**Vendor/Contractor Name (including any "DBA"):** Airport & Aviation Professionals, Inc.

**Type and Scope of services to be performed:**

PROPWorks is the leading software application used by most of the large hub airports. Denver International Airport (DEN) is re-implementing PROPWorks, an airport specific revenue contract management software application. As a revenue contract management software application, PROPWorks allows DEN to monitor the terms and conditions the Airline Space and Use Agreements, Concession Agreements, and other permits and combines this information to space management along with valuable data. The current PROPWorks version used by DEN was initially established for a small portion of the airport operations. The re-implementation takes a global and future strategic approach to the software applications functionality structure. It will allow for more complex data information, including concession revenue and airlines statistics and allow for measurements against the space management. It will also allow DEN to maximize efficiencies with space management, revenues, and passenger trends by connecting those data points with contracts. The re-implementation will centralize the monitoring of all airport revenue contracts. By re-implementing the software system now, it will prepare the airport for future opportunities.

This consultant has assisted with implementing PROPWorks at other large hub airports including Hartfield-Jackson International Airport (ATL), Los Angeles World Airports (LAX), Dallas-Fort Worth International Airport (DFW), and Clark County Department of Aviation (LAS). The consultant brings more than 20 years of experience implementing and operating PROPWorks. The consultant also has experience with the implementation of Workday.
