PRODUCT CODE	DESCRIPTION	QTY	UNIT LIST PRICE	EXT. AMOUNT
MB4 Blower	Custom Chassis Snow Blower - The MB4 chassis is designed to host the M-B MH7500 snow blower head and can be equipped to interchange for use with front plows, front brooms, tow brooms, and other equipment as desired. MB4 High Performance Airport Snow Blower design provides more than 1,000 HP to power snow blower head. The standard 755 HP electronic turbocharged T4F EPA emission certified auxiliary engine provides its entire 755 HP to the impeller drive. The hydrostatic blower ribbon is powered by the chassis engine. The ribbon is independently reversible and the speed is independent of impeller speed. Unique programming assures ribbon speed is automatically adjusted to compensate for vehicle speed. The efficient use of power from both engines provides a capacity up to 7500 tons per hour and cast distances in excess of 150 feet. Head cutting height is 58 inches and the 52.5" diameter ribbon has a cutting width is 102 inches. The 59” diameter fabricated impeller includes replaceable blades, mechanical drive and shear bolts to protect impeller and impeller drive. The rotating impeller housing and discharge chute allow adjustable cast direction, rotating 140 degrees from standard flat cast right. Steel cutting edge, pneumatic casters, Integrated carbide skid shoes, and rubber side containment blades are standard.	1	$ 845,132.00	$ 845,132.00
