**5. General description or background of proposed request. Attach executive summary if more space needed:**

The City and County of Denver's Downtown Fleet Management group (Public Works Fleet Management, Public Works Fleet Logistics Operations, Denver Fire Fleet Management, and Denver Police Fleet Management) purchased AssetWorks Fleet Management software through a solicitation in late 2019. This replaced the previous system with a more modern, cloud-based, functionally robust system that supports the end-to-end fleet management process.

After Technology Services provided an independent evaluation of the multiple existing Asset Management solutions across DOTI, including constructed and fleet assets, it was determined that through the addition of the AssetWorks Enterprise Asset Management module, the functionality of the multiple existing systems can be accomplished with a single Asset Management solution. Through this amendment, the City will continue the use of the AssetWorks Enterprise Asset Management solution and associated modules.
