The City and County of Denver solicited proposals related to the procurement of an Advanced Traffic Management System (ATMS) in 2013. The selected vendor, TransCore, is supplying the City with the following software systems: TransSuite ATMS Map, TransSuite ATMS Explorer, TransSuite Traffic Control System (TCS), TransSuite Unified Controller Manager (UCM, ACDSS Traffic Adaptive).

As a part of the ATMS deployment Transcore will complete the following tasks:
Project initiation, management, and administration. System requirement documentation. Furnish Advanced Traffic Management System. Integrate traffic signal controllers. Generate databases, maps, and configuration files. System acceptance and validation
Training. This amendment will extend the contract term with TransCore in order to be aligned with the IGA executed with CDOT for the project funds.
