixture of uses within the same building...Commercial uses are primarily located along mixed-use arterial or main streets but may be located at or between intersections of local streets" (DZC 5.1.1).

The proposed Map Amendment is consistent with this context description, as the proposed U-MX-2x district will allow for commercial mixed use development on a corner lot, consistent with the established development patterns of the existing neighborhood.

### Zone District Purpose and Intent

According to the general purpose stated in the Denver Zoning Code, the purpose of the Mixed Use Districts is "to enhance the convenience, ease and enjoyment of transit, walking, shopping, and public gathering within and around the city's residential neighborhoods" and furthermore the Mixed Use Districts "are intended for corridors, embedded neighborhood business areas and larger sites". (DZC

5.2.3.1.B and D). In particular, the U-MX-2x zone district “applies to small sites served primarily by local streets embedded in within an existing or proposed neighborhood. These are typically one or two parcels and are limited to low scale building forms and low intensity uses” (DZC 5.2.3.2.B).

The proposed rezoning is consistent with the General Purpose and Specific Intent, as it will allow for embedded commercial and mixed use development that is compatible with the established residential character of the Urban Neighborhood Context.

#### **Staff Recommendation**

Based on the analysis set forth above, CPD staff finds that the application for rezoning the property located at 3700 Marion St. (#2015I-00175) to the proposed U-MX-2x meets the requisite review criteria. Accordingly, staff recommends approval of the rezoning.

**3700 Marion St. - Zone Map Amendment Request**  
**Applicant: Cosmo LTD (Noah Manos, Managing Member)**

REVIEW CRITERIA

CONSISTENCY WITH ADOPTED PLANS

*The proposed official map amendment is consistent with the City's adopted plans, or the proposed rezoning is necessary to provide land for a community need that was not anticipated at the time of adoption of the City's Plan.*

-Northeast Downtown Neighborhoods Plan (2011)

MX 2X zoning directly correlates with the guidelines presented in this plan dated 2011. Context of 3700 Marion falls directly in line with all the non design specific points. Design criteria will be adopted into how development is laid out, including upper set back on north side of property adjacent to residential, and "streetscape elements"

**A.2 Moderate Intensity Development Transitioning to Residential Neighborhoods**

- Allow moderated and mixed scale of general, shopfront, apartment and rohouse building forms
- Site building forms in a context sensitive manner with emphasis on orienting to the street with parking and access in the rear/off alley
- Promote the use of design elements that link the building directly to the street environment , such as ground story activation, transparent window openings and doorways at the street.
- Make use of design elements, such as upper story setbacks, as necessary to minimize massing adjacent to residential areas.
- Allow mix of uses within the area and within buildings
- Encourage TOD along transit corridors with sensible transitions to adjacent residential neighborhoods.
- Make use of streetscape elements that support and promote pedestrian and bicycle use, such as wide sidewalks, bike racks, public trash cans, pedestrian scale lighting, and tree lawns or tree wells.

**A.3 Low Intensity Development in Residential Neighborhoods**

-Allow a mix of land uses consisting of primarily of residential uses with limited neighborhood serving commercial.

JUSTIFYING CIRCUMSTANCES

*The land or its surrounds has changed or is changing to such a degree that it is in the public interest to encourage a redevelopment of the area to recognize the changed character of the area.*

There are 2 distinct changes in the local context surround the property that create justifying circumstances for zone map amendment to 3700 Marion that make MX 2X zoning appropriate for the property. Over the past 5 years the intrinsic character of RINO has changed, defining the course for how the area will be developed over the next 15-20 years. The addition of commuter rail station at 38th and Blake St. will catalyze the already ongoing urban revival taking place in this area.

1. The new RTD Fastracks light rail and commuter rail station located at 38th / Blake St, will redefine north Marion as an arterial pedestrian corridor that will consolidate foot traffic between Cole neighborhood, Rino Neighborhood and the new transit hub. MX 2X zoning intends to create street level activation through designated uses that will support and enrich this vital new pedestrian corridor.

2. RINO Arts and Commercial District: Since 2010, this district has transformed into a vibrant part urban of the experience in Denver. A broad range of new businesses have helped redefine the community needs and overall identity in significant ways. The redevelopment of this area is now extending into the northwestern edge of the Cole neighborhood, changing its needs and preexisting character.

*The proposed official map amendment is consistent with the description of applicable neighborhood context, and with the stated purpose and intent of the proposed zone district.*

The local context of 3700 Marion is boarded by CMX 5 zoning and MX 2X zoning on 2 sides and U-SU-A1 on 2 side which situate it well within the stated intention for MX 2X zoning:

-The Mixed Use Zone Districts are intended to enhance the convenience, ease and enjoyment of transit, walking, shopping and public gathering within and around the city's neighborhoods.

-The Mixed Use Zone District standards are also intended to ensure new development contributes positively to established residential neighborhoods and character, and improves the transition between commercial development and adjacent residential neighborhoods.

-Compared to the Main Street districts, the Mixed Use districts are focused on creating mixed, diverse neighborhoods. The Mixed Use districts are intended for corridors, embedded neighborhood business areas and larger sites.

Colorado Secretary of State
