5. General description or background of proposed request. Attach executive summary if more space needed:

This contract is for Michaels Energy, Inc. as the prime consultant to CASR for the development, design and implementation of multifamily and commercial building electrification incentives. This program includes electrification feasibility reports and incentives, building electrification pilots to both learn and demonstrate heat pumps in various building types, and for equity first incentivizes. Without these incentives, building owners and operators will likely not install newer technologies and rely on exemptions to future building code requirements. Providing incentives ensures rapid market adoption, and if designed correctly, increased adoption in under-resourced communities, leading to greater emissions reductions sooner. Without these services, the city will be unable to achieve its building energy efficiency and decarbonization goals.
