**Type and Scope of services to be performed:**

10. Green Infrastructure and Landscape Architecture (30% MWBE): Work in this category is related to the planning and design of green infrastructure and landscape architecture projects and studies. The green infrastructure systems may range from smaller site-scale applications to larger regional approaches. Design of these projects should effectively manage stormwater while delivering a variety of co-benefits to the surrounding community. Landscape architecture projects shall include planning and design for aesthetic and functional improvements within the City's Right of Way. This will include streetscape, urban design, irrigation and park improvement projects. Tasks and deliverables to support green infrastructure and landscape architecture are included.

- Watershed planning that uses analytical decision support tools to optimize placement of green infrastructure
- Creating innovative design guidelines for various scales of green infrastructure suitable for urban environments that meet a variety of citywide objectives
- Designing site-scale and large-scale green infrastructure/water quality facilities
- Optimization of co-benefits in all planning and design efforts including community aesthetics, placemaking, connectivity, urban heat mitigation, and climate change resiliency
- Streetscape design
- Irrigation design
- Design for ADA compliance
- Plan, specification and cost estimate preparation
