**Affected Council District(s) or citywide?** Citywide

**Contract Control Number:** CE21375-12

**Vendor/Contractor Name (including any "DBA"):** Infor (US) Inc

**Type and Scope of services to be performed:**

This product was originally purchased in 2002 to be used as a Work Order Control system for Parks and Recreation. As more and more agencies found value in this product, it was agreed that this would be the City's Enterprise Asset Management (EAM) tool. It is currently being used by Public Works, General Services Facilities, Arts & Venues, Denver Fire Dept. Public Works Wastewater, Parks and Recreation, Denver Libraries and Denver Sheriff's Dept. The EAM tool can be used to manage day to day work (i.e. scheduling routine preventative maintenance on equipment, appropriating technicians and costs for day to day operations) and is also used by Public Works and General Services Facilities Management for Facilities Conditions Assessments (FCA). FCAs can be used to assess equipment for facility improvement measures. An example of this would be an elevator replacement. This type of project would not be routed through the routine day to day operations workflow, but rather to the appropriate personnel that would account for Capital Improvement Projects (CIP). This process helps with capital planning. This tool is also being used by Public Works to manage the City's bridges and streetlights for both inventory and maintenance and repair purposes. This contract amendment allows for continual vendor support of the EAM tool.

This request is to increase the max contract liability and extend the term through December 31, 2022. These costs are paid from operational funds.

The process to amend this contract was initiated in August of 2017 in an effort to have the amendment completed prior to the expiration date. There were several issues that needed to be clarified during this process that delayed the amendment. Issues revolved around invoicing (invoice individual agencies or just Technology Services), co-termining licensing, separating new licenses from support of licenses, supplier's internal process of approving a multi-year agreement and correcting errors with the supplier's certificate of insurance.
