DEPARTMENT OF AVIATION

CITY COUNCIL ORDINANCE REQUEST SUMMARY

SWITCHGEAR MAINTENANCE, REPAIRS, AND EMERGENCY SERVICES

Purpose and Use of Agreement(s)

This request will provide switchgear testing, maintenance, repairs, and emergency services at Denver International Airport (DEN). The purpose of this contract is to utilize the economic and operational benefits resulting from an effectively executed preventive maintenance and testing program of essential DEN electric power equipment. The electric power system at DEN has 480-volt switchgear and 4160-volt switchgear. Included is the testing and preventive maintenance of these switchgear and related equipment as determined by the DEN Project Manager. The work will also address and fund high-priority emergency equipment and system issues (repair and replacement), along with repairs and maintenance on switchgear, breakers, and other electrical equipment in the DEN electric power distribution system.

Contract(s) Description

New contract for maintenance, testing, repairs, and emergency services for existing DEN switchgear and power equipment.

Vendor(s)

Intermountain Electric, Inc. – 202264186

DSBO Goals
