## 5. General description or background of proposed request. Attach executive summary if more space needed:

This is an expenditure contract for Aptim Environmental & Infrastructure, LLC (Aptim) to act as a third-party rebate administrator to provide funding to incentivize the adoption of highly efficient, all-electric energy equipment, electric modes of transportation, solar photovoltaics and battery storage, and other climate action technologies. Adding \$8,050,000 in funding and an additional year continues these programs.

Without these rebates, residents and businesses will be hesitant to adopt these technologies and contractors may not be as aware of the technologies. The rebates will ensure more rapid market adoption, leading to greater emissions reductions sooner. The technologies included and the levels of incentives offered by Aptim will be set in partnership with CASR based on market research and updated regularly as market conditions change to advance rapid and equitable decarbonization in Denver. Aptim will be eligible to receive a fee of up to 8% of all rebates issued as compensation for services.
