5. General description or background of proposed request. Attach executive summary if more space needed:
Approves a contract for construction services for the 2025 Runway 17L-35R Wildlife Hazard Mitigation, Phase 2 ALL DRAINAGES project at Denver International Airport (DEN). The objective of this project is to mitigate standing water and associated vegetative growth within the identified areas which act as wildlife attractants in the vicinity of the Runway 17L-35R complex in accordance with the Wildlife Hazard Management Plan. Wildlife strikes for this complex have been recorded at a rate of two to three times those of other DEN Runway complexes. The intent of this specific phase is to address drainage issues in the remaining seven (7) of nine (9) areas that were identified across the east airfield, specifically near the Runway 17L-35R complex. Phase 1 was designed and constructed in 2019 and addressed drainage areas 1 and 2. Phase 2 ALL DRAINAGES is intended to be constructed in 2025 and will address drainage areas 3, 4, 5, 6, 7, 8, 9A and 9B. The project has been designed in accordance with recommendations from USDA, the DEN Airport Drainage Master Plan, and the FAA approved Wildlife Hazard Management Plan.

Completing this project addresses the third pillar of the VISION 100 DEN strategic plan: Maintaining What We Have. Additionally, the project will focus on Continuous Stakeholder Input/Feedback during design and Enhancing the Customer Experience once constructed.
