Executive Summary with Rationale and Impact:

Detailed description of the item and why we are doing it. This can be a separate attachment.

Earlier this year, the Biden Administration's announced it would be taking efforts to update federal rules to help end the proliferation of non-serialized firearms in the country. These "ghost guns" as they are referred to colloquially, are firearms and firearm frames and receivers that lack a serial number, and thus cannot be traced to their original owner, seller, or manufacturer.

As various cities across the country have seen more and more of these non-serialized firearms being used in crimes, Mayor Hancock and City Attorney Kristin Bronson are proposing a ban on the possession, carry, use, manufacture, and sale of non-serialized guns in Denver.

In addition to the prohibition on non-serialized firearms, this bill also reorganizes division 2 of chapter 38 of the D.R.M.C. where weapons offenses are listed. The reorganization is intended to provide better clarity for law enforcement officers, prosecutors, defense attorneys, and average citizens. Some minor modifications to the status quo are intended to capture legislative intent or provide clarity where previous code language was unclear.
