Your comment:

I would like to express a moderate opposition to the overall newly proposed building height of the E-MS-E - E-MS-5 rezoning. Just a couple years ago, the maximum suggested height was a mere 3 stories and has been increased to a new maximum suggested height of 5 stories. There did not seem to be any strong conviction as to this additional 2 stories for affordable housing. The impact this new building height has on the surrounding north side is substantial for solar gain and restricts opportunity to apply photovoltaic panels as a clean energy initiative. I would prefer to see this site developed into something other than multifamily housing as the city has already more housing initiatives than plans to occupy. The other concern with an increased buildings height and plus 34 residential units, is the impact on parking, alley access, traffic, and sightlines from the neighborhood. In this specific location, there does appear to be a good argument to withstand the 3 story maximum with affordable housing and mixed use commercial/retail at ground level. There are 2 multi family projects within this section of East Colfax are finishing up in calendar year 2023 offering both affordable housing and additional housing support for the East Colfax neighborhood. While I love to see improvements made in effort increase convenience and quality of life, there seems to be a greater initiative to offer housing instead of other quite relevant convenience offerings and community benefits like grocery, local retail, restaurants, greenspace, improved sidewalks, etc.
