The Department of Finance partnered with Technology Services to purchase the Tyler Technologies iasWorld Software as a Service (SaaS) application in 2015 for the purpose of administering the property tax process for the City and County of Denver including:

- Listing of properties
- Valuation of properties
- Taxation
- Collection

This application is primarily used by the Department of Finance (Assessment and Treasury) and secondarily used by other City Agencies (Wastewater, Community Planning and Development, Department of Economic Development, Denver Fire Department, etc.). The functionality of this system will continue to be needed by these departments requiring an extension of the contract to continue the use and support of the application.

The City collects approximately \$1.6 billion through this system on an annual basis so it is vital that the City has continual access and use of this system and that it continues to be supported by the vendor. The City, through this application, is also able to distribute a portion of the taxes collected to Denver Public Schools.

The City has been able to renegotiate with the vendor to reduce the overall costs and extend the reduced costs over a greater length of time.
