6. General description of proposed ordinance including contract scope of work if applicable:

- Crime Prevention and Control Commission contracted with the Council for Substance Abuse and Mental Health (2010) to provide fiscal oversight, space and management of the Community Reentry Project (CRP). In October of 2010, The Council won the RFP to continue these services. CPCC is committed to reducing offender recidivism and increasing public safety through a variety of evidence-based practices including the Jail to Community Reentry Model. Currently, we begin jail based services

This contract provides for a one-year agreement extension (FY2011) that cumulatively exceeds the threshold contained in Section 3.2.6(E) of the Charter requiring City Council approval. The proposed one-year amendment cost is \$535,038 and the total cumulative cost will be \$994,718.

CRP will provide services to a target population of approximately 360 misdemeanants returning from jail to the community. As the Jail to Community process is implemented, the CPCC recognizes that the target client population may be expanded. Changes in the client population will be based on data reflecting jail population needs and trends and on Sheriff and CPCC Reentry committee agreements. All CRP clients are Denver residents, 18 years of age and older. Other criteria and procedures will be followed as outlined in the Jail to Community Reentry Handbook and as directed through the Transition from Jail to Community (TJC) Model. It is estimated that 25 - 45 new clients will be enrolled per month in services.

The goal is to have persons transition from the County Jail to the Community Reentry Project for services. Reentry staff, in conjunction with Denver County Jail staff will work together to assess and provide core services that meet identified inmate needs. Clients will receive services up to 6 months or as needed. Type of services, depending on availability and budget may include but are not limited to case management, emergency transitional housing, limited public transportation, benefit and ID acquisition, employment readiness, placement and coaching, access to educational supports such as a GED, family reunification and parenting, healthy living skills, substance abuse treatment readiness and treatment as possible, access to trauma management as possible, cognitive skills training, computer skills and access to community resources and supportive services. Creating living skills, pro-social supports and non-offending lifestyles are primary goals for reentry. Types of services needed are largely indicated by offender scores on the LSI or similar assessments.
